FOREWORD

The Department of Agriculture & Cooperation, Ministry of Agriculture has been conducting Agriculture Census quinquennially in collaboration with States/Union Territories since 1970-71 as part of the World Agriculture Census programme. 'Operational holding' which is distinct from 'ownership holding' is taken as basic unit of data collection in Agriculture Census since operational holding is fundamental unit for taking decisions in programmes for agricultural development. The Agriculture Census 2005-06 is the eighth in the series.

Organization of Agriculture Census in a vast country like India, is a voluminous work as it involves collection, compilation and tabulation of data in respect of about 130 million operational holdings spread all over the country. This work necessarily requires sincere effort on part of the functionaries at various levels in States/Union Territories. The cooperation extended by them in completing this voluminous task is gratefully acknowledged. Needless to say that timely completion of the Census is critical for effective use of the available information. The endeavour of the Department of Agriculture and Cooperation has, therefore, been to complete the Agriculture Census in time. With the publication of this report, a firm ground has been laid for timely completion of the next Census 2010-11.

I would like to appreciate the efforts made by officers and staff of the Agriculture Census Division in this Department for constantly monitoring and providing administrative/technical support to the State Governments in completing Census work. The assistance rendered by National Informatics Centre/DOEACCs in computerizing the Agriculture Census data is also acknowledged.

I hope the information presented in the report would be found useful by policy makers, researchers and students involved in the field of agriculture.

P R E F A C E

First comprehensive Agriculture Census was carried out in India with agricultural year 1970-71 (July-June) as the reference period as part of World Agriculture Census Programme. The operational holding is considered to be the fundamental unit of decision making in all programmes of agricultural development. In keeping with the international practice, basic unit of enumeration was taken as 'Operational holding' as distinct from 'Ownership holding' in India.

Encouraged by the utility of data generated by the first agriculture census for use in planning and policy formulation, the National Commission on Agriculture (1976) recommended that the Agriculture Census be carried out once in five years. Accordingly, the second Agriculture Census was conducted with 1976-77 as the reference year. An Input Survey was also conducted as part of this census to provide State level estimates of consumption of various inputs by different size classes of holdings.

The third Agriculture Census, with 1980-81 as the reference year, further amplified the scope of the census by collecting separately details about the holdings operated by Scheduled Castes and Scheduled Tribes. Besides, the sample size for the Input Survey was increased to cater to the requirements of disaggregated data for micro and macro level planning. The Agriculture Census 2005-06 is eighth in the series.

This gigantic task of the Census could not have been accomplished without cooperation of the States and Union Territories. Lakhs of Patwaris/Village Assistants/Inspectors of State Governments were involved in collection of primary data at village level. The State Agriculture Census Commissioners and State Technical Officers have taken great pains to ensure accuracy of field data and its timely completion as far as possible. I express my thanks to all these officers of the States/Union Territories who participated in the programme.

I would like to place on record my appreciation for the excellent work rendered by officers and staff of the Agriculture Census Division of the Ministry under the able guidance of Dr. Vidya Dhar, Agriculture Census Commissioner, Government of India, in bringing out the Report.

The assistance provided by the National Informatics Centre, New Delhi/DOEACCs in computerizing the Agriculture Census 2005-06 data, is also appreciated.

I hope the Report would be useful to all those who are concerned with the development of agriculture sector.

INTRODUCTION

Agriculture plays an important role in India's economy. It provides gainful employment to a large section of population of the country, particularly, the rural population. It contributes to the socio-cultural development of the farming community. The land holding provides them the confidence and strength to stay and survive in the society. In view of the importance of agriculture, Government of India has been conducting comprehensive Agriculture Censuses for collection of data on structure and characteristics of agricultural holdings, as part of World Census of Agriculture Programme since 1970-71. Operational holding, being the basic unit of decision-making in agriculture, detailed data on structure of agricultural holdings and its characteristics are necessary for formulation of any meaningful and effective strategy for agricultural development.

Agriculture Census is carried out by States/Union Territories under overall technical guidance and administrative support from Ministry of Agriculture. It is a Central Sector Scheme being financed by Government of India. The fieldwork is carried out by Primary Reporting Agencies of Revenue Departments in most of the States. In some of the States, primary staff of Agriculture Department/Directorate of Economics & Statistics are also deployed on this job. Supervision of the fieldwork is done by supervisory officers of the Revenue/Agriculture/Statistics Departments of the State Governments.

For collection of Census data, States have been grouped into two categories viz., Land Record States and Non-Land Record States, wherein different statistical techniques are adopted for data collection and estimation. About 85 percent of operational holdings are covered by Land-Record States.

Present Report on Agriculture Census 2005-06 is eighth in the series. The report gives a perspective on historical background, organization of Agriculture Census besides concepts, definitions, sampling design, estimation procedure, limitations of data with brief analysis at All India and State levels.

The number of operational holdings has been consistently increasing since the first Agriculture Census in 1970-71. The number of holdings, which stood at 71.0 million in 1970-71 went up to 81.6 million, 88.9 million, 97.2 million, 106.6 million, 115.6 million, 119.9 million and 129.2 million (excluding Jharkhand State) in successive Censuses from 1976-77 to 2005-06. Thus the number of holdings have shown a compound annual growth rate of 1.73 percent during the period 1970-71 to 2005-06.

The operated area which was 162.1 million hectares in 1970-71 increased to 165.5 million hectares in 1990-91 and thereafter gradually declined to 158.3 million hectares in 2005-06.

The share of operational holdings managed by females increased to 11.70 percent in 2005-06 against 10.83 percent in 2000-01 indicating rising participation of females in management and/or operation of agricultural land.

The small and marginal holdings (below 2.00 ha.) constituted 83.29 percent in 2005-06 against 81.80 percent in 2000-01 having corresponding operated area as 41.14 percent and 38.86 percent. The semi-medium and medium operational holdings (2.00 ha. – 9.99 ha.) formed 15.86 percent with operated area of 47.04 percent in 2005-06 with respective figures of 17.17 percent and 47.93 percent in 2000-01. The large holdings (10.00 ha. & above) were only 0.85 percent of total number of holdings in 2005-06 with operated area of 11.82 percent as against respective figures of 1.03 percent and 13.21 percent in 2000-01.

The average size of holdings had shown declining trend. In 1970-71 it was 2.28 hectares, which came down to 2.00 hectares in 1976-77, 1.84 hectares in 1980-81, 1.69 hectares in 1985-86, 1.55 hectares in 1990-91, 1.41 hectares in 1995-96, 1.33 hectares in 2000-01 and further declined to 1.23 hectares in 2005-06.

In the report, an attempt has been made to present the data in objective and compressed form. It is hoped that policy makers, researchers and others concerned with agricultural development would find this report useful. The data is also available on the Department's website <http://agcensus.nic.in> for public use.

The Agriculture Census Division, Department of Agriculture & Cooperation in collaboration with State Agriculture Census Units did a commendable job in finalizing the Census data in shortest possible time.

I am happy to place on record my sincere thanks to officers and staff of Agriculture Census Division at the Centre and in States/Union Territories for their effort and cooperation in expeditiously completing the work. The assistance rendered by National Informatics Centre, New Delhi/DOEACCs in computerizing the Agriculture Census 2005-06 data, is also appreciated.

(Vidya Dhar)

142.	6(b)	Size class-wise estimated irrigated and unirrigated area under fodder & green manures – <i>Scheduled Tribes</i>	206
143.	6(b)	Size class-wise estimated irrigated and unirrigated area under tea – <i>Scheduled Tribes</i>	207
144.	6(b)	Size class-wise estimated irrigated and unirrigated area under coffee – <i>Scheduled Tribes</i>	207
145.	6(b)	Size class-wise estimated irrigated and unirrigated area under rubber – <i>Scheduled Tribes</i>	208
146.	6(b)	Size class-wise estimated irrigated and unirrigated area under total plantation crops – <i>Scheduled Tribes</i>	208
147.	6(b)	Size class-wise estimated irrigated and unirrigated area under total floriculture crops – <i>Scheduled Tribes</i>	209
148.	6(b)	Size class-wise estimated irrigated and unirrigated area under total aromatic & medicinal plant – <i>Scheduled Tribes</i>	209
149.	6(b)	Size class-wise estimated irrigated and unirrigated area under total other non-food crops – <i>Scheduled Tribes</i>	210
150.	6(b)	Size class-wise estimated irrigated and unirrigated area under total non-food crops – <i>Scheduled Tribes</i>	210
151.	7	Size class-wise estimated number and area of operational holdings according to dispersal of operated area – <i>All Social Groups</i>	211
152.	7	Size class-wise estimated number and area of operational holdings according to dispersal of operated area – <i>Scheduled Castes</i>	212
153.	7	Size class-wise estimated number and area of operational holdings according to dispersal of operated area – <i>Scheduled Tribes</i>	213
154.	1	State-wise number and area of operational holdings – All Size Classes - <i>All Social Groups</i>	214
155.	1	State-wise number and area of operational holdings – All Size Classes – <i>Scheduled Castes</i>	218
156.	1	State-wise number and area of operational holdings – All Size Classes – <i>Scheduled Tribes</i>	223

Sl. No.	Table No.	Description	Page
157.	2(a)	State-wise estimated number and area of operational holdings by tenancy status – All Size Classes - <i>All Social Groups</i>	228
158.	2(a)	State-wise estimated number and area of operational holdings by tenancy status – All Size Classes - <i>Scheduled Castes</i>	230
159.	2(a)	State-wise estimated number and area of operational holdings by tenancy status – <i>Scheduled Tribes</i>	232
160.	2(b)	State-wise estimated leased n area by terms of leasing – <i>All Social Groups</i>	234
161.	2(b)	State-wise estimated leased n area by terms of leasing – All Size Classes - <i>Scheduled Castes</i>	236
162.	2(b)	State-wise estimated leased n area by terms of leasing – All Size Classes - <i>Scheduled Tribes</i>	238
163.	3	State-wise estimated area under different land use – All Size Classes - <i>All Social Groups</i>	240
164.	3	State-wise estimated area under different land use – All Size Classes - <i>Scheduled Castes</i>	242
165.	3	State-wise estimated area under different land use – All Size Classes - <i>Scheduled Tribes</i>	244
166.	4	State-wise estimated number of operational holdings by irrigation status – All Size Classes - <i>All Social Groups</i>	246
167.	4	State-wise estimated number of operational holdings by irrigation status – All Size Classes - <i>Scheduled Castes</i>	248
168.	4	State-wise estimated number of operational holdings by irrigation status – All Size Classes - <i>Scheduled Tribes</i>	250
169.	5(a)	State-wise estimated number of operational holdings receiving irrigation and area irrigated by different sources – All Size Classes - <i>All Social Groups</i>	252
170.	5(a)	State-wise estimated number of operational holdings receiving irrigation and area irrigated by different sources – All Size Classes - <i>Scheduled Castes</i>	253
171.	5(a)	State-wise estimated number of operational holdings receiving irrigation and area irrigated by different sources – All Size Classes - <i>Scheduled Tribes</i>	255
172.	5(b)	State-wise estimated number of wells and tubewells – All Size Classes - <i>All Social Groups</i>	257
173.	5(b)	State-wise estimated number of wells and tubewells – All Size Classes - <i>Scheduled Castes</i>	258
174.	5(b)	State-wise estimated number of wells and tubewells – All Size Classes - <i>Scheduled Tribes</i>	260
175.	6(a)	State-wise estimated irrigated and unirrigated area under different crops – All Size Classes - <i>All Social Groups</i>	262
176.	6(a)	State-wise estimated irrigated and unirrigated area under different crops – All Size Classes - <i>Scheduled Castes</i>	263
177.	6(a)	State-wise estimated irrigated and unirrigated area under different crops – All Size Classes - <i>Scheduled Tribes</i>	264

PART – 1

CHAPTER I

Historical Background and Organisation of Agriculture Census

Growth of Land Records System

1.1.1 From the earliest times, India's self-sufficient villages constituted the hub of rural economy based on agriculture. Land Revenue was one of the main sources of State Income. Collection of land revenue necessitated maintenance of some records relating to cultivation. In the 16th century, Sher Shah Suri initiated land settlement operations for assessment and collection of land revenue. This was later systematized during the reign of Akbar, when Todar Mal reorganized the entire land revenue system.

1.1.2 The British Empire inherited a well laid out land records system from Mughals. They made drastic changes with a view to further improve land revenue system and augment the State revenue, as this constituted the main source of State income. These changes resulted in the development of two major types of land revenue systems. In Bengal and the adjacent areas, permanent settlement was introduced where private landlords were created to whom Government granted some but not all rights of private property in land. The new landlords acted as intermediaries between the Government and the actual cultivators. This land revenue system came to be known as Zamindari system. In large parts of Bombay and Madras, an entirely different land revenue system was developed wherein only temporary settlements were made. In this system, the Government directly dealt with the cultivators or ryots. This system came to be known as Ryotwari system. Many changes were made in these systems during the course of nineteenth century.

1.1.3 After the attainment of Independence, land laws were aimed at bringing the peasant and State into direct contact. In areas where the Zamindari system prevailed, new laws provided for abolition of intermediaries. In areas where Ryotwari system prevailed, the laws aimed at providing protection to the tenants, actual tillers of the land. These tenant laws had two main objectives. The first was to protect tenants against eviction by granting to them permanent occupancy rights

on the Agriculture land they had been tilling. The second was to reduce rents by fixing upper limits.

Land Records and Agricultural Statistics

1.1.4 The gradual evolution of the land record system in the country necessitated maintenance of village forms and registers giving details of land held, various conditions under which these were held. A regular system of revenue administration was established for the purpose. The main objective of these forms and registers has been to furnish basic material for periodic revision of land revenue assessment, settlement of newly occupied lands, suspension and remission of land revenue in the event of calamities affecting crop production, preparation of annual statement of demand of land revenue from holders and other aspects of land revenue administration. These forms and registers of various States agree to a large extent in essential details. Yet, with variations in the systems of land revenue assessment and administration, they show variations from State to State in the form and manner of their preparation and inclusion or exclusion of certain more detailed information. These forms and registers, in vogue for the maintenance of land records in different States, constitute the basis for the land utilisation, crops and irrigation statistics. These land record forms and registers are prepared on complete enumeration basis in all the States except for Kerala, Orissa, West Bengal, Nagaland, Meghalaya, Manipur, Tripura and some of the Union Territories. Detailed procedures for preparing and maintaining them are available in Land Record Manuals of respective States.

1.1.5 Changes in the content and coverage of forms have been made from time to time, to meet increasing requirements of data for planning and implementation of Agriculture development programmes. Agricultural Statistics in India have thus grown with the evolution of land records system in the country.

Improvement in Agricultural Statistics

1.1.6 With the ushering in of the planning era since 1951-52, number of schemes have been undertaken to improve the reporting of Agricultural statistics for use of policies and programmes relating to procurement of foodgrains, imports, exports and pricing of Agricultural commodities etc. Efforts have been made to

introduce a complete field to field enumeration system in the three permanently settled states of Kerala, Orissa and West Bengal as per the recommendation made by the National Commission on Agriculture. The National Commission on Agriculture after examining various alternatives for collection of Agricultural statistics, had come to the conclusion that the collection of data based on land records is the best option, provided the basic records are maintained properly. Since the basic land records are maintained by the Patwari, he is the best person to do the crop inspection. He is the most knowledgeable man in the field and, as such, the most suitable person for collecting the reliable information. The basic structure for collection of Agricultural statistics can be improved by enabling the Patwaris to do their job better and also to ensure that Patwaris and Revenue Inspectors at higher level devote adequate attention to the collection of Agricultural statistics and assign top priority to the work especially during the period of crop inspection. For this purpose, the jurisdiction of Patwari should be reduced to manageable proportion in the States where it is widely spread. Secondly, intensive supervision both by normal revenue agencies and statistical staff should be organized to ensure quality of data at the primary level. The primary and supervisory agencies, therefore, need to be suitably strengthened.

Need for data by operational holdings

1.1.7 In context of the strategy for Agricultural development, knowledge of detailed structure and characteristics of Agricultural holding is imperative for effective and efficient planning and implementation of programmes. For this purpose, it is essential to have information by operational holdings as distinct from ownership holdings which are no doubt useful to have an idea of the distribution of wealth but information by operational holdings is more important for implementation of Agricultural development programmes as such. An operational holding is defined as “all land which is used wholly or partly for Agricultural production and is operated as one Technical Unit by one person alone or with others without regard to title, legal form, size or location”. It is the operational holding which is the fundamental unit of decision making in agriculture and consequently for development programmes aimed at improving the condition of individual cultivators and also the production. Thus, a Census of operational holdings or what is otherwise known as the Agriculture Census for providing basic

data on number, size, tenancy, land utilization, cropping pattern and irrigation particulars, etc., assumes importance.

