## Overview

---

### ABSTRACT

The Integrated Living Conditions Survey (ILCS), conducted annually by the NSS National Statistical Service of the Republic of Armenia, formed the basis for monitoring living conditions in Armenia. The ILCS is a universally recognized best-practice survey for collecting data to inform about the living standards of households. The ILCS comprises comprehensive and valuable data on the welfare of households and separate individuals which gives the NSS an opportunity to provide the public with up to date information on the population's income, expenditures, the level of poverty and the other changes in living standards on an annual basis.

### KIND OF DATA

Sample survey data [ssd]

### UNITS OF ANALYSIS

Households

## Scope

---

### NOTES

The scope of the Integrated Living Conditions Survey includes:

- List of Household Members
- Migration
- Housing and Dwelling Conditions
- Employment
- Education
- Agriculture
- Food Production
- Monetary and Commodity Flows between Households
- Health (General) and Healthcare
- Debts
- Subjective Assessment of Living Conditions
- Provision of Services
- Social Assistance
- Households as Employers for Service Personnel

## - Household Monthly Consumption of Energy Resources

## TOPICS

Topic	Vocabulary	URI
Agriculture & Rural Development	FAO	
Food (production, crisis)	FAO	
Economic Policy & Debt	FAO	
Financial Sector	FAO	
Access to Finance	FAO	
Migration & Remittances	FAO	
Nutrition/Social protection	FAO	
Health	FAO	
Labor	FAO	

## Coverage

## GEOGRAPHIC COVERAGE

National coverage

## Producers and Sponsors

## PRIMARY INVESTIGATOR(S)

Name	Affiliation
National Statistical Service	The Republic of Armenia (NSS RA)

## OTHER PRODUCER(S)

Name	Affiliation	Role
World Bank		Technical assistance

## FUNDING

Name	Abbreviation	Role
Food Security Program of the European Commission		Financial assistance
Millennium Challenge Account 2007-2011		Financial assistance

## Metadata Production

## METADATA PRODUCED BY

Name	Abbreviation	Affiliation	Role
Office of Chief Statistician	OCS	Food and Agriculture Organization	Adoption of metadata for FAM
Development Data Group	DECDG	The World Bank	Generation of DDI
Poverty - GP	GPVDR	The World Bank	Generation of DDI

## Sampling

### Sampling Procedure

---

The sample frame for 2014-2016 was designed in accordance with the database of addresses of all private households in the country developed on basis of the 2011 Population Census results, with the technical assistance of the World Bank. The method of systematic representative probability sampling was used to frame the sample. For drawing the sample, the sample frame was divided into 32 strata including 12 communities of Yerevan City (currently, the administrative districts). According to this division, a two-tier sample was drawn stratified by regions and by Yerevan. All regions and Yerevan, as well as all urban and rural communities were included in the sample in accordance to the shares of their resident households within the total number of households in the country. In the first round, enumeration areas - that is primary sample units to be surveyed during the year - were selected. The ILCS 2014 sample included 30 enumeration areas in urban and 18 enumeration areas in rural communities per month. The method of representative probability sampling was used to frame the sample. At regional level, all communities were grouped into two categories - towns and villages. According to this division, a two-tier sample was drawn stratified by regions and by Yerevan. All regions and Yerevan, as well as all rural and urban communities were included in the sample in accordance to the shares of their resident households within the total number of households in the country. In the first round, enumeration districts - that is primary sample units to be surveyed during the year - were selected. The ILCS 2015 sample included 30 enumeration districts in urban and 18 enumeration districts in rural communities per month.

In 2015 a total of 5,184 households were selected, of which 3,240 and 1,944 households from urban and rural communities, respectively.
