Aim and use of the survey

The aim of the General Household Survey (GHS) is to measure the level of development and performance of various government programmes and projects.

It is essential for any country to measure the characteristics of its population and monitor changes in those characteristics over time. Various Government Departments are stakeholders in the GHS and the information collected is provided to them for further analysis. The GHS's results will help in the compilation of indicators of living standards and service delivery such as average household size, literacy, patterns of home ownership, access to water and sanitation facilities, access to social welfare services, use and access to transport as well as access and service delivery related to healthcare facilities and education institutions.

The survey design

A representative national sample of 31 479 Dwelling Units (DUs) has been drawn from the 3 055 Primary Sampling Units (PSUs) that form the current master sample. The master sample is based on the 2001 Population Census Enumeration Areas (EAs). Between 1 and 30 dwelling units have been randomly sampled from each PSU and all the households residing within these sampled dwelling units will be enumerated.

Write figures very carefully

Close the zeros (0) so that they will not be mistaken for the sixes (6).

When there is more than one zero (0), as for instance in the value 1 000, do not connect the zeros on top, which is very common. Don't write the figures sideways or diagonally. Never use decimal points (or decimal commas).

Your figures should be made like this:

1	2	3	4	5
6	7	8	9	0

Your crosses should not touch the sides:

FLAP This section covers particulars of each person in the household

The following information must be obtained for every person who is considered to be a member of the household.

Only add persons who had stayed here for at least four nights on average per week for the last four weeks. **Do not forget babies.**

If there are more than 10 persons in the household, use a second questionnaire.