1.1.8 While the system of Agricultural statistics that was in vogue in the country provided for aggregates at various geographical levels, data on structure of holdings had not been tabulated. As early as 1830, the Famine Inquiry Committee stressed the need for adequate statistics of land holdings. Again the Famine Inquiry Commission of 1945 tried to gauge the relationships between the land tenure systems and the efficiency of Agricultural production but the Commission was handicapped in this regard due to non-availability of data and the Commission made a number of recommendations for improvement of Agricultural Statistics. Due to various reasons, these recommendations were not given effect to.

International effort for Agriculture Census

1.1.9 The decennial World Census of Agriculture sponsored by Food and Agriculture Organisation (FAO) of the United Nations essentially constitutes a series of National Agriculture Census taken all over the world in or around the same year within the framework of uniform concepts and definitions and a common programme of items coverage and tabulation. The first step towards the World Census of Agriculture was initiated in 1924 by the International Institute of Agriculture, Rome which persuaded member-countries to carry out a general programme of Agriculture Census on a comparable and uniform pattern. The object was to obtain from these various countries internationally comparable information on the structure of agriculture through holding-wise enumeration of crop areas and livestock in one operation. Sixty-three countries and territories participated in the first Census in 1930 and of these only 46 countries took it by holdings and the rest obtained aggregates on various levels of geographical areas. The next census was planned for 1940 but could not be carried out due to Second World War. Hence the second World Agriculture Census was carried out around the year 1950 under the guidance of FAO which had since replaced the former International Institute of Agriculture. One hundred and six countries and territories participated in the second census.

1.1.10 The Government of India wanted to take the opportunity of the 1950 round of the World Census of Agriculture to overhaul the country's machinery for

collection of Agricultural Statistics. A Technical Committee on Coordination of Agricultural Statistics was set up by the Ministry of Agriculture for the purpose. The Committee worked out detailed forms for collecting comprehensive data relating to the Agricultural economy of the country. The Committee's recommendations for carrying out a census with 1950-51 as the reference year could not, however, be implemented due to constraints on resources. The Third World Agriculture Census was carried out in 1960. Here also India could not go in for a comprehensive Agriculture Census in the country.

Initial efforts in India for data on operational holdings by NSSO

1.1.11 As the Government of India were, however, keen to obtain information on operational holdings, hence both for 1950 and 1960 rounds of Agriculture Census, data required by the World Agriculture Census were collected through sample surveys carried out by National Sample Survey Organization (NSSO). In connection with the 1950 round of World Agriculture Census, data were collected in India for the major crop season of the Agriculture year 1953-54 during the 8th round of NSS (1954-55). For the 1960 round of World Agriculture Census, data were collected during the 16th round (1960-61) and 17th round (1961-62) of NSS. These gave estimates for the country as a whole and for States. These estimates were of limited value for micro level planning, say, for district or lower regional levels. NSSO also carried out a sample survey of land holdings in its 26th and 37th rounds.

First Comprehensive Agriculture Census in India

1.1.12 When the proposal for 1970 World Census of Agriculture was received from the FAO, the Government of India decided to participate in the Census and conveyed their decision to the FAO. According to the proposal of FAO, the 1970 World Census of Agriculture envisaged in principle the collection of data for all individual holdings by direct enumeration. FAO, however, suggested that sampling may be resorted to for areas where complete enumeration may not be possible. As mentioned earlier, in most parts of India the system of land records containing plot-to-plot details in every village exist. Only in a few States and territories of India such a system was not in vogue. Hence the Government of India decided to obtain the necessary information for the Census by a system of retabulation of the

data available in the land records for those states and territories where such comprehensive records exist. In other areas where land records did not exist or gave insufficient census information, sample surveys were thought of and the size of the sample was such as to provide reliable estimates at the district level and for major characteristics even at levels lower than district such as Tehsil/block.

1.1.13 Thus, the first comprehensive Agriculture Census in India was carried out with the Agriculture year 1970-71 as the reference period.

Second Agriculture Census- Reference period and coverage

1.1.14 The experience gained in conducting the Agriculture Census 1970-71 had been rewarding. The use of the data from that census was encouraging and hence it was agreed that similar Agriculture Census should be undertaken at more frequent intervals of time, say, quinquennially. The National Commission on Agriculture also emphasized the need for repeating the Agriculture Census every five years coinciding with the plan periods. The question of carrying out the next Agriculture Census was, therefore, examined in consultation with the States and concerned Central Ministries. It was originally decided in August, 1974 that the next census should be carried out on sample survey basis with the Agriculture year 1975-76 as the reference period. However, a number of changes were likely to take place in the existing land records during 1975-76 and since land records constituted the base for the Agriculture Census in most parts of the country, it was decided to postpone the reference year from 1975-76 to 1976-77. In the 1976-77 Agriculture Census, Sikkim and Mizoram were also covered for the first time to make the coverage complete. But the 1976-77 Census could not be carried out in Punjab for some reasons.

Pilot studies and the procedure

1.1.15 It was envisaged that the 1976-77 Agriculture Census would in general cover a sample of about 20 per cent of the villages and the data on principal characteristics would be obtained from the resident cultivators in the selected villages. The experimental pilot studies carried out to find out the problems under this approach indicated large scale under-estimation, both in area and the number of operational holdings. The under-estimation was mainly due to omissions of resident cultivators and the land operated by them. This was then considered by

the Technical Committee on Agriculture Census who recommended that the primary data on number and area of operational holdings (Table 1) should be prepared in respect of all the villages in the States where comprehensive land records exist. For the rest of the items, namely, tenancy, land use, irrigation, crops etc. necessary data might be collected from a sample of 20 per cent of the villages and the entire resident cultivators therein. The advantage of this procedure was that all the survey number operated within the village was completely covered and as such the entire cropped area of the village were accounted for. In the case of non-land record States; however, the entire census was carried out on sample survey basis.

Input Survey

1.1.16 The scope of the 1976-77 Agriculture Census was also widened to include a separate Input Survey to obtain information on the use of various inputs such as fertiliser, manures, pesticides, Agriculture implements and machinery, livestock for five broad size groups of operational holdings, viz. marginal, small, semi-medium, medium and large.

1.2 Agriculture Census as part of Agricultural Statistics

1.2.1 Agriculture Census in India forms part of broader system of collection of Agricultural Statistics. It is a large scale, periodic, Government sponsored operation for collection and derivation of quantitative information about the structural aspect of agriculture in the country. The basic unit of collecting data in Agriculture Census is the 'Agriculture Operational Holding' as distinct from 'Ownership Holding'. This is so as the operational holding is the fundamental unit of decision making in agricultural planning. Agriculture Census is conducted in most parts of the country, where detailed village land records exist, on complete enumeration basis by retabulating the data available in these records into the prescribed schedules for Agriculture Census by consolidating the information of all parcels of each of the operational holding, in the village of residence of the operational holder. In the States where detailed land records do not exist, the Agriculture Census is carried out through sample surveys by household inquiry approach.

1.2.2 Agriculture Census in India coordinated by the Agriculture Census Division of the Ministry of Agriculture requires a high degree of coordination, technical expertise, statistical control and supervision over the States. The data collected through Agriculture Census is in the nature of supplement to the current Agricultural Statistics. Under the current Agricultural Statistics, coordinated by the Directorate of Economics & Statistics of the Ministry of Agriculture, data on area, yield and production estimates are generated every year, for different seasons and details are also available for a variety of crops. The current statistics, however, provide for broad aggregates for various administrative units but not by size classes, social groups, types of holdings and gender. In planning for Agricultural development in the country, the data pertaining to various categories of farmers such as marginal, small, semi-medium, medium and large are important and it is this specific aspect that is attempted through Agriculture Census to provide data by various size classes, social groups, types of holding and gender and thus, compliments the current Agricultural Statistics in the country.

1.2.3 The Agriculture Census is, however, restricted to information on number of operational holdings and the area operated thereof with attendant details on tenure, land use, irrigation, cropping pattern and scatteredness of holdings. The census does not go into yield and production aspects which are of immediate interest for Agriculture policies and are thus covered under current Agriculture Statistics. On the other hand, the Agriculture Census is designed mainly to get an idea of the structure of the Agriculture economy as such which can be had from a study of the changing pattern of the operational holdings. As the changes in the pattern are not so rapid, the Agriculture Census is conducted at longer intervals. In India, agriculture is the most important activity and a periodical assessment of the changing pattern once in five years to review and formulate programmes in each Five Year Plan is considered adequate and imperative. On the recommendation of the National Commission on Agriculture, the Agriculture Census in India is carried out at an interval of five years during each plan period although World Census of Agriculture (WCA) of FAO are in favour of conducting Agriculture Census once in ten years. Thus, there is complete complementarity between the two collections viz. Current Agriculture Statistics and quinquennial Agriculture Census.

1.2.4 The Agriculture Census is conducted in three phases. In Phase I, all the operational holdings in the country are enumerated and results giving number and area of operational holdings at various administrative levels like Block/Tehsil, District and State are generated according to various social groups, size classes, types of holdings and gender. In Phase II, only 20 percent of the villages in each Tehsil or Block are selected and detailed information on aspects such as tenancy, land use, irrigation, cropping pattern of all the operational holdings of these selected villages is collected. In Phase III of the Agriculture Census which is known as Input Survey, the data is collected on use of different inputs as mentioned above.

1.2.5 So far eight Agriculture Censuses, at five yearly intervals, starting from 1970-71 have been completed. The Ninth Census with Agriculture year 2010-11 (July, 2010 to June, 2011) is already in operation. In addition to Agriculture Census, an Input Survey is also conducted in the following year of the Agriculture Census at the interval of five years to collect information on use of various inputs like fertilizers, manures, Agriculture credit, implements and machinery, seeds, livestock etc. So far seven Input Surveys since 1976-77 have been completed and the eighth one with reference year 2011-12 (July, 2011 to June, 2012) would be conducted from July, 2012.

CHAPTER 2

Concepts, Definitions, Methodology and Scope of Census Data

2.1 Operational Holding

2.1.1 All land which is used wholly or partly for Agricultural production and is operated as one technical unit by one person alone or with others without regard to the title, legal form, size or location.

2.2 Technical Unit

2.2.1 A technical unit has been defined as the unit which is under the same management and has the same means of production such as labour force, machinery, animals, credit etc.

2.3 Agricultural Production

2.3.1 Agricultural production includes growing of field crops including jute, oilseeds, fodder grass, seeds, tree nurseries (except those of forest trees), fruits, vegetables and flowers, plantation crops (coffee, tea, cocoa, rubber), etc.

2.3.2 Grass would be treated as a crop if special efforts are made to raise it.

2.4 *DE FACTO* Verses *DE JURE* Position

2.4.1 In most of the States, land records comprising records of the rights, tenancy and crop inspection of each survey number are maintained in various registers/forms by the revenue official, namely, patwaris. In these States, generally Agriculture Census data are compiled on the basis of retabulation approach. The question that arose in adopting this approach was about the reliability of data regarding tenancy particulars, as the *de facto* position may be different from *de jure* position. The *de facto* position related to what was actually the situation on the ground. In order to get reliable data on *de facto* position, the concerned States undertook updating of records on the eve of the Census to reduce *de jure* error. However, marginal differences may still exist though the primary workers were generally knowledgeable enough to record accurately the actual situation as far as possible.

2.5 Operated area

2.5.1 Operated area includes both cultivated and uncultivated area, provided part of it is put to Agricultural production during the reference period. If, for instance, an operational holding consists of four survey numbers out of which one survey number is put to non-

Agricultural uses, the total area of the operational holding is equal to the total geographical area of all the four survey numbers.

2.5.2 It would also cover the land occupied by the farm buildings, including the house of the holder, provided such buildings are located within the operated area. If the farms buildings are located outside the cultivated area and are covered under abadi area, such area of buildings are not included under operated area.

2.5.3 Operated area exclude government forest land, government waste land, village common grazing land, abadi area etc. If Government wasteland is allotted to an individual then it is included in the holding.

2.5.4 If the entire area of the holding (the area of all the survey numbers of an operational holding) is put to non-Agriculture use and/or it is under old fallow, it is not considered as operational holding. If, however, the entire area of operational holding is under current fallow during the reference year but was cultivated in the preceding year, this is still considered as operational holding.

2.5.5 In some cases, land is divided amongst all the members of the family. Where it is divided between the husband, wife and minor children and the cultivation is done by the husband as the head of the family, the land may appropriately be treated as one operational holding.

2.5.6 There might be cases where in the records, a holding is shown jointly in the name of more than one co-sharer while in fact the land may have been privately divided and the co-sharers are independently cultivating. In such cases where there is no dispute, they are treated as many operational holdings as the number of independent cultivators. This is because in Agriculture Census the data is collected on the basis of *de facto* position rather than *de jure* position.

2.5.7 In some States, in the Zamabandi register against a Khata, name of three or four persons are shown. While from the records it appears that there is only one holding, in practice, all the three or four brothers are actually cultivating the land independently of each other although there is no legal partition of land. From the Census point of view, this constituted three or four operational holdings.

2.5.8 Cultivated areas in the State Forests for which no detailed land records are available with the revenue agency, are excluded for Census purposes.

2.5.9 The operated area comprise of:

- i) Land owned and self operated.
- ii) Land leased in
- iii) Land otherwise operated.

2.5.10 **Land owned and self-operated:** Land for which the cultivator has the right to permanent heritable possession is considered as owned. This include:

- i) Land held from Government or others under grant or lease or assignment with right of permanent heritable possession with or without right of transfer
- ii) Land operated under perpetual lease.

Self-operated land include:

- i) Self cultivation
- ii) Land cultivated through members of the family
- iii) Land cultivated with the help of hired labour. Land owned and self operated should not include land leased out to others.

2.5.11 **Leased in:** Area leased in is defined as land taken on lease from others without any permanent right of possession for the lessee. Land may be leased in for:

- i) Fixed money
- ii) Fixed produce
- iii) Share of produce
- iv) Usufructuary mortgage: Ownership of the property remains with the mortgager but the possession is with the mortgagee (i.e. the person to whom the mortgage is made or given). Income from the property accrues to the mortgagee and the mortgage is terminated as soon as the full amount is realized.
- v) Other terms: It includes combination of two or more terms of leasing.

2.5.12 **Area otherwise operated:** This include encroachment, land forcibly occupied, unauthorized or land in dispute etc., which cannot be treated as owned or leased in, as per the definitions given above.

2.6 Operational holder

2.6.1 An Operational holder is the person who has the responsibility for the operation of the Agricultural holding and who exercises the technical initiative and is responsible for its operation. He may have full economic responsibility or may share it with others. The operational holder may be Individual/Joint/ Institutional.

- i) **Individual:** If the holding is being operated either by one person alone or by group of persons who are the members of the same household it is considered as an individual holding.
- ii) **Joint:** If two or more persons belonging to different households, share jointly as partners in the economic and technical responsibility for the operation of an Agricultural holding, such holding are considered as joint.
- iii) **Institutional:** Holdings such as government farms, sugarcane factories farms, cooperative farms, lands managed by trust is treated as institutional.

2.7 Resident and Non-resident operational holder

2.7.1 All the cultivators residing in a particular village and cultivating some land within the same tehsil are resident cultivators of that village irrespective of the fact whether they are cultivating land in that village or not. A resident cultivator may, therefore, have: either (i) entire area of the holding located in the village of his residence; or (ii) partly within the village of residence and partly outside; or (iii) entirely outside the village of residence.

2.7.2 An operational holder operating area outside the tehsil in which his village of residence falls, will not be treated as a resident cultivator of the village of his residence for Agriculture Census purposes rather he will be treated as a resident cultivator of that village outside the tehsil where the area falls.

2.7.3 If the area in a particular village is operated by a cultivator who resides outside that village but within the same tehsil, he is a non-resident operational holder for that area. However, if this operational holder is resident of a village lying outside the tehsil in which the area is located, he is treated as a resident operational holder (deemed resident) of the village where the area is located.

2.8 Complete/Part-Holding

2.8.1 A holding is said to be complete holding if the entire operated area of that holding is located in one village. If the operated area is spread over more than one village, it is considered as part-holding.

2.8.2 Tehsil/Block is taken as the outer limit for consolidation of part holdings.

2.9 Wholly Irrigated, Partly Irrigated and Wholly Unirrigated Holdings

2.9.1 If the entire net area sown in an operational holding is equal to net area irrigated, such holdings are considered as wholly irrigated holding. In case part of the net sown area is irrigated, it is partly irrigated and if the entire sown area has not received any irrigation during the year of reference, such holding are wholly unirrigated.

