Number of individuals other than household members sharing meals within the household expenditure.																					

Dear household ...

We will entrust you with the notebook to record your daily expenditure for a period of (7) days from the day following the day you received the notebook, which include: -

1. Your daily expenditure on food and drink and smoking, including ready to eat food whether eaten at home or in restaurants, cafes or in other places.
2. Your daily expenditure on some non-food items and services that have the status of recurrent expenditure. Namely: -
  - Gasoline of all kinds (generators and private cars)
  - s (transport within the governorate and between governorates)
  - Newspapers and magazines
3. number of meals taken by household members within the housing unit during past
4. Number of meals taken by individuals from outside the household that came for the
5. Two pages are assigned to record the expenditure of each day of the week, separately. Meals are recorded in the last two pages in the notebook.
6. In the case of household consumption of a commodity from its self-production, for example, the family produces rice or milk, and consumed a quantity of this product, the household records the amount consumed and not the total production after it is converted to units of measurement (such as a bowl, mug ... etc. ) to kilogram. The
7. There are some goods acquired by the household from the exchange of goods (barter), for example, the family gives an amount of flour and receives in return tomatoes. Record in the notebook the value of the tomatoes it acquired at the price
8. In all other cases the household which consumes a commodity that it did not spend on, as commodities received from other households or for work, include the item and
9. If the household bought an item on credit (debt) during the time reference (7 days), record the full purchasing value in the household expenditure as soon as it acquires the commodity.
10. Do not record in the notebook expenditure on goods and services used for productive purposes such as expenditure on fuel for taxis (taxi) or for machines and pumps used in the farm. Record only the value and the amount of gasoline used for the purposes

Your provision of correct and accurate information will help planners and policy makers make sound decisions to raise your level of living and reduce poverty in Iraq
