Overview

ABSTRACT

The Rural Capacity Building Project (RCBP) was launched in 2006 by Ethiopia's Ministry of Agriculture and Rural Development (MoARD) to make agricultural services and systems more responsive to clients' needs. In particular, a goal is to make clients aware of economically viable and environmentally sustainable technologies and practices. The project aims to make improvements in five major areas: agricultural technical and vocational education and training, agricultural extension services, agricultural research, information and communication systems within the MoARD, and agriculture market institutions. The project also seeks to improve women's participation in the extension system and to provide insight on HIV/AIDS and environmental issues in the region.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Households

Scope

NOTES

The Ethiopia Capacity Building Project (RCBP), Baseline Survey covered the following topics:

- A. Identification (Geographic Area Identification)
- B. Household Roster
- C. Consumption [monthly and annual expenditures; finances and shocks; household assets; housing]
- D. Access to Agricultural Extension Services [Farmer Training Centers; Development Agencies; Farmer Innovation Fund]
- E. Plot Roster [crop production inputs; crop production and utilization]
- F. Livestock

KEYWORDS

Farmer training, Extension services, Agriculture, Farming, Research, Gender

Coverage

GEOGRAPHIC COVERAGE

Regional Coverage

UNIVERSE

The data are from a baseline survey used to gauge the progress of the RCBP that had been implemented two years prior in Ethiopia.

Sampling

Sampling Procedure

The participating households were randomly chosen from the Amhara, Oromia, SSNP, Benshangul Gumaz, and Afar regions. The sample consists of 1,609 households from Ethiopia's Amhara, Oromia, SSNP, Benshangul Gumaz, and Afar regions. Among the 1,609 households, there are 1,136 male and 473 female respondents. Among these, 10 male respondents are not heads of their households, and 46 women are not heads of their household. Thus 1,172 households have a male head, and 437 households have a female head. The average size of a household is 6 people, mostly consisting of the household head, spouse, and children. The average age of a household head is about 44. Lastly, 1,008 household heads have no education and 596 have attended at least one year of school.