2.10 Land Utilization

2.10.1 Operated area is classified into six broad categories:

- i) Net area sown
- ii) Current fallow
- iii) Fallow land other than current fallow
- iv) Other uncultivated land excluding fallow land
- v) Culturable waste; and
- vi) Not available for cultivation.

2.10.2 **Net area sown:** Total area sown with crops and orchards counting area sown more than once in the same year only once.

2.10.3 **Current fallow:** Cropped area, which are kept fallow during the current year but was cultivated in the previous year. For example with any seedling area is not cropped in the same year, it may be treated as current fallow.

2.10.4 **Fallow land other than current fallow:** All lands, which are taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years i.e. equal or greater than one year but less than or equal to five years.

2.10.5 **Other uncultivated land excluding fallow:** This include:-

- i) *Permanent pastures and other grazing lands:* All grazing lands, whether they are permanent pastures and meadows or not. Village common grazing lands is, however, excluded.
- ii) *Land under Miscellaneous Tree Crops:* Cultivable land, which is not included in the net area sown but is put to some Agricultural use. Land under casuarina trees,

thatching grasses, bamboo bushes and other groves for fuel which are not included under 'Orchards', are covered under this category.

2.10.6 *Culturable Waste:* All lands available for cultivation whether not taken up for cultivation or taken up for cultivation once but not cultivated during the current year and the last five years or more in succession for one reason or the other i.e. >5 years in succession. Such lands may be either wholly or partly covered with shrubs and jungles, which are not put to any use. Land once cultivated but not cultivated for five years in succession are also included in this category.

2.10.7 *Not available for cultivation:* This include Forest area under non-Agriculture use, barren and uncultivable land belonging to the operational holder.

- i) *Forest:* All lands classed as 'Forests' under any legal enactment dealing with forests or administered as forests whether State owned or private and whether weeded or maintained as potential forest land. The area of crops raised in the forest and grazing land or areas open for grazing within the forests would be included under the forest area. Only private forest is covered for the purpose of Agriculture Census.
- ii) *Area under Non-Agricultural Uses:* All lands occupied by buildings or ponds or lands put to use other than agriculture is included in this category. Only such lands within the cultivated holding of operational holder should be covered in the Census.
- iii) *Barren and Uncultivable Land:* All barren and uncultivable land within the cultivated holding of the operational holder should be covered in the Census.

2.11 Methodology adopted for Agriculture Census

2.11.1 The methodology adopted for carrying out the Agriculture Census for Land Record and non-Land Record States is as follows:-

a) *Land Record States*

- i) In States having comprehensive land records, information was collected on complete enumeration basis for all villages by retabulation method from the land records in respect of data on number and area of operational holdings. For collection of data on other characteristics, namely, tenure and tenancy, leased in area, land use, irrigation, area under different crops, etc., 20 percent of the villages selected randomly from each tehsil constituted the basis. In these 20 percent villages, information

relating to the above characteristics were compiled from the relevant khatauni and khasra registers in respect of all the resident cultivators. Resident cultivators of urban areas were also covered. These 20 percent villages were the same as selected under TRS.

ii) In most of the States in India, a fairly comprehensive system of land records consisting of various village forms and registers giving detailed information, on land and its utilisation exists. The current Agricultural statistics, particularly those in respect of cropwise area of individual fields, are collected and cropwise abstracts prepared for the village as a whole for each cropping season. These data are then aggregated at successive levels like patwari circle to revenue inspector circle, to tehsil, district, State and all-India levels. In Agriculture Census, the data available in the village land records, is required to be retabulated for generating information on the holdings. The procedure adopted for retabulation of data in States where retabulation approach is adopted, differs from State to State depending on the land records system followed. By and large, the patwari consults the khasra register and notes down the name of the cultivator against each khasra number and places together the survey number/sub-survey numbers cultivated by the same cultivator. Some of the other existing land records like Khatauni are also used in preparing the list of cultivators. The names of cultivators not owning but operating the land are added with the help of khasra register.

b) *Non-Land Records States*

i) In States where comprehensive land records do not exist and where the system of crop enumeration on a complete field-to-field basis is not in vogue, sample surveys through household enquiries were conducted to provide information on all the items covered by the Census.

ii) In the non-land records States, namely, Arunachal Pradesh, Goa, Kerala, Manipur, Mizoram, Meghalaya, Nagaland, Orissa, Sikkim, Tripura and West Bengal and the Union Territories of Daman and Diu and Lakshadweep, no village revenue agency exists for collection of crop statistics on a regular basis. In these States and Union Territories, a stratified two-stage sampling, design was followed for Agriculture Census. The development block was generally taken as the stratum. The first stage unit within the stratum was the village and the second stage unit was the operational holding in the sample village. From each stratum, at least 20 percent of

the villages were selected by simple random sampling method. A sample of 25 percent of the operational holdings from each of the categories of the holdings on the basis of circular systematic sampling method and all the holdings from the last two size-classes was selected. Detailed information was collected from these sampled operational holdings. However, for Table-1, that is, Number and Area of Operational Holdings, all the holdings in the sample village were taken for estimation of total number of holdings and area operated.

iii) In smaller States and Union Territories, where comprehensive land records were not available, the information was collected from a larger sample of villages than 20 percent.

iv) In each State/Union Territory referred to above, household enquiry method was adopted for collection of data. All the Agriculture households in selected villages were listed for enquiry. The sample size varied from State to State depending upon the prevalent local conditions.

v) Two different set of schedules which were used to compile the data in Agriculture Census 2005-06 are available in separate manuals for land record States/UTs and non-land record States/UTs.

2.12 Size Classes and Broad Size Groups of Holdings

2.12.1 The data are presented at All India level and for all States and Union Territories in the following size classes and size groups of operational holdings.

S.No.	Groups	Classes (in hectares)	
I.	Marginal	1.	Below 0.50
		2.	0.50 – 1.00
II.	Small	3.	1.00 – 2.00
III.	Semi-Medium	4.	2.00 – 3.00
		5.	3.00 – 4.00
IV.	Medium	6.	4.00 – 5.00
		7.	5.00 – 7.50
		8.	7.50 – 10.00
V.	Large	9.	10.00 – 20.00
		10.	20.00 and above

CHAPTER 3

SAMPLING DESIGN, ESTIMATION PROCEDURE AND LIMITATIONS OF DATA

(A) Sampling Design

3.1 Land Record States

3.1.1 In States where comprehensive land records exist, data on number and area of operational holdings according to different size-classes, social groups, types of holdings and gender of operational holder, is collected and compiled on complete enumeration basis through retabulation of information available in the Village Land Records. This implies covering all survey numbers within each village and preparing a list of 'Operational Holdings' therefrom. An operational holding is the basic unit of enumeration. The holding of the actual cultivator and not the owner is the unit for collection of data. Some holdings may not be located completely within the village and these may be spread over to other villages. For preparation of a list of operational holdings, necessary matching of the part-holdings scattered over more than one village has to be done. A holding may cut across boundary of a village/Patwari circle/Revenue Inspector Circle/Tehsil/District/State. A Tehsil is the outer limit for pooling of all the parcels of an operational holding. If a holding is spread over more than one tehsil, that part of the holding which is lying outside the tehsil of residence of operational holder is treated as a separate operational holding.

3.1.2 For the purpose of pooling of part holdings, the criterion adopted is the residence of the operational holder, but this is applicable to only those persons who are residing within the tehsil. If operator is residing outside the tehsil then, for the purpose of the Census, he is considered as resident operator of the village where his holding is located, and his holding in the village is treated as a separate operational holding. Necessary pooling of the part holdings has been done before preparation of Table-1 giving number of holdings and area operated for all the villages in the stratum.

3.1.3 For collection of detailed data, viz. (i) distribution of holdings according to the tenancy status; (ii) area under different land uses; (iii) distribution of holdings according to irrigation status; (iv) area irrigated source-wise and (v) area under principal crops, 20 percent of the villages selected randomly constituted the base. These 20 percent villages were those selected for Timely Reporting Scheme (TRS) for the reference year of Agriculture Census.

In these 20 percent villages, information relating to the above characteristics is compiled from the basic village land records, viz., Khatauni and Khasra in respect of all the resident cultivators. Resident cultivators of urban areas are also covered.

3.1.4 On the basis of the data obtained from 20 percent of the villages, tables are generated at the Taluk/District/State levels after adopting suitable estimation procedure as applicable in the case of Land Record States.

3.1.5 All the data is compiled separately for the operational holdings of the four groups, viz., Scheduled Castes, Scheduled Tribes, Others, Institutional and also the Total of all these groups. However, Table-1 is prepared gender-wise also.

3.2 Non-Land Record States

3.2.1 A stratified two stage sampling design is adopted for Agriculture Census in the non-land record States. In view of increasing demand of Agriculture Census data at Block Level, it has been decided that the Community Development Block or some other similar homogeneous administrative unit should be taken as the stratum. The first stage unit within the stratum is the village and the second stage unit is the operational holding. In the States where geographical dispersion of the village is not much, at least 20% of the villages are selected by simple random sampling method from each stratum. These sample villages include all villages selected under the scheme for Establishment of an Agency for Reporting Agricultural Statistics (EARAS). In States where less than 20 percent villages are selected for EARAS, additional villages are selected using random sampling to bring up the percentage of selected villages in each stratum to recommended 20 percent. For example, if only 15 percent villages have been selected for EARAS, additional 5 percent villages in each stratum are selected and added to the list of EARAS villages, to get the list of villages where Agriculture Census has been conducted.

3.2.2 In case of all holdings other than institutional holdings, the second stage sampling is to be done in the States for canvassing Holding Schedule (H).

3.2.3 All the institutional holdings in the selected village are included in the sample for filling Holding Schedule (H).

3.2.4 For adoption of common software for tabulation, it is necessary that all the non-land record States follow the above sampling design. However, variations in the size of the sample

at the two stages may be warranted to suit the pattern of distribution of holdings and/or villages in the States as also to ensure the presence of adequate number of units of each type in the sample.

3.2.5 The sampling of operational holdings is done separately for Scheduled Castes/Scheduled Tribes/Others categories of operational holders as estimates are to be worked out separately for each of these categories.

(B) Estimation Procedure

3.3 For States adopting Stratified Unistage sampling design (Land Record States)

3.3.1 The estimation procedure for population totals and their sampling errors at Taluk as well as District level in respect of specified characteristics relating to number of operational holdings and the operated area in respect of States having comprehensive Land Records is given below:

The estimate used is “Ratio Estimate in Simple Random Sampling”.

- | | | | |
|----|------------------|---|---|
| a. | Let M | - | be the number of Taluks in a district. |
| b. | Y_{ij} | - | Value of characteristic in the jth village of ith Taluk in a particular size class (say kth size class) |
| c. | X_{ij} | - | Total number of operational holdings/total operated area in the jth village of ith Taluk in a particular size class (whichever is applicable) |
| d. | $N_i(k)$ | - | total No. of villages in the ith taluk, each village having at least one holding in kth size class |
| e. | n_{ik} | - | Number of selected villages in ith Taluk, each village having at least one holding in the kth size class. |
| f. | $R_i(k)$ | - | Ratio of sample total of Y_{ij} to that of X_{ij} in the ith Taluk. |
| g. | $X_i(k)$ | - | Total number of operational holdings/Total operated area in the ith Taluk for kth size class (whichever is applicable) based on complete enumeration. |
| h. | $\hat{Y}_{i(k)}$ | - | The estimate of characteristic under study for ith Taluk for kth size class. |
| i. | $\hat{Y}_D(k)$ | - | The estimate of characteristic under study for the district for kth size class. |

Note:- Taluk and Tehsil are synonymous terms. Where Revenue Inspector Circle are strata, the unit would be Revenue Inspector Circle in place of Taluk.

The estimate of characteristic under study for ith Taluk for kth size class viz. $\hat{Y}_{i(k)}$ is given by

$$\hat{y}_i(k) = \frac{\sum_{j=1}^{n_i(k)} y_{ij}}{\sum_{j=1}^{n_i(k)} x_{ij}} x_i(k) = R_i(k) \cdot x_i(k)$$

The estimate of characteristic under study for the district for kth size class viz. $Y_D(k)$ is given by

$$\hat{y}_D(k) = \sum_{i=1}^M \left[\frac{\sum_{j=1}^{n_i(k)} y_{ij}}{\sum_{j=1}^{n_i(k)} x_{ij}} \right] \cdot x_i(k) = \sum_{i=1}^M R_i(k) \cdot x_i(k) = \sum_{z=1}^M \hat{y}_2(k)$$

$$\sum_{i=1}^M \hat{y}_i(k) = \sum_{i=1}^M \left[\frac{\sum_{j=1}^{n_i(k)} y_{ij}}{\sum_{j=1}^{n_i(k)} x_{ij}} \right] \cdot x_i(k) = \sum_{i=1}^M R_i(k) \cdot x_i(k)$$

The estimate of variance of $Y_i(k)$ is given by:

$$\hat{v}[\hat{y}_i(k)] = \frac{N_i(k)[N_i(k) - n_i(k)]}{n_i(k)[n_i(k) - 1]} \sum_{j=1}^{n_i(k)} (y_{ij} - R_i(k) \cdot Y_{ij})^2$$

The estimate of variance of $Y_D(k)$ is given by:

$$\hat{v}[\hat{y}_D(k)] = \sum_{i=1}^M \frac{N_i(k)[N_i(k) - n_i(k)]}{n_i(k)[n_i(k) - 1]} \sum_{j=1}^{n_i(k)} (y_{ij} - R_i(k) \cdot Y_{ij})^2$$

The percentage standard error of the estimate is given by:

$$\%S.E.(\hat{y}_D(k)) = \frac{\sqrt{\hat{v}(\hat{y}_D(k))}}{\hat{y}_D(k)} \times 100.$$

3.3.2 For States adopting stratified two stage sampling design with systematic sampling at the second stage.

3.3.3 The estimation procedure for estimating the population totals and their sampling errors with regard to specific characteristics relating to number of operational holding and operated area in respect of the above non-land record states is given below:

The estimate used is “Simple Mean”.

1. Let M be the number of Taluks in a district.
2. $Y_{ijp}(k)$ Value of characteristic in p^{th} holding of j^{th} village of the i^{th} Taluk in k^{th} size class.
3. N_i Total number of villages in the i^{th} Taluk.
4. n_i Number of sampled villages in the i^{th} Taluk.
5. $N_i(k)$ Total number of villages in the i^{th} Taluk, each having at least one holding in k^{th} size class.
6. $n_i(k)$ Number of selected villages in the i^{th} Taluk, each having at least one holding in k^{th} size class.
7. $N_{ij}(k)$ Number of holdings in the j^{th} selected village of the i^{th} Taluk in k^{th} size class.
8. $n_{ij}(k)$ Number of sampled holdings in the j^{th} selected village of the i^{th} Taluk in k^{th} size class.
9. $\hat{Y}_{ij}(k)$ The estimate of characteristic under study for the i^{th} Taluk in k^{th} size class.
10. $\hat{Y}_D(k)$ The estimate of characteristic under study for the district for k^{th} size class.

The estimate of characteristic under study for i^{th} Taluk for k^{th} size class viz. $\hat{Y}_i(k)$ is given by :-

$$\begin{aligned}\hat{y}_i(k) &= \frac{N_i(k)}{n_i(k)} \sum_{u=1}^{n_i(k)} \frac{N_{ij}(k)}{n_{ij}(k)} \sum_{p=1}^{n_{ij}(k)} Y_{ijp}(k) \\ &= \frac{N_i}{n_i} \sum_{ij=1}^{n_i(k)} \frac{N_{ij}(k)}{n_{ij}(k)} \sum_{p=1}^{n_{ij}(k)} Y_{ijp}(k)\end{aligned}$$

$$\hat{y}_D(k) = \sum_{i=1}^M \frac{N_i}{n_i} \sum_{ij=1}^{n_i(k)} \frac{N_{ij}(k)}{n_{ij}(k)} \sum_{p=1}^{n_{ij}(k)} Y_{ijp}(k)$$

The estimate of variance of $\hat{Y}_i(k)$ is given by:

$$\hat{V}\left(\hat{Y}_i(k)\right) = \frac{N_i^2(k)}{n_i(k)} S_{hi}^2(k) = \left(\frac{N_i}{n_i}\right)^2 n_i(k) S_{hi}^2(k) \cdot n_i(k)$$

$$\text{where } S_{hi}^2(k) = \frac{1}{n_i(n)-1} \sum_{j=1}^{n_i(k)} \left[t_{ij}(k) - \frac{\sum_{j=1}^{n_i(k)} t_{ij}(k)}{n_i(k)} \right]^2$$

$$\text{and } t_{ij}(k) = \frac{N_{ij}(k)}{n_{ij}(k)} \sum_{p=1}^{n_{ij}(k)} Y_{ijp}(k)$$

$$\hat{V}(\hat{Y}_D(k)) = \sum_{i=1}^M \hat{V}(\hat{Y}_i(k)) = \sum_{i=1}^M \left(\frac{N_i}{n_i} \right) \cdot n_i(k) S_{hi}^2(k)$$

$$\%S.E.(\hat{Y}_D(k)) = \left[\sqrt{\hat{V}(\hat{Y}_D(k)) / (\hat{Y}_D(k))} \right] \times 100.$$

3.4 For states adopting stratified unistage sampling design (non-land record states)

3.4.1 The estimation procedure for estimating the population totals and their sampling errors at Taluk/Block as well as District level in respect of specified characteristics relating to number of operational holdings and the operated area in respect of the non land record States is given below:-

The estimate used is “Simple Mean”.

