Overview

ABSTRACT

The overall objective of the UNPS Program is to collect high quality data on key outcome indicators such as poverty, service delivery, governance and employment among others; to monitor Government's development programmes like the NDP and the JAF among others on an annual basis. The specific objectives of the survey are:

- To provide information required for monitoring the NDP and other development objectives like the JAF, MDGs as well as specific programs such as the National Agricultural Advisory Services (NAADS) among others.
- To provide high quality nationally representative information on income dynamics at the household level as well as annual consumption expenditure estimates to monitor poverty in years between the Uganda National Household Surveys (UNHS)
- To supply regular data on agriculture in order to characterize and monitor the performance of the agricultural sector.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Households

Scope

NOTES

The 2011-2012 Uganda National Panel Survey covered the following topics:

HOUSEHOLD

- Household identification particulars
- Staff details and survey time
- Household roster
- General information on household members
- Education (all persons 5 years and above)
- Health - Child nutrition and health (for all children 0-59 months old)
- Labour force status (for all household members 5 years and above)
- Housing conditions, water and sanitation
- Energy use
- Other household income in the past 12 months
- Non-agricultural household enterprises/activities

- Household assets
- Household consumption expenditure
- Shocks and coping strategies
- Welfare and food security
- Transport services and road infrastructure

AGRICULTURE

- Household identification particulars
- Staff details and survey time
- Current land holdings
- Land that the household has access through use rights
- Agricultural and labour inputs
- Crops grown and types of seeds used
- Quantification of production
- Cattle and pack animals
- Small animals
- Poultry and others
- Livestock inputs
- Livestock production, meat
- Livestock production, milk
- Production of eggs
- Dung output and animal power
- Extension services
- Farm implements and machinery

WOMAN

- Household identification particulars
- Contraception and birth related issues
- Marital status
- Birth history

COMMUNITY

- Identification particulars
- Service availability in LC1
 - o Availability of services in the LC1

- o Client satisfaction with health facilities
- o Water and sanitation
- Education
- o Availability of facilities at the school
- o Condition of toilet facilities in the school
- o Water facilities at the school
- o Payment for services by parents/ guardians at the school
- o Academic performance of the pupils in PLE
- o Incidence of leaving school pre-maturely
- o School meetings
- o Staffing position of the school
- o Supervision/ monitoring of the school during the last 12 months
- o Problems/ constraints faced by the school
- o Learner attendance, teacher presence and qualifications and other classroom elements
- o Accountability in the school

MARKET/PRICE

- Health
- o Client Satisfaction with Health facilities
- o Availability of equipment/ services at the facility
- o Services offered by the health facility
- o Common diseases reported at health facility
- o Common stock outs reported at health facility
- o Items brought by patients visiting the health facility
- o Deliveries at the facility
- o Validation of HMIS
- o Epidemic reporting
- o General operations
- o Sanitary facilities available at the health facility
- o Access to water at the health facility
- o Factors limiting provision of health services
- o Supervision/ Monitoring of health facility
- o Village health teams

- o Staffing at the facility
- o List of all medical staff who work at the facility
- o Accountability in the health facility
- Works and transport
- o Infrastructure (road/bridges/culverts) availability and condition
- o Maintenance and repair of infrastructure
- o Funding for maintenance of roads/bridges/culverts
- o Constraints faced in the maintenance and repairs of roads
- o Accountability in the sub county and rating of overall performance of the sub county administration
- Community characteristics
- o Community groups
- o NGOs in the community
- o Community needs, actions and achievements
- o Communal resource management

Sampling

Sampling Procedure

The 2011-2012 UNPS survey maintained the 2010-2011 UNPS sample design whereby all households that were sampled for Wave II (2010/11) were tracked and re-interviewed in Wave III (2011-2012). Out of the 7,400 households interviewed during the UNHS 2005-2006, 3,123 households were selected for the panel surveys. As a result, the same sample was maintained in 2009-2010, 2010-2011 and 2011-2012 round of surveys. During data collection, households or individuals that had permanently left the original households to known locations were tracked and interviewed. The new households formed are known as split-off households whereas the individuals are termed as movers.

Deviations from Sample Design

The drop in the number of households between wave II and wave III can be attributed to sample attrition-that is, households/people dropping out of the sample due to refusal, death, or the inability of the field teams to locate them among others. 32 percent of the UNPS households were not traced in 2011/12 because they had shifted to unknown locations, 25 percent were not known/not found while 12 percent of the households had disintegrated. Regionally, higher proportions of households (48%) that had shifted were registered in the Eastern and Western regions while Kampala (44%) had the highest percentage of households that were not know/not found and the Northern region (18%) had the highest of those households that had disintegrated.

Response Rate

75 percent

Weighting

In an attempt to overcome any effects of survey non-response (including attrition), the UBOS analyses the UNPS sample each year and produces weights that adjust for differences between the characteristics of the panel sample and the characteristics of the Ugandan population-hence adjustment is made for non-randomness in the sample selection process.

Data Collection

Data Collection Dates

Start	End	Cycle
2011-11	2012-11	N/A

Data Collection Mode

Computer Assisted Personal Interview [capi]

Data Processing

Data Editing

The 2011-2012 round of UNPS used a computerized system of data collection whereby field staff directly captured information using Ultra Mobile Personal Computers (UMPCs) during data collection. The UMPCs were loaded with a data entry application with in-built range and consistency checks to ensure good quality data. Field Team Leaders run checks on the data while still in the field thereafter electronically transmitting it to UBOS Headquarters for verification. Every team was facilitated with an internet modem, a generator and extra UMPC batteries to ensure uninterrupted power supply and internet connectivity while in the field.