1. Let M be the number of Administrative Units/Gram Sevak Circle Blocks/Taluks in a district.
2. $Y_{ij}(k)$ Value of characteristic in the j^{th} village of i^{th} Taluk in a particular size class (say k^{th} size class).
3. N_i Total number of villages in i^{th} Taluk.
4. n_i Number of selected villages in i^{th} Taluk.
5. $n_i(k)$ Number of selected villages in i^{th} Taluk, each village having at least one holding in k^{th} size class.
6. $\hat{Y}_i(k)$ The estimate of characteristic under study for i^{th} Taluk for K^{th} size class.
7. $\hat{Y}_D(k)$ The estimate of characteristic under study for the district for K^{th} size class.

The estimate of characteristic under study for i^{th} Taluk/Block for K^{th} size class viz., $\hat{Y}_i(k)$ is given by:

$$\hat{Y}_i(k) = \frac{N_i}{n_i} \sum_{j=1}^{n_i(k)} Y_{ij}(k)$$

The estimate of characteristic under study for the district for k^{th} size class viz., $\hat{Y}_D(k)$ is given by:

$$\hat{Y}_D(k) = \sum_{i=1}^M \frac{N_i}{n_i} \left(\sum_{j=1}^{n_i(k)} Y_{ij}(k) \right)$$

The estimate of variance of $\hat{Y}_i(k)$ is given by:

$$\hat{V}(\hat{Y}_i(k)) = \frac{N_i(N_i - n_i)n_i(k)}{n_i^2(n_i(k) - 1)} \left[\sum_{j=1}^{n_i(k)} Y_{ij}^2(k) - \frac{\left(\sum_{j=1}^{n_i(k)} Y_{ij}(k) \right)^2}{n_i(k)} \right]$$

$$\hat{V}(\hat{Y}_D(k)) = \sum_{i=1}^M \frac{N_i(N_i - n_i)n_i(k)}{n_i^2(n_i(k) - 1)} \left[\sum_{j=1}^{n_i(k)} Y_{ij}^2(k) - \frac{\left(\sum_{j=1}^{n_i(k)} Y_{ij}(k) \right)^2}{n_i(k)} \right]$$

The percentage standard error of the estimate is given by:

$$\%S.E.(\hat{Y}_D(k)) = \left[\sqrt{\hat{V}(\hat{Y}_D(k))} / \hat{Y}_D(k) \right] \times 100.$$

(C) Limitations of data

3.5.1 Agriculture Census 2005-06 was not conducted in the States of Bihar, Jharkhand and Maharashtra. Hence, an estimate for the important parameter, viz., number and area of operational holdings has been done for Bihar and Maharashtra.

3.5.2 The analysis of data relating to priority Table-1 providing information on number of holdings and area operated has been done based on the data available for 34 States/UTs out of 35 and for other items, like, tenancy, terms of leasing, land use, irrigation, dispersal of holdings and cropping pattern, the data for 32 States/UTs i.e. excluding Bihar, Jharkhand and Maharashtra out of 35, have been taken into account

3.5.3 There is no data for Jharkhand in the Report.

CHAPTER 4

Agriculture Census Results – All India All Social Groups

(A) Operational holdings

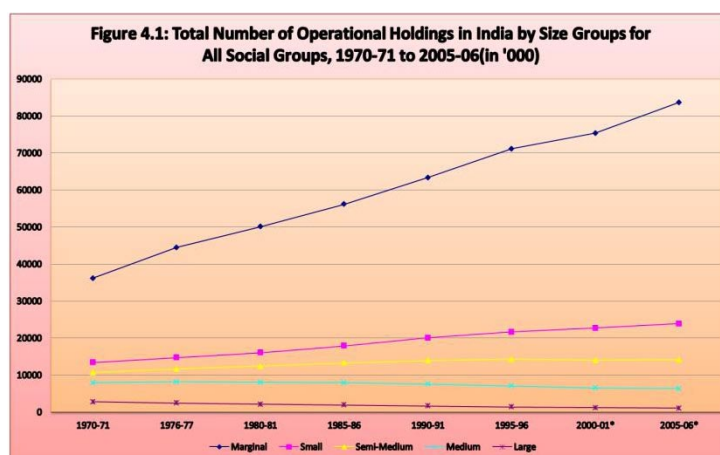

4.1 Distribution of operational Holdings

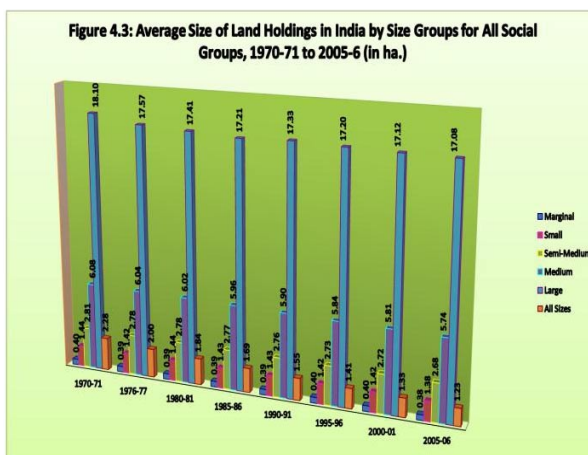

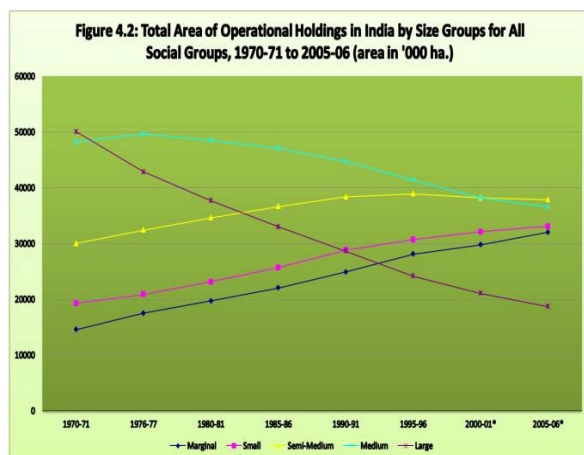

4.1.1 The number of operational holdings has been consistently increasing since the first Agriculture Census in 1970-71. The number of holdings, which was 71.0 million in 1970-71 went up to 81.6 million, 88.9 million, 97.2 million, 106.6 million, 115.6 million, 119.9 million and 129.2 million in the successive census from 1976-77 to 2005-06. Thus the number of holdings, since the first Agriculture Census with reference year 1970-71 have shown a compound annual growth rate of 1.73 percent which could be considered as moderate.

4.1.2 The operated area which was 162.1 million hectares in 1970-71 initially increased to 165.5 million hectares in 1990-91 and thereafter declined to 158.3 million hectares in 2005-06.

4.1.3 The average size of holdings had shown a steady decline over all the census period. In 1970-71 it was 2.28 hectares, which came down to 2.00 hectares in 1976-77, 1.84 hectares in 1980-81, 1.69 hectares in 1985-86, 1.55 hectares in 1990-91, which further reduced to 1.41 hectares during 1995-96, 1.33 hectares in 2000-01 and 1.23 hectares in 2005-06.

4.1.4 The data on number and area of operational holdings by major size classes and average size of holdings for all Social Groups since 1970-71 may be seen in Table 4.1. A graphical presentation of these characteristics of operational holdings may be seen in Figure 4.1, Figure 4.2 and Figure 4.3 respectively.

4.1.5 The number and area of operational holdings by size-classes, gender and their variations in Agriculture Censuses 2005-06 and 2000-01 may be seen in Table 4.2 and Table 4.3 respectively.

Table 4.1: Number of holdings, operated area and average size of holdings – All Social Groups.

Sl. No.	Size Groups	Number of Holdings (in '000)							
		1970-71	1976-77	1980-81	1985-86	1990-91	1995-96	2000-01*	2005-06*

	All Sizes	2.28	2.00	1.84	1.69	1.55	1.41	1.33	1.23

* Excluding Jharkhand.

4.1.6 The total number of operational holdings in the country increased from 119.93 million in 2000-01 to 129.22 million in 2005-06, showing an increase of 7.75 percent. Male operational holdings (excluding Institutional) constituted about 88.3 percent while female holdings were 11.7 percent against 89.1 percent and 10.9 percent respectively in 2000-01. This indicates rising participation of females in management and/or operation of agricultural land.

Table 4.2: Number of operational holdings and area operated by size-classes and gender for All Social Groups during Agriculture Census 2000-01 and 2005-06.

Sl. No.	Size Class (in Ha.)	Number (in '000)			Area (in '000 ha.)			Avg. size per holding (in ha.)

		(106669)	(12990)	(119931)	(144256)	(13373)	(159436)	(1.35)	(1.03)	(1.33)

Note: (1) *includes Institutional Holdings. (2) Total may not tally due to rounding off. (3) Figures in brackets relate to Agriculture Census 2000-01. (4) Figures are excluding Jharkhand.

4.1.7 In terms of operated area, it was 159.44 million hectares in 2000-01 which decreased to 158.32 million hectares in 2005-06, showing a decrease of 0.7 percent. The proportion of operated area belonging to female operational holders (excluding Institutional) stood at 9.4 percent in 2005-06 against 8.5 percent in 2000-01.

4.1.8 The average size of operational holding in Agriculture Census 2005-06 was 1.23 hectares against 1.33 hectares in 2000-01. The size relating to male and female operational holdings in 2005-06 was 1.25 hectares and 0.98 hectare against 1.35 hectares and 1.03

hectares respectively in 2000-01. The average operated area in 'all size-classes' had thus decreased in general in 2005-06 as compared to 2000-01.

4.1.9 The small and marginal holdings (below 2.00 ha.) constituted 83.29 percent in 2005-06 against 81.80 percent in 2000-1 having corresponding operated area as 41.14 percent and 38.86 percent. The semi-medium and medium operational holdings (2.00 ha. – 9.99 ha.) formed 15.86 percent with operated area of 47.04 percent in 2005-06 with respective figures of 17.17 percent and 47.93 percent in 2000-01. The large holdings (10.00 ha. & above) were only 0.85 percent of total number of holdings in 2005-06 with operated area of 11.82 percent as against 1.03 percent and 13.21 percent respectively in 2000-01.

Table 4.3: Percentage variation of number and area of operational holdings for All Social Groups in Agriculture Census 2005-06 over Agriculture Census 2000-01.

Note: *includes Institutional Holdings.

4.2 Tenancy of operational holdings

4.2.1 In Agriculture Census, operational holdings are categorized according to different tenurial characteristics. These categories are – (1) wholly owned and self-operated, (2) wholly leased-in, (3) wholly otherwise operated, (4) partly owned and partly leased in, (5) partly owned and partly otherwise operated, (6) partly leased in and partly otherwise operated and (7) partly owned, partly leased in and partly otherwise operated. The area 'otherwise operated' relates to area occupied and operated by the operational holder by encroachment or

through forcible occupation of Government/private land or land under litigation or land acquired by Government but being operated by the holder.

4.2.2 The distribution of number and area of operational holdings by Tenancy status according to major size groups of holdings for all social groups in 2005-06 may be seen in the Table 4.4 and Table 4.5 respectively. The above-mentioned last four categories of holdings have been clubbed and shown under 'Others' in these tables for analytical convenience.

Table 4.4: Distribution of number of operational holdings in India by Tenancy status in Major Size Classes for All Social Groups, 2005-06*

(Number in '000)

Sl. No.	Major size classes	Total number of holdings	Wholly owned & self operated	Wholly leased in	Wholly otherwise operated	Others
1	2	3	4	5	6	7
1	Marginal	64437 (100.00)	62463 (96.94)	245 (0.38)	188 (0.29)	1541 (2.39)
2	Small	18801 (100.00)	18201 (96.81)	53 (0.28)	29 (0.15)	519 (2.76)
3	Semi-medium	11238 (100.00)	11011 (97.98)	14 (0.12)	13 (0.11)	200 (1.78)
4	Medium	5352 (100.00)	5284 (98.73)	4 (0.07)	3 (0.05)	61 (1.15)
5	Large	1022 (100.00)	1004 (98.28)	1 (0.13)	0 (0.04)	16 (1.55)
	All Size Classes	100849 (100.00)	97963 (97.14)	317 (0.31)	232 (0.23)	2337 (2.32)

(1) Figures in brackets indicate percentages to total number of holdings. (2) * excluding Bihar, Jharkhand and Maharashtra where phase-II of Agriculture Census 2005-06 could not be conducted.

4.2.3 According to Table 4.4, wholly owned and self-operated holdings accounted for 97.14 percent. The wholly leased in holdings were only 0.31 percent while wholly otherwise operated holdings were at the minimum of 0.23 percent. The remaining categories of holdings shown under 'Others' represented 2.32 percent of the total number of operational holdings.

Table 4.5: Distribution of Area Operated by Tenancy status in India in Major size Classes for All Social Groups, 2005-06*

(Area in '000 ha.)

Sl. No.	Major size classes	Total operated area	Wholly owned & self operated area	Wholly leased in area	Wholly otherwise operated area	Others
1	2	3	4	5	6	7
1	Marginal	25912 (100.00)	24899 (96.09)	111 (0.43)	64 (0.25)	838 (3.23)
2	Small	26629 (100.00)	25741 (96.67)	73 (0.28)	40 (0.15)	774 (2.91)
3	Semi-medium	30633 (100.00)	30021 (98.00)	35 (0.12)	33 (0.11)	544 (1.78)
4	Medium	31193 (100.00)	30794 (98.72)	23 (0.07)	14 (0.05)	361 (1.16)

Sl. No.	Major size classes	Total operated area	Wholly owned & self operated area	Wholly leased in area	Wholly otherwise operated area	Others
5	Large	17700 (100.00)	17216 (97.27)	205 (1.16)	6 (0.03)	273 (1.54)
	All Size Classes	132067 (100.00)	128672 (97.43)	447 (0.34)	158 (0.12)	2790 (2.11)

(1) Figures in brackets indicate percentages to total number of holdings. (2) * excluding Bihar, Jharkhand and Maharashtra where phase-II of Agriculture Census 2005-06 could not be conducted.

4.2.4 From Table 4.5, it may be seen that while wholly owned and self-operated area was at the maximum of 97.43 percent, wholly leased-in area, wholly otherwise operated area and area under 'Others' formed only 0.34 percent, 0.12 percent and 2.11 percent respectively of the total operated area.

4.3 Terms of leasing

4.3.1 Area leased in is defined as the land taken on lease from others without any permanent right of possession for the lessee. Land may be leased in for (i) fixed money, (ii) fixed product, (iii) share of produce, (iv) usufructuary mortgage and (v) other terms. The distribution of leased-in area by terms of leasing for all social groups during Agriculture Census 2000-01 and 2005-06 may be seen in the Table 4.6.

Table 4.6: Distribution of leased-in area in India by Terms of leasing by Major Size Classes for All Social Groups during 2000-01* and 2005-06[#]

(Area in '000 ha.)

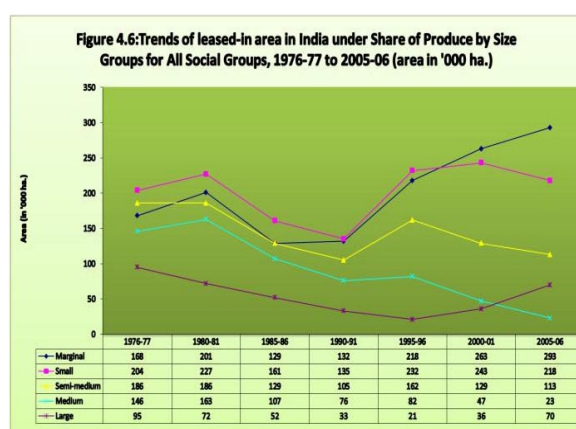

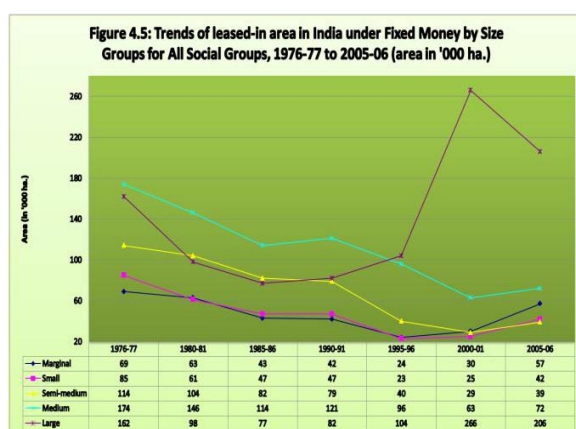

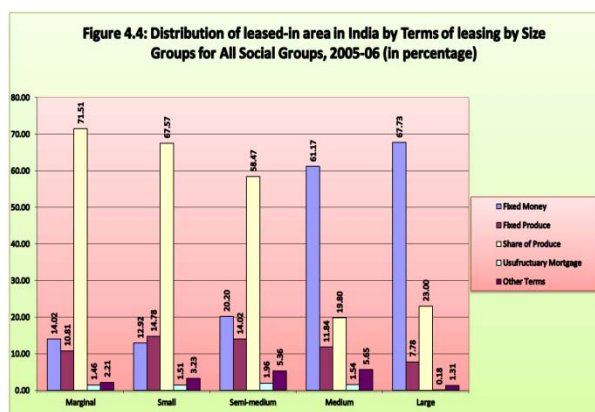

Sl. No.	Major size classes	Area leased-in for					
		Fixed money	Fixed produce	Share of produce	Usufructuary mortgage	Other Terms	Total
1	2	3	4	5	6	7	8
1	Marginal	57 (14.02)	44 (10.81)	293 (71.51)	6 (1.46)	9 (2.21)	409 (100.00)
2	Small	42 (12.92)	48 (14.78)	218 (67.57)	5 (1.51)	10 (3.23)	323 (100.00)
3	Semi-medium	39 (20.20)	27 (14.02)	113 (58.47)	4 (1.96)	10 (5.36)	193 (100.00)
4	Medium	72 (61.17)	14 (11.84)	23 (19.80)	2 (1.54)	7 (5.65)	117 (100.00)
5	Large	206 (67.73)	24 (7.78)	70 (23.00)	1 (0.18)	4 (1.31)	304 (100.00)
	2005-06 (All Size Classes)	416 (30.88)	157 (11.63)	717 (53.23)	17 (1.26)	40 (3.00)	1347 (100.00)
	2000-01 (All Size Classes)	413 (29.93)	146 (10.58)	719 (52.07)	30 (2.16)	73 (5.26)	1381 (100.00)

Note: (1) Figures in brackets are percentages to total area within each category. (2) * excluding Bihar, Jharkhand and Meghalaya. (3) # excluding Bihar, Jharkhand and Maharashtra.

4.3.2 Of the total leased-in area in 2005-06, the largest share of area was leased-in for share of produce, being 53.23 percent for all size classes followed by 30.88 percent for fixed

money and 11.63 percent for fixed produce. The area leased-in under usufructuary mortgage stood at 1.26 percent against 2.16 percent in 2000-01.

4.3.3 A graphical presentation of area under different terms of leasing in 2005-06; leased-in area under fixed money and leased-in area under share of produce, since 1976-77 are given in Figure 4.4, Figure 4.5 and Figure 4.6 respectively.

(B) Land use

4.4 Land Utilisation

4.4.1 The area under different types of land use during Agriculture Census years may be seen in Table 4.7.

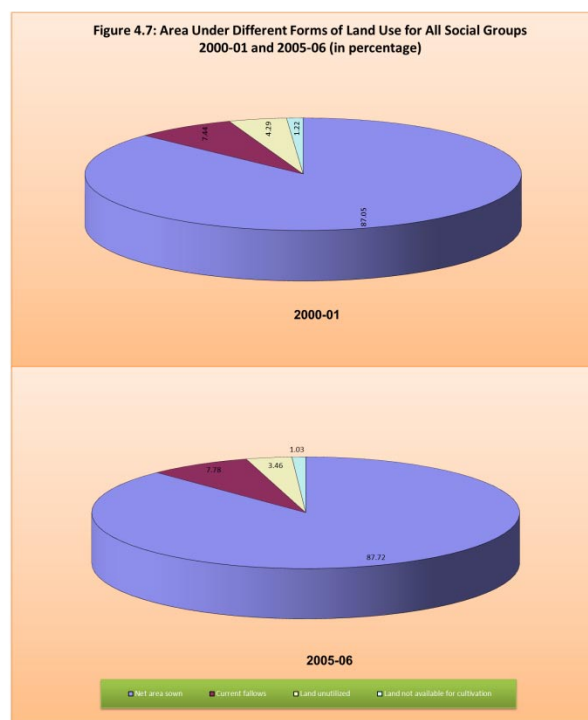

Table 4.7: Area under different forms of Land Use for All Social Groups during various Agriculture Census years

Sl. No.	Forms of land use	Area (in '000 hectare)							
		1970-71	1976-77	1980-81	1985-86	1990-91	1995-96	2000-01*	2005-06 [#]
1	2	3	4	5	6	7	8	9	9
1	Total operated area	162124 (100.00)	157555 (100.00)	163792 (100.00)	164529 (100.00)	165507 (100.00)	163355 (100.00)	152410 (100.00)	132067 (100.00)
2	Net area sown	135822 (83.80)	128544 (81.60)	136641 (83.40)	137428 (83.50)	140413 (84.80)	141062 (86.35)	132677 (87.05)	115855 (87.72)
3	Current fallows	9257 (5.70)	13316 (8.40)	11446 (7.00)	12594 (7.70)	12246 (7.40)	12070 (7.39)	11338 (7.44)	10271 (7.78)
4	Net cultivated area (2+3)	145079 (89.50)	141860 (90.00)	148087 (90.40)	150022 (91.20)	152659 (92.20)	153132 (93.74)	144015 (94.49)	126126 (95.50)
5	Land unutilized	12380 (7.70)	11786 (7.50)	11245 (6.90)	11166 (6.80)	9916 (6.00)	7734 (4.73)	6533 (4.29)	4574 (3.46)
6	Land not available for cultivation	4603 (2.80)	3907 (2.50)	4460 (2.70)	3341 (2.00)	2932 (1.80)	2487 (1.52)	1862 (1.22)	1367 (1.03)

Note: (1) Figures in brackets are percentages to total operated area. (2) * excluding Bihar, Jharkhand and Meghalaya. (3) # excluding Bihar, Jharkhand and Maharashtra.

4.4.2 A graphical comparison of area under different forms of land use between Agriculture Census 2000-01 and 2005-06 may be seen in Figure 4.7.

4.4.3 The total operated area has been decreasing gradually after 1990-91 because of diversion of land for urbanisation; industrialisation or transfer of land to meet the increasing requirement for non-agricultural purposes, like, housing projects, infrastructure development etc. Further, it is observed that the percentage of net area sown over last three census periods has remained

more or less constant (about 87.0 per cent of the operated area). The net cultivated area increased from 89.5 per cent during 1970-71 to 95.5 per cent during 2005-06, whereas land unutilized and land not available for cultivation declined from 7.70 percent to 3.46 percent and 2.80 percent to 1.03 percent respectively during the same period.

(C) Irrigation

4.5 Irrigation Status

4.5.1 The availability of irrigation is reflected by percentage of irrigated area to net area sown, which is given in Table 4.8.

Table 4.8: Distribution of Net Irrigated Area and Net Area Sown by Major Size Classes of Holdings for All Social Groups during Agriculture Census 2000-01* and 2005-06#.

(Area in '000 ha.)

Sl. No.	Major size classes of holdings	Net Irrigated Area		Net Sown Area		Percentage of Irrigated Area to Net Area Sown	
		2000-01	2005-06	2000-01	2005-06	2000-01	2005-06
1	2	3	4	3	4	5	6
1	Marginal	12384	13552	24266	23557	51.04	57.53
2	Small	10891	11403	27854	24314	39.10	46.90
3	Semi-medium	11933	12396	32608	27682	36.60	44.78
4	Medium	11547	11982	32019	26838	36.06	44.64
5	Large	4871	4937	15929	13464	30.58	36.67
	All Size Classes	51626	54270	132677	115855	38.91	46.84

Note: (1) * excluding Bihar, Jharkhand and Meghalaya. (2) # excluding Bihar, Jharkhand and Maharashtra.

4.5.2 The proportion of irrigated area to net area sown for all categories of holdings was 46.84 percent in 2005-06 as compared to 38.91 percent in 2000-01. This indicates that

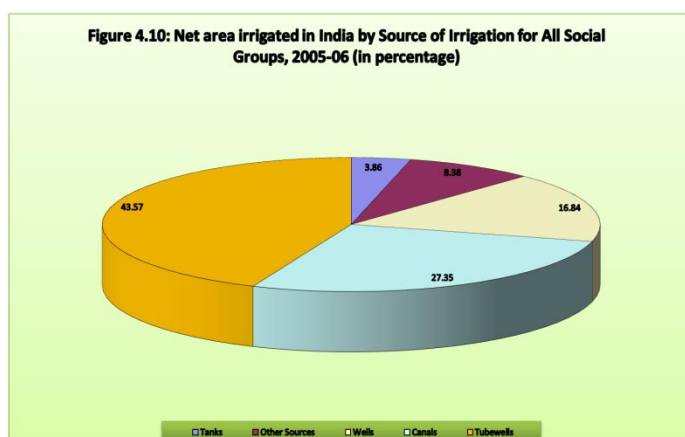

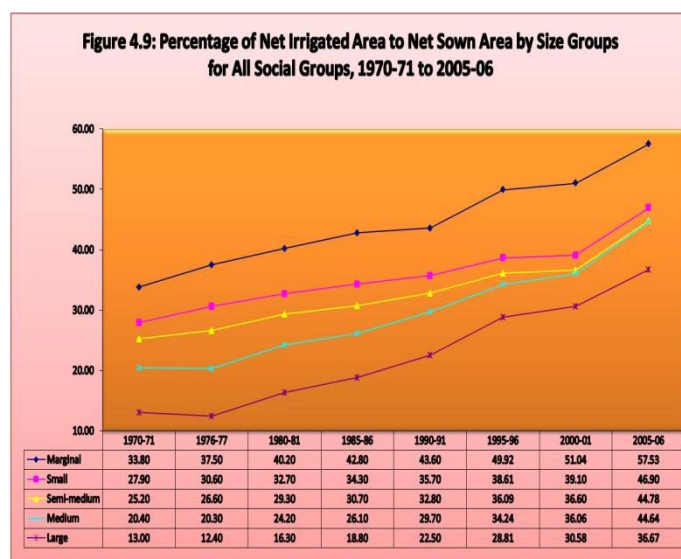

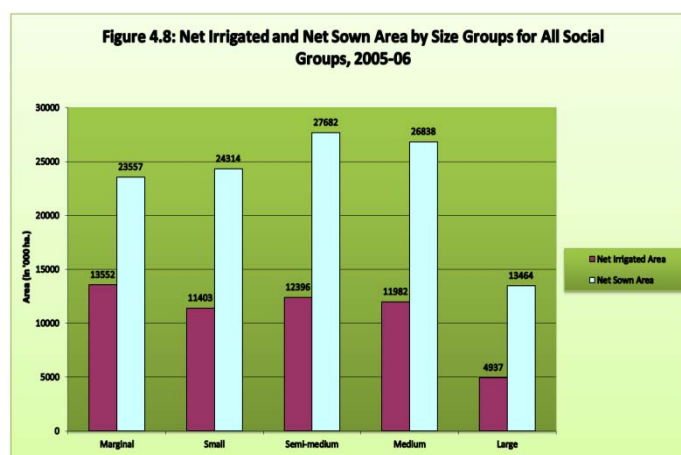

irrigation facilities have improved during two census periods. The percentage of irrigated area to net area sown had decreased as size of holdings increased in both Agriculture Census 2000-01 and 2005-06.

4.5.3 The graphical presentations of net irrigated area and net sown area in 2005-06 and percentage of net irrigated area to net sown area since 1970-71 may be seen in Figure 4.8 and Figure 4.9 respectively.

4.6 Source wise Classification of Irrigated Holdings and Net Irrigated Area

4.6.1 As earlier, this census also has details about net area irrigated by different sources of irrigation like canals, tanks, wells, tubewells and other sources. In case some area is irrigated during the year by more than one source, such area is recorded only against the major source of irrigation. The net area irrigated by different sources of irrigation is added to arrive

at net irrigated area. The distribution of source-wise irrigated holdings and net irrigated area

for all social groups during Agriculture Census 2000-01 and 2005-06 is given in Table 4.9. The graphical presentation of proportions of net irrigated area by source of irrigation may be seen in Figure 4.10. During 2005-06, maximum proportion of holdings received irrigation from tube wells (39.02 percent) followed by canals (24.68 percent), wells (16.80 percent) and tanks (6.50 percent). Other sources accounted for 13.00 percent. Similarly, maximum proportion of

area was irrigated by tube wells (43.57 percent) followed by canals (27.35 percent), wells (16.84 percent) and tanks (3.86 percent). The remaining 8.38 percent of area was accounted for by other sources.

Table 4.9: Distribution of Source-wise Irrigated Holdings and Net Irrigated Area for All Social Groups during Agriculture Census, 2000-01* and 2005-06[#].

(Number in '000)

(Area in '000 ha.)

Sl. No.	Sources of Irrigation	2000-01		2005-06	
		Number of holdings**	Net Irrigated Area	Number of holdings**	Net Irrigated Area
1	2	3	4	5	6
1	Canals	13656 (24.97)	14578 (28.24)	15703 (24.68)	14842 (27.35)
2	Tanks	4227 (7.73)	2258 (4.37)	4133 (6.50)	2097 (3.86)
3	Wells	9688 (17.71)	9231 (17.88)	10691 (16.80)	9139 (16.84)
4	Tubewells	20399 (37.29)	20711 (40.12)	24825 (39.02)	23643 (43.57)
5	Other Sources	6727 (12.30)	4849 (9.39)	8268 (13.00)	4548 (8.38)
	All Sources	54696 (100.00)	51626 (100.00)	63619 (100.00)	54270 (100.00)

Note: (1) * excluding Bihar, Jharkhand and Meghalaya. (2) # excluding Bihar, Jharkhand and Maharashtra. (3) ** This includes holdings irrigated by more than one source. However, the respective exclusive number of irrigated holdings was only 52.6 million and 55.9 million during 2000-01 and 2005-06. (4) The figures in brackets are percentages.

4.7 Dispersal of operated Area

4.7.1 A cultivator residing in a village and cultivating some land within the same tehsil/block is called a resident cultivator of that village. A resident cultivator may, therefore, have either (i) entire area of his holdings locating in village of his residence; or (ii) partly within the village of residence and partly outside; or (iii) entirely outside the village of residence. The information on such characteristics, i.e. dispersal of number and area of operational holdings for all social groups during 2000-01 and 2005-06 may be seen in the Table 4.10. About 96.0 percent of the operational holdings were located within the village of residence against the operated area of 94.47 percent during Agriculture Census 2005-06. About 2.5 percent of the holdings with the operated area of 3.5 percent were located partly within the village and partly outside the village of residence within the same tehsil. About 1.8 percent of holdings and almost equal proportion of operated area were located entirely outside the village of residence but within Tehsil. Only, 0.12 percent of holdings and 0.18 percent of operated area were accounted for by deemed cultivators i.e. those operational

holders who were residing outside Tehsil but operating land in one or more village(s) of the Tehsil.

Table 4.10: Number and area of operational holdings by Dispersal of operated area for All Social Groups, 2000-01* and 2005-06#.

(Number in '000)

(Area in '000 ha.)

Sl. No.	Item	Number		Area	
		2000-01	2005-06	2000-01	2005-06
1	2	3	4	5	6
1	Entirely within the village of residence	102495 (94.78)	96448 (95.64)	142337 (93.39)	124769 (94.47)
2	Partly within the village & partly outside the village(s) of residence within the same tehsil	3047 (2.82)	2474 (2.45)	6487 (4.26)	4643 (3.52)
3	Entirely outside the village of residence but within the same tehsil	2428 (2.25)	1808 (1.79)	3303 (2.17)	2421 (1.83)
4	Operational holder residing outside the tehsil	173 (0.16)	120 (0.12)	282 (0.19)	234 (0.18)
5	Total	108143 (100.00)	100849 (100.00)	152410 (100.00)	132067 (100.00)

Note: (1) * excluding Bihar, Jharkhand and Meghalaya. (2) # excluding Bihar, Jharkhand and Maharashtra. (3) Figures in brackets indicate percentages.

(D) Cropping Pattern, Cropping Intensity and Irrigation Intensity

4.8 Area under Principal Crops

4.8.1 The details of area under principal crops, both irrigated and un-irrigated for all social groups, in 2005-06 is given in Table 4.11.

Table 4.11: Area under Principal Crops for All Social Groups, 2000-01* and 2005-06#.

(Area in '000 ha.)

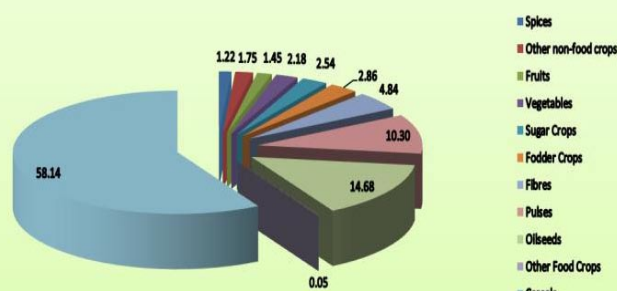

Sl. No.	Item	Irrigated Area		Unirrigated Area		Total Area

20	All non-food crops (16+17+18+19)	9924 (14.33)	12988 (17.70)	29991 (30.64)	23825 (30.07)	39915 (23.88)	36813 (24.12)
21	Gross Cropped Area (15+20)	69238 (100.00)	73377 (100.00)	97885 (100.00)	79232 (100.00)	167123 (100.00)	152609 (100.00)
22	Net Area Sown	51626 (74.56)	54270 (73.96)	81051 (82.80)	61586 (77.73)	132677 (79.39)	115855 (75.92)
23	Intensity of Cropping (21/22)	1.3411	1.3521	-	-	1.2596	1.3172

Note: (1) * excluding Bihar, Jharkhand and Meghalaya. (2) # excluding Bihar, Jharkhand and Maharashtra. (3) Figures in brackets indicate percentages to Gross Cropped Area.

4.8.2 During 2005-06, gross cropped area was estimated at 152.61 million hectares, excluding data from Bihar, Jharkhand and Maharashtra where Agriculture Census could not be conducted. The net sown area was estimated at 115.86 million hectares. Thus the cropping intensity during 2005-06 stood at 1.3172 against 1.2596 in 2000-01. The irrigation intensity which is the ratio of gross irrigated area to net irrigated area worked out to 1.3521 in 2005-06 against 1.3411 in 2000-01.

Figure 4.11: Distribution of Area under Principal Crops in India for All Social Groups, 2005-06 (in percentage)

4.8.3 As per table 4.11, cereals formed 58.1 percent of gross cropped area in 2005-06 while 'all food crops' consisting of cereals, pulses, sugarcane, spices, fruits & vegetables, accounted for 75.9 percent. The remaining gross cropped area was accounted by non-food crops, like, oilseeds, fibres, fodder crops and other non-food crops. Among non-food crops, oilseeds had the highest contribution of 14.7 percent.

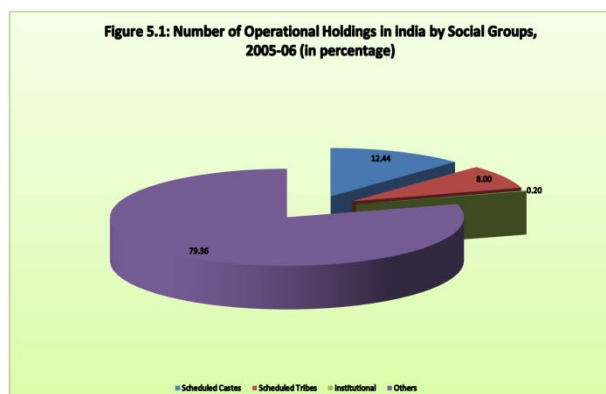

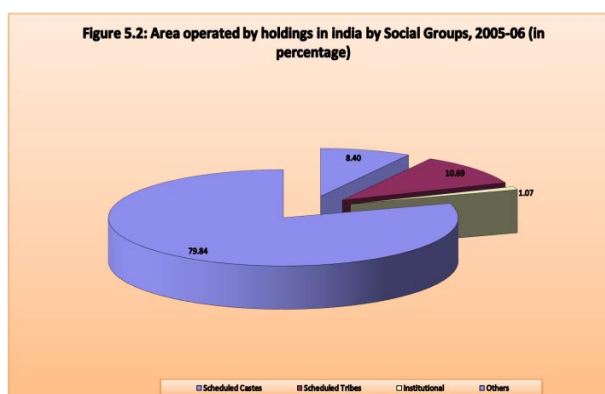

CHAPTER 5

AGRICULTURE CENSUS RESULTS- ALL INDIA SCHEDULED CASTES AND SCHEDULED TRIBES

(A) OPERATIONAL HOLDINGS

5.1 Distribution of Operational Holdings

5.1.1 The information on characteristics of agricultural operational holdings of Scheduled Castes and Scheduled Tribes was collected separately for the first time during Agriculture Census, 1980-81 to facilitate policy decisions for welfare of

these social groups. The number of operational holdings and area operated by various social groups in 2000-01 and 2005-06 are presented in Table 5.1. The graphical presentation may be seen in Figure 5.1 and Figure 5.2 respectively.

Table 5.1: Number of Operational Holdings and Area Operated by Social Groups, 2000-01 and 2005-06

Sl. No.	Social Groups	Number of Holdings (in '000)		Percentage variation in 2005-06 over 2000-01	Area Operated (in '000 ha.)		Percentage variation in 2005-06 over 2000-01
		2000-01*	2005-06*		2000-01*	2005-06*	
1	2	3	4	5	6	7	8
1	Scheduled Castes	15140 (12.62)	16073 (12.44)	6.16	13077 (8.20)	13300 (8.40)	1.71
2	Scheduled Tribes	9404 (7.84)	10343 (8.00)	9.98	16525 (10.36)	16929 (10.69)	2.45
3	Others	95114 (79.31)	102550 (79.36)	7.82	128027 (80.30)	126399 (79.84)	-1.27
4	Institutional	272 (0.23)	256 (0.20)	-6.03	1807 (1.13)	1694 (1.07)	-6.22
5	All Social Groups	119931 (100.00)	129222 (100.00)	7.75	159436 (100.00)	158323 (100.00)	-0.70

Note: (1) * excluding Jharkhand. (2) Figures in brackets indicate percentages.

5.1.2 The holdings operated by Scheduled Castes accounted for 12.44 percent of the total number of holdings in the country in 2005-06 as against 12.62 percent in 2000-01. There was an increase of about 6.2 percent in number of holdings while the area operated by Scheduled

Castes holdings in 2005-06 increased moderately by 1.7 percent over 2000-01. Scheduled Tribes holdings formed almost 8.0 percent of total holdings in 2005-06 as well as in 2000-01. However, the number of holdings in 2005-06 over 2000-01 has increased by 10.0 percent. The proportion of operated area to the total operated area in the country remained static over 10.0 percent during 2000-01 and 2005-06. The operated area held by Scheduled Tribes has increased in similar way in 2005-06 over 2000-01 by 2.45 percent like that of Scheduled Castes. In the case of 'Other' Social Group, there was no change in the proportions of number of holdings in 2000-01 and 2005-06 which stood at 79.3 percent. The operated area stood also at the same level of about 80 percent in both these years.

5.1.3 The number and area of operational holdings by size-classes and gender, and percentage distribution in Agriculture Census 2005-06 and 2000-01 for Scheduled Castes holdings may be seen in Table 5.2 and Table 5.3 respectively with graphical presentation in Figure 5.3, Figure 5.4 and Figure 5.5 respectively.

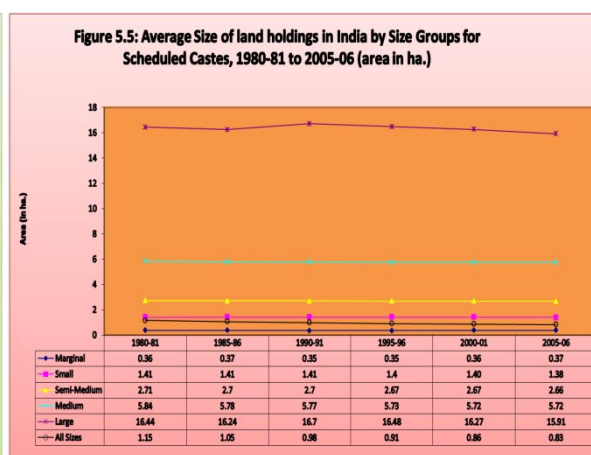

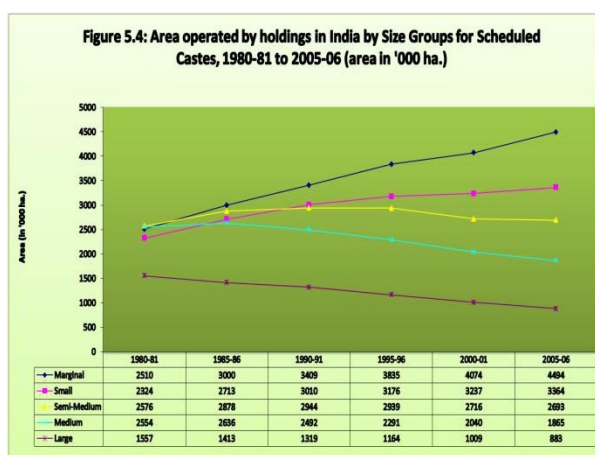

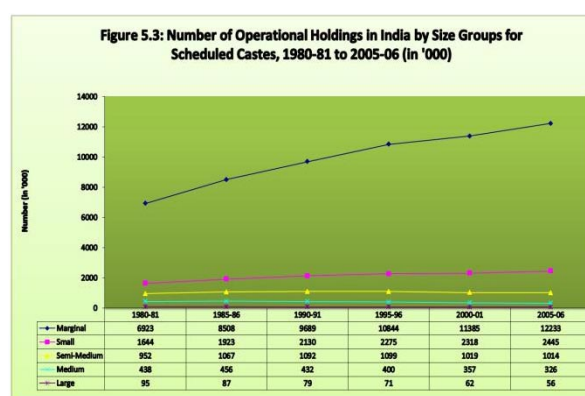

Table 5.2: Number of operational holdings and area operated by size-classes and gender for Scheduled Castes during Agriculture Census 2005-06

Sl. No.	Size Class (in Ha.)	Number			Area		
		Male	Female	Total	Male	Female	Total
1	2	3	4	5	6	7	8
	Large	0.37 (0.43)	0.18 (0.19)	0.35 (0.41)	6.91 (8.02)	3.95 (4.30)	6.64 (7.72)
11	All Classes	100.00 (100.00)	100.00 (100.00)	100.00 (100.00)	100.00 (100.00)	100.00 (100.00)	100.00 (100.00)

Note: (1) Total may not tally due to rounding off. (2) Figures in brackets relate to Agriculture Census 2000-01.

5.1.4 In a total of 16.07 million holdings belonging to Scheduled Caste holders in 2005-06, male operational holdings accounted for 89.14 percent while females for 10.86 percent against 90.2 percent and 9.8 percent respectively in 2000-01. Thus the shares of holdings operated by females were quite low as compared to the share of male operational holdings. It is noteworthy, however, that representation of holdings belonging to females has increased from 9.8 percent in 2000-01 to 10.86 percent in 2005-06.

5.1.5 Area operated by female holders accounted for 9.1 percent in 2005-06 against 8.1 percent in 2000-01.

5.1.6 The average operated area by Scheduled Caste holders in Agriculture Census 2005-06 was 0.83 hectare against 0.86 hectare in 2000-01. The operated area for male and female operational holdings in 2005-06 was 0.84 hectare and 0.69 hectare respectively as compared to 0.88 hectare and 0.71 hectare in 2000-01.

5.1.7 Out of a total of 16.07 million of operational holdings of Scheduled Castes in 2005-06, marginal holdings constituted (76.1 percent), small (15.2 percent), semi-medium (6.3 percent), medium (2.0 percent) and large (0.4 percent). It can be seen that percentage of operational holdings decreased with the increase in size of holdings (Table 5.3) and bulk of operational holdings in case of Scheduled Castes belonged to marginal and small categories i.e. 91.3 percent together.

5.1.8 Out of a total of 13.30 million hectares of area operated by Scheduled Castes, over 1/3rd belonged to the marginal category, as against their representation of 76.1 percent in number of holdings in that category (marginal). The percentages of operated area belonging to small, semi-medium, medium and large holdings were 25.3, 20.3, 14.0 and 6.6 respectively.

5.1.9 Number and area of operational holdings by size-classes and gender and percentage distribution in Agriculture Census 2005-06 for holdings of Scheduled Tribes may be seen in

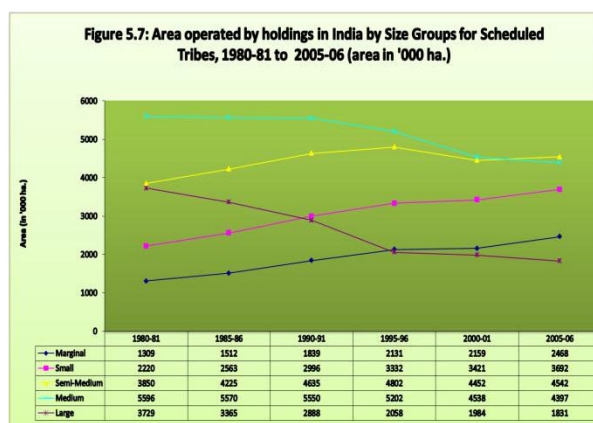

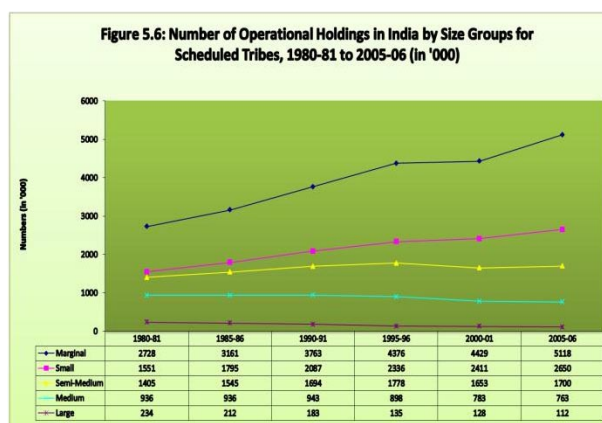

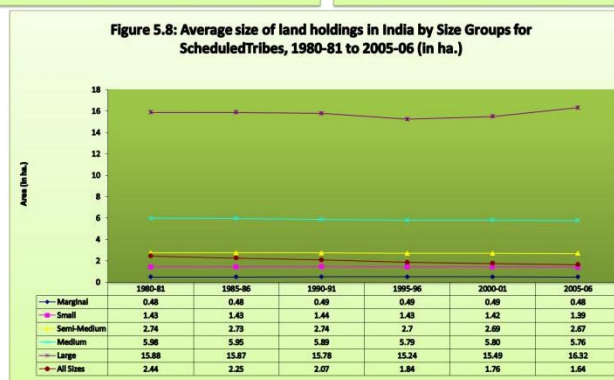

Table 5.4 and Table 5.5 respectively. The presentation of area operated and holdings in 2005-06 may be seen in Figure 5.6, Figure 5.7 and Figure 5.8

5.5 respectively. The presentation of area operated and holdings in 2005-06 may be seen in Figure 5.6, Figure 5.7 and Figure 5.8

Table 5.4: Number of operational holdings and area operated by size-classes and gender for Scheduled Tribes during Agriculture Census 2005-06

	Large	1.12 (1.41)	0.77 (0.91)	1.08 (1.36)	11.06 (12.08)	8.15 (8.87)	10.81 (11.83)
11	All Classes	100.00 (100.00)	100.00 (100.00)	100.00 (100.00)	100.00 (100.00)	100.00 (100.00)	100.00 (100.00)

Note: (1) Total may not tally due to rounding off. (2) Figures in brackets relate to Agriculture Census 2000-01.

5.1.10 As per Table 5.4, total number of Scheduled Tribes operational holdings increased from 9.40 million in 2000-01 to 10.34 million in 2005-06, showing an increase of 10.0 percent. Out of 10.34 million Scheduled Tribes operational holdings, males, accounted for 90.4 percent and females constituted 9.6 percent. Thus, the percentage of female operational holdings was quite low as compared to male operational holdings for Scheduled Tribes.

5.1.11 The area operated by Scheduled Tribes which was 16.53 million hectares in 2000-01 rose to 16.93 million hectares in 2005-06, showing an increase of 2.44 percent. The area operated by females accounted for 8.5 percent whereas the same was 91.5 percent for male holders against the corresponding figures of 7.7 percent and 92.3 percent in 2000-01.

5.1.12 The average operated area in 2005-06 was 1.64 hectares against 1.76 hectares in 2000-01. The same for male and female operational holdings was 1.66 hectares and 1.45 hectares as compared to 1.78 hectares and 1.53 hectares in 2000-01 respectively, indicating a decline in average operated area of both male and female operational holdings in 2005-06 as compared to 2000-01.

5.1.13 It may be seen from Table 5.5 that out of a total of 10.34 million Scheduled Tribes operational holdings in 2005-06, marginal holdings accounted for (49.5 percent) followed by small (25.6 percent), semi-medium (16.4 percent), medium (7.4 percent) and large (1.1 percent). The number of operational holdings decreased with the increase in the size of holdings.

5.1.14 Out of a total of 16.93 million hectares of operated area, only 36.4 percent was held by marginal and small holdings, against their representation of 75 percent in total number of operational holdings.

5.2 Tenancy of operational holdings

5.2.1 The distribution of number of operational holdings and area operated by Scheduled Castes in India by tenancy status for major size classes, 2005-06 is given in Table 5.6 and Table 5.7 respectively.

Table 5.6: Distribution of number of operational holdings by Tenancy status in Major Size Classes for Scheduled Castes, 2005-06*

(Number in '000)

Sl. No.	Major size classes	Total number of holdings	Wholly owned & self-operated	Wholly leased in	Wholly otherwise operated	Others
1	2	3	4	5	6	7

5	Large	851 (100.00)	834 (98.02)	1 (0.15)	Neg (0.02)	15 (1.81)
All Size Classes		11515 (100.00)	10977 (95.33)	76 (0.66)	20 (0.18)	442 (3.83)

Note: (1) Figures in brackets indicate percentages to total number of holdings. (2) Neg - Negligible (i.e. less than 500). (3) * excluding Bihar, Jharkhand and Maharashtra.

5.2.2 The distribution of number of operational holdings and area operated by Scheduled Tribes by Tenancy status for major size classes, 2005-06 may be seen in Table 5.8 and Table 5.9 respectively.

Table 5.8: Distribution of number of operational holdings by Tenancy status in Major Size Classes for Scheduled Tribes, 2005-06*

(Number in '000)

Sl. No.	Major size classes	Total number of holdings	Wholly owned & self-operated	Wholly leased in	Wholly otherwise operated	Others
1	2	3	4	5	6	7
1	Marginal	4643 (100.00)	4374 (94.19)	28 (0.61)	62 (1.33)	180 (3.87)
2	Small	2333 (100.00)	2202 (94.39)	7 (0.30)	13 (0.57)	111 (4.74)
3	Semi-medium	1500 (100.00)	1440 (96.00)	2 (0.11)	5 (0.31)	54 (3.58)
4	Medium	690 (100.00)	673 (97.58)	Neg (0.04)	1 (0.07)	16 (2.31)
5	Large	107 (100.00)	105 (98.15)	Neg (0.05)	Neg (0.01)	2 (1.79)
All Size Classes		9273 (100.00)	8794 (94.83)	37 (0.40)	80 (0.86)	362 (3.90)

Note: (1) Figures in brackets indicate percentages to total number of holdings. (2) Neg - Negligible (i.e. less than 500). (3) * excluding Bihar, Jharkhand and Maharashtra.

Table 5.9: Distribution of Area Operated by Tenancy status in each Major Size Classes for Scheduled Tribes, 2005-06*

(Area in '000 ha.)

Sl. No.	Major size classes	Total operated area	Wholly owned & self-operated area	Wholly leased in area	Wholly otherwise operated area	Others
1	2	3	4	5	6	7
1	Marginal	2247 (100.00)	2098 (93.38)	13 (0.60)	28 (1.23)	108 (4.79)

Sl. No.	Major size classes	Total operated area	Wholly owned & self-operated area	Wholly leased in area	Wholly otherwise operated area	Others
1	2	3	4	5	6	7
2	Small	3276 (100.00)	3089 (94.27)	10 (0.30)	18 (0.56)	160 (4.87)
3	Semi-medium	4032 (100.00)	3869 (95.97)	4 (0.10)	12 (0.30)	146 (3.63)
4	Medium	3990 (100.00)	3895 (97.63)	1 (0.04)	3 (0.07)	91 (2.27)
5	Large	1756 (100.00)	1723 (98.15)	1 (0.08)	Neg (0.01)	31 (1.76)
All Size Classes		15301 (100.00)	14675 (95.91)	30 (0.20)	61 (0.40)	535 (3.50)

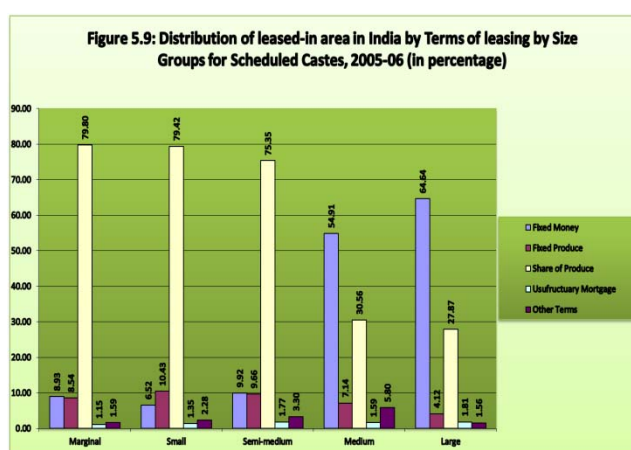

Note: (1) Figures in brackets indicate percentages to total number of holdings. (2) Neg - Negligible (i.e. less than 500). (3) * excluding Bihar, Jharkhand and Maharashtra.

5.2.3 In case of Scheduled Castes, wholly owned and self-operated holdings accounted for about 95.0 percent in term of number with almost equal percentage of area (95.3 percent). The wholly leased-in operational holdings had a proportion of 0.84 percent covering 0.66 percent of area. The wholly otherwise operational holdings were 0.35 percent having an operated area of 0.18 percent. The remaining four types of operational holdings, viz. partly owned, partly leased-in and partly otherwise operated holdings etc. categorized under 'Others', were to the extent of 3.94 percent of the total Scheduled Castes holdings operating almost equal proportion of area at about 3.83 percent.

5.2.4 Among holdings of Scheduled Tribes, 94.8 percent of number of operational holdings were wholly owned and self-operated accounting for an area of 95.9 percent. The wholly leased-in holdings accounted for 0.4 percent operating an area of 0.2 percent. The wholly otherwise operational holdings accounted for 0.86 percent with corresponding area of 0.4 percent while 'Others' accounted for 3.9 percent with an area of 3.5 percent. This indicates that about 95 percent of the holdings in 2005-06 were owned and self-operated in the case of both Scheduled Castes and Scheduled Tribes.

5.3 Terms of Leasing

5.3.1 The distribution of area leased-in by terms of leasing in major size classes of holdings of Scheduled Castes and Scheduled Tribes in 2005-06 may be seen in Table 5.10 and Table 5.11 respectively.

The graphical presentation of leased-in area by different terms of leasing may also be seen for these social groups in Figure 5.9 and Figure 5.10 respectively.

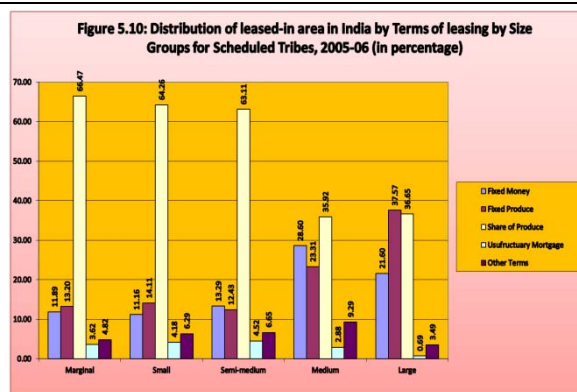

Table 5.10: Distribution of leased-in area by Terms of leasing by Major Size Classes for Scheduled Castes, 2005-06

(Area in '000 ha.)

Sl. No.	Major size classes	Area leased-in for					Total
		Fixed money	Fixed produce	Share of produce	Usufructuary mortgage	Other Terms	
1	2	3	4	5	6	7	8
1	Marginal	12 (8.93)	11 (8.54)	104 (79.80)	1 (1.15)	2 (1.59)	130 (100.00)
2	Small	5 (6.52)	8 (10.43)	62 (79.42)	1 (1.35)	2 (2.28)	79 (100.00)
3	Semi-medium	3 (9.92)	3 (9.66)	26 (75.35)	1 (1.77)	1 (3.30)	35 (100.00)
4	Medium	7 (54.91)	1 (7.14)	4 (30.56)	Neg (1.59)	1 (5.80)	12 (100.00)
5	Large	6 (64.64)	Neg (4.12)	2 (27.87)	Neg (1.81)	Neg (1.56)	9 (100.00)
2005-06 [#] (All Size Classes)		32 (12.25)	24 (9.04)	199 (75.16)	4 (1.34)	6 (2.21)	264 (100.00)
2000-01* (All Size Classes)		23 (9.47)	29 (11.83)	172 (70.84)	6 (2.40)	13 (5.46)	242 (100.00)

Note: (1) Figures in brackets are percentages to total area within each category. (2) [#] excluding Bihar, Jharkhand and Maharashtra. (3) * excluding Bihar, Jharkhand and Meghalaya.

Table 5.11: Distribution of leased-in area by Terms of leasing by Major Size Classes for Scheduled Tribes, 2005-06

(Area in '000 ha.)

Sl. No.	Major size classes	Area leased-in for					Total
		Fixed money	Fixed produce	Share of produce	Usufructuary mortgage	Other Terms	
1	2	3	4	5	6	7	8
1	Marginal	4 (11.89)	5 (13.20)	25 (66.47)	1 (3.62)	2 (4.82)	37 (100.00)
2	Small	4 (11.16)	5 (14.11)	23 (64.26)	1 (4.18)	2 (6.29)	35 (100.00)
3	Semi-medium	3 (13.29)	3 (12.43)	15 (63.11)	1 (4.52)	2 (6.65)	23 (100.00)
4	Medium	3 (28.60)	2 (23.31)	3 (35.92)	Neg (2.88)	1 (9.29)	9 (100.00)
5	Large	1 (21.60)	1 (37.57)	1 (36.65)	Neg (0.69)	Neg (3.49)	4 (100.00)
2005-06 [#] (All Size Classes)		15 (13.65)	16 (14.99)	67 (61.52)	4 (3.83)	7 (6.01)	109 (100.00)
2000-01* (All Size Classes)		15 (13.45)	17 (14.72)	64 (56.94)	7 (6.32)	10 (8.56)	113 (100.00)

Note: (1) Figures in brackets are percentages to total area within each category. (2) [#] excluding Bihar, Jharkhand and Maharashtra. (3) * excluding Bihar, Jharkhand and Meghalaya.

5.3.2 The distribution of leased-in area according to different terms of leasing as per 2005-06 showed that the highest proportion of leased-in area was accounted for by 'share of produce' both in case of holdings of Scheduled Castes (75.16 percent) and Scheduled Tribes (61.52 percent). This was followed by fixed money (12.25 percent), fixed produce (9.04 percent), 'other terms' (2.21 percent) and usufructuary mortgage (1.34 percent) in the case of Scheduled Castes holdings. For holdings of Scheduled Tribes, share of produce was followed by fixed produce (14.99 percent), fixed money (13.65 percent), 'other terms' (6.01 percent) and usufructuary mortgage (3.83 percent).

(B) Land Use

5.4 Land Utilisation

5.4.1 The distributions of area under different land uses in all size classes for holdings of Scheduled Castes and Scheduled Tribes in 2000-01 and 2005-06 are given in Table 5.12.

Table 5.12: Area under Main Land Uses to the Total Operated Area for Scheduled Castes and Scheduled Tribes, 2000-01 and 2005-06

(Area in '000 ha.)

Sl. No.	Particulars	Area under							
		Land not available for cultivation		Net cultivated area*		Land unutilized**		Total Area	
		2000-01 [#]	2005-06 ^{\$}	2000-01 [#]	2005-06 ^{\$}	2000-01 [#]	2005-06 ^{\$}	2000-01 [#]	2005-06 ^{\$}
1	2	3	4	5	6	7	8	9	10
1	All Size Classes - Scheduled Castes	119 (0.94)	100 (0.86)	12028 (95.03)	11046 (95.93)	510 (4.03)	369 (3.21)	12657 (100.00)	11515 (100.00)
2	All Size Classes - Scheduled Tribes	349 (2.16)	318 (2.08)	14497 (89.61)	13814 (90.28)	1332 (8.23)	1170 (7.65)	16178 (100.00)	15301 (100.00)

Note: (1) Figures in brackets are percentages. (2) * Net cultivated area is net area sown plus area under current fallow. (3) ** Land unutilized is fallow land other than current fallow plus cultivable waste lands plus other uncultivated land. (4) # excluding Bihar, Jharkhand and Meghalaya. (5) \$ excluding Bihar, Jharkhand and Maharashtra.

5.4.2 The proportion of net cultivated area to total operated area in case of Scheduled Castes holdings had increased marginally from 95.0 percent in 2000-01 to about 96.0 percent during 2005-06. The proportion of land not available for cultivation decreased from 0.94 percent in 2000-01 to 0.86 percent in 2005-06. Similarly, the component of land unutilized decreased from 4.03 percent in 2000-01 to 3.21 percent in 2005-06.

5.4.3 The net cultivated area for Scheduled Tribes holdings, as a percentage of total operated area increased from 89.6 percent during 2000-01 to 90.3 percent during 2005-06. The land not available for cultivation formed 2.1 percent of the total operated area whereas the land unutilized was 7.7 percent during Agriculture Census 2005-06.

(C) IRRIGATION

5.5 Irrigation Status

5.5.1 The distribution of net irrigated area and net sown area for holdings of Scheduled Castes and Scheduled Tribes by major size classes in 2000-01 and 2005-06 may be seen in Table 5.14 and Table 5.15 respectively. The graphical presentations of percentage of net irrigated area to net sown area in 2000-01 and 2005-06 for major size-groups are given in respective Figure 5.11 and Figure 5.12 separately for these social groups.

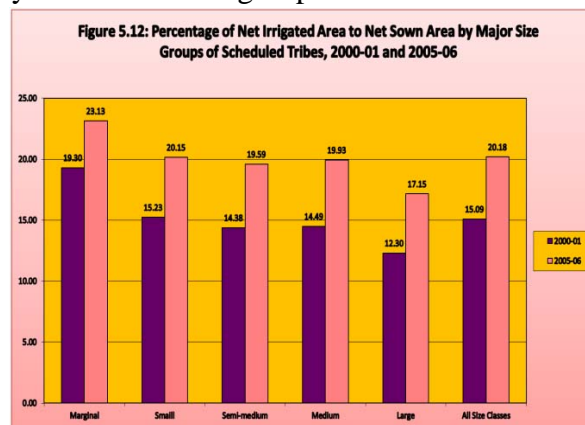

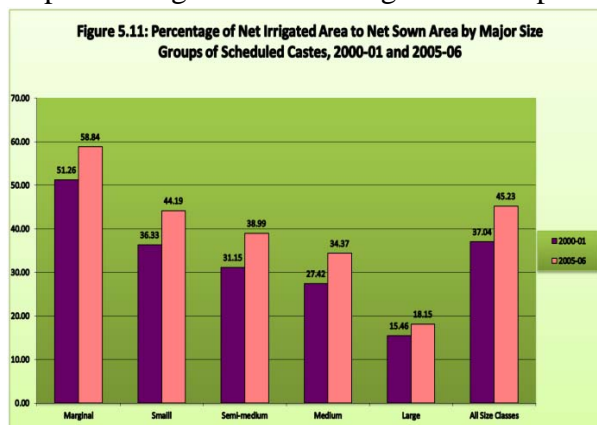

Table 5.13: Distribution of Net Irrigated Area and Net Area Sown by Major Size Classes of Holdings for Scheduled Castes during Agriculture Census 2000-01* and 2005-06**

(Area in '000 ha.)

Sl. No.	Major size classes	Net Irrigated Area		Net Sown Area		Percentage of Irrigated Area to Net Area Sown	
		2000-01	2005-06	2000-01	2005-06	2000-01	2005-06
1	2	3	4	5	6	7	8
1	Marginal	1732	2036	3379	3459	51.26	58.84
2	Small	1023	1139	2817	2577	36.33	44.19
3	Semi-medium	729	791	2342	2028	31.15	38.99
4	Medium	462	481	1685	1399	27.42	34.37
5	Large	115	111	742	612	15.46	18.15
	All Size Classes	4062	4557	10965	10076	37.04	45.23

Note: (1) * excluding Bihar, Jharkhand and Meghalaya. (2) ** excluding Bihar, Jharkhand and Maharashtra.

Table 5.14: Distribution of Net Irrigated Area and Net Area Sown by Major Size Classes of Holdings for Scheduled Tribes during Agriculture Census 2000-01* and 2005-06**

(Area in '000 ha.)

Sl. No.	Major size classes	Net Irrigated Area		Net Sown Area		Percentage of Irrigated Area to Net Area Sown	
		2000-01	2005-06	2000-01	2005-06	2000-01	2005-06
1	2	3	4	5	6	7	8
1	Marginal	365	479	1892	2069	19.30	23.13
2	Small	460	603	3018	2994	15.23	20.15
3	Semi-medium	553	703	3843	3589	14.38	19.59
4	Medium	524	634	3620	3181	14.49	19.93
5	Large	150	175	1217	1020	12.30	17.15
	All Size Classes	2051	2594	13590	12853	15.09	20.18

Note: (1) * excluding Bihar, Jharkhand and Meghalaya. (2) ** excluding Bihar, Jharkhand and Maharashtra.

5.5.2 In all size classes of holdings, the percentage of net irrigated area to net sown area was much higher in the case of Scheduled Castes (45.2 percent) as compared to Scheduled Tribes (20.2 percent) in 2005-06. The similar pattern prevailed during Agriculture Census 2000-01 also. As such very large proportion of Scheduled Tribes holdings were un-irrigated. There was, however, improved irrigation for holdings of Scheduled Castes/Tribes between 2000-01 and 2005-06.

5.6 Source-wise Irrigated Holdings and Net Irrigated Area

5.6.1 The distribution of holdings received irrigation and area irrigated by different sources of irrigation for holdings of Scheduled Castes in 2000-01 and 2005-06 may be seen in Table 5.15. The graphical presentation in respect of net area irrigated by sources during 2005-06 is given in Figure 5.13.

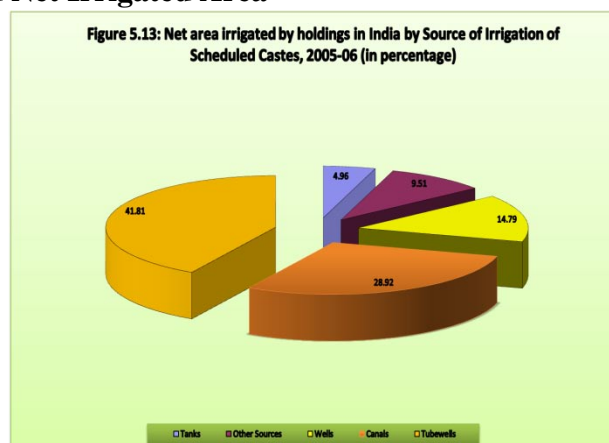

Table 5.15: Distribution of Source-wise Irrigated Holdings and Net Irrigated Area for Scheduled Castes during Agriculture Census, 2000-01 and 2005-06

(Number in '000)

(Area in '000 ha.)

Sl. No.	Sources of Irrigation	2000-01 [#]		2005-06 ^{\$}	
		Number of holdings*	Net Irrigated Area	Number of holdings*	Net Irrigated Area
1	2	3	4	5	6
1	Canals	1813 (26.39)	1203 (29.62)	2252 (26.31)	1318 (28.92)
2	Tanks	566 (8.24)	221 (5.45)	597 (6.97)	226 (4.96)
3	Wells	838 (12.19)	639 (15.74)	1057 (12.35)	674 (14.79)
4	Tubewells	2842 (41.38)	1554 (38.27)	3515 (41.07)	1906 (41.81)
5	Other Sources	810 (11.79)	444 (10.92)	1138 (13.29)	433 (9.51)
	All Sources	6870 (100.00)	4062 (100.00)	8559 (100.00)	4557 (100.00)

Note: (1) * This includes holdings irrigated by more than one source. However, the number of irrigated holdings was only 6669 thousand and 7552 thousand during 2000-01 and 2005-06 respectively. (2) The figures in brackets are percentages. (3) # excluding Bihar, Jharkhand and Meghalaya. (4) \$ excluding Bihar, Jharkhand and Maharashtra.

5.6.2 Out of a total of 8.56 million Scheduled Castes holdings received irrigation in 2005-06, the largest proportion, 41.0 percent, were irrigated by tubewells. The next important source of irrigation was canals accounting for 26.3 percent followed by wells (12.4 percent).

In terms of net irrigated area also, tubewells accounted for the largest proportion of 41.8 percent, while canals represented the next highest proportion, viz. 28.9 percent. Tubewells were also the main source of irrigation during 2000-01 followed by canals. Wells were the next source of irrigation with 14.8 percent of the net irrigated area while tanks had a share of about 5.0 percent.

5.6.3 The distribution of holdings received irrigation and area irrigated by different sources of irrigation for holdings of Scheduled Tribes are given in Table 5.16. The graphical presentation of net area irrigated by sources of irrigation during 2005-06 may be seen in Figure 5.14.

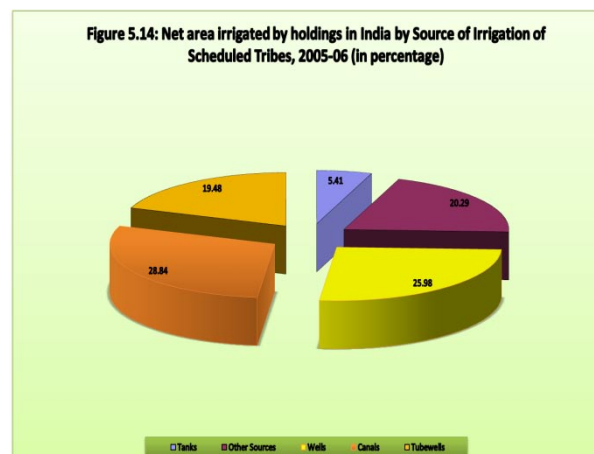

Table 5.16: Distribution of Source-wise Irrigated Holdings and Net Irrigated Area for Scheduled Tribes during Agriculture Census, 2000-01 and 2005-06

(Area in '000 ha.)

Sl. No.	Sources of Irrigation	2000-01 [#]		2005-06 ^{\$}	
		Number of holdings*	Net Irrigated Area	Number of holdings*	Net Irrigated Area
1	2	3	4	5	6
1	Canals	630 (28.80)	666 (32.49)	847 (25.42)	748 (28.84)
2	Tanks	230 (10.49)	137 (6.68)	244 (7.33)	140 (5.41)
3	Wells	548 (25.05)	568 (27.71)	776 (23.29)	674 (25.98)
4	Tubewells	269 (12.30)	278 (13.57)	594 (17.83)	505 (19.48)
5	Other Sources	511 (23.36)	401 (19.56)	870 (26.13)	526 (20.29)
	All Sources	2188 (100.00)	2051 (100.00)	3332 (100.00)	2594 (100.00)

Note: (1) * This includes holdings irrigated by more than one source. However, the number of irrigated holdings was only 2116 thousand and 2685 thousand during 2000-01 and 2005-06 respectively. (2) The figures in brackets are percentages. (3) # excluding Bihar, Jharkhand and Meghalaya. (4) \$ excluding Bihar, Jharkhand and Maharashtra.

5.6.4 Out of a total of 3.33 million Scheduled Tribes holdings received irrigation in 2005-06, the largest proportion, 26.1 percent, were irrigated by 'Other Sources'. The next important source of irrigation was canals accounting for 25.4 percent followed by wells (23.3 percent). Tubewells occupied the next place with 17.8 percent irrigated holdings. In terms of net irrigated area, canals had the highest share of 28.8 percent followed by wells (26.0 percent) and tubewells (19.5 percent). The other sources accounted for 20.3 percent.

5.7 Dispersal of operated Area

5.7.1 The dispersal of area of operational holdings during 2000-01 and 2005-06 may be seen in Table 5.17. In case of Scheduled Castes, 94.2 percent of operated area belonging to about 95.8 percent of operational holdings was located within the village of residence as per Agriculture Census 2005-06. About 2.3 percent of numbers of holdings with operated area of 3.4 percent were located partly within the village and partly outside the village of residence. Further, 1.8 percent of numbers of holdings with operated area of 2.2 percent were located outside the village of residence but within the Tehsil. Similarly, 0.1 percent of the holdings and 0.2 percent of respective operated area was held by deemed cultivators i.e. those operational holders who were residing outside the Tehsil but operating land in some village(s) of the Tehsil.

Note: (1) * excluding Bihar, Jharkhand and Meghalaya. (2) # excluding Bihar, Jharkhand and Maharashtra. (3) Figures in brackets indicate percentages.

5.7.2 The dispersal of area of operational holdings during 2000-01 and 2005-06 is given in Table 5.18. In case of Scheduled Tribes, 96.5 percent of operated area belonging to equal proportion of operational holdings, was located within the village of residence as per Agriculture Census 2005-06. About 2.1 percent of numbers of holdings with operated area of 2.5 percent were located partly within the village and partly outside the village of residence. About 1.3 percent of numbers of holdings with operated area of 1.0 percent were located outside the village of residence but within the Tehsil. A very small fraction of holdings and operated area was held by deemed cultivators i.e. those operational holders who were residing outside the Tehsil but operating land in some village(s) of the Tehsil.

23	Intensity of Cropping (21/22)	1.1077	1.1132	-	-	1.0970	1.1486

Note: (1) * excluding Bihar, Jharkhand and Meghalaya. (2) # excluding Bihar, Jharkhand and Maharashtra. (3) Figures in brackets indicate percentages to Gross Cropped Area. (4) Neg - Negligible (i.e. less than 500).

5.8.2 The net area sown for holdings of Scheduled castes was 10.08 million hectares in 2005-06 whereas the gross cropped area stood at 13.53 million hectares indicating a cropping intensity of 1.343. The percentage of net irrigated area to net sown area in 2005-06 was 45.2 while the irrigation intensity was 1.328. In a total of 13.53 million hectares of gross cropped area belonging to holdings of Scheduled Castes in 2005-06, the proportions of different groups/subgroups of crops were cereals (59.25 percent), pulses (12.41 percent), sugar crops (1.83 percent), oilseeds (14.10 percent), fibres (3.74 percent), fodder (2.89 percent) etc.

5.8.3 For holdings of Scheduled Tribes, it may be observed that against net sown area of 12.85 million hectares in 2005-06, gross cropped area was 14.76 million hectares, having a cropping intensity of 1.149 and irrigation intensity as 1.113. The distribution of gross cropped area of 14.76 million hectares among different groups/subgroups of crops in 2005-06 were cereals (66.07 percent), pulses (9.08 percent), spices & condiments (1.57 percent), vegetables (1.87 percent), fruits (1.42 percent), oilseeds (13.63 percent) etc.

CHAPTER 6

State-wise Agriculture Census results – All social groups

6.1 Introduction

6.1.1 In the preceding chapters, data generated for Agriculture Census 2005-06 were analyzed at All India level for All Social Groups, Scheduled Castes and Scheduled Tribes holdings. In this chapter the results would be analyzed State-wise, for All Social Groups. In the subsequent Chapter 7, it would be taken up for Scheduled Castes and Scheduled Tribes holdings.

(A) OPERATIONAL HOLDINGS

6.2 State-wise Distribution of Operational Holdings

6.2.1 As per Agriculture Census 2005-06, State-wise distribution of number and area of operational holdings may be seen in Table 6.1 and Table 6.2 and the corresponding graphical presentations in Figure 6.1 and Figure 6.2 respectively.

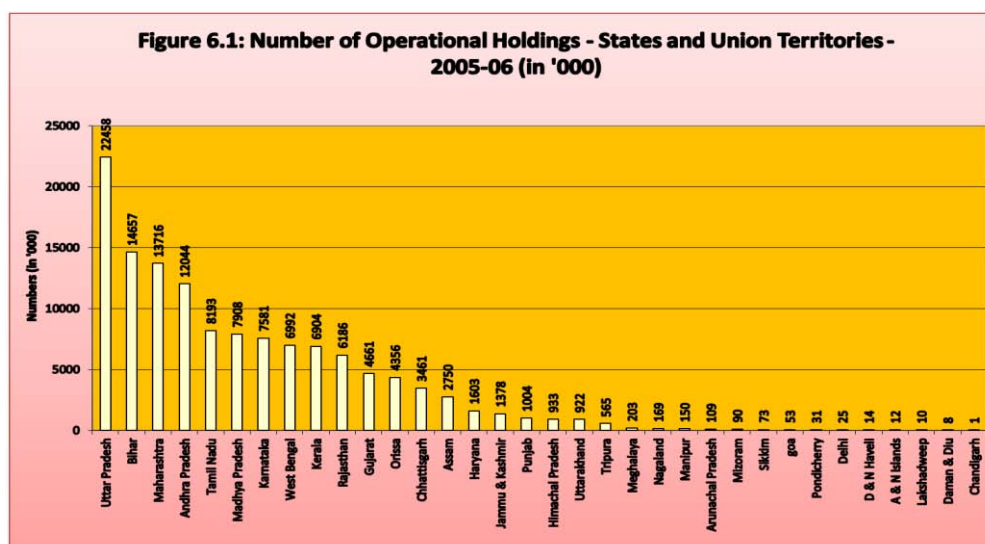

Table 6.1: State-wise distribution of number of operational holdings of All Social Groups during Agriculture Census 2000-01[@] and 2005-06[#]

Note: (1) @# excluding Jharkhand. (2) Figures in brackets are percentages. (3) Neg - negligible. (4) * include institutional holdings also.

6.2.2 Out of a total of 129.22 million holdings in the country, Uttar Pradesh accounted for largest number of holdings, 22.46 million (17.4 percent), during 2005-06, followed by Bihar (11.3 percent), Maharashtra (10.6 percent), Andhra Pradesh (9.3 percent), Tamil Nadu (6.3 percent), Madhya Pradesh (6.1 percent), Karnataka (5.9 percent), West Bengal (5.4 percent), Kerala (5.3 percent) and Rajasthan (4.8 percent). Uttar Pradesh was highest during Agriculture Census 2000-01 (18.1 percent) also.

6.2.3 In a total of 15.12 million female operational holdings, Andhra Pradesh accounted for highest proportion of 17.5 percent followed by Maharashtra (14.1 percent), Bihar (12.0 percent), Tamil Nadu (10.1 percent), Uttar Pradesh (9.5 percent), Kerala (8.8 percent) and Karnataka (8.7 percent). Further, out of a total of 113.85 million male operational holdings, Uttar Pradesh constituted 18.5 percent followed by Bihar (11.3 percent), Maharashtra (10.1 percent), Andhra Pradesh (8.3 percent), Madhya Pradesh (6.4 percent), West Bengal (5.9 percent), Tamil Nadu (5.8 percent), Karnataka (5.5 percent), Rajasthan (5.1 percent) and Kerala (4.8 percent). The variations in 2005-06 over 2000-01 relating to male and female operational holdings at all India level were 6.73 percent and 16.36 percent respectively.

6.2.4 A comparison of number of operational holdings in 2005-06 over 2000-01 indicated a mixed trend varying from State to State. However, in all the States except Goa, Jammu & Kashmir, Meghalaya, Chandigarh, Delhi and Pondicherry, there was an increase in number of holdings between these two Census periods. For the country, the number of operational holdings had increased from 119.93 million in 2000-01 to 129.22 million in 2005-06 showing an increase of 7.75 percent.

Note: (1) * excluding Bihar, Jharkhand and Maharashtra. (2) Neg - Negligible. (3) Figures in brackets are percentages. (4) Total may not tally due to rounding off.

6.3.2 In a total of 100.85 million operational holdings estimated during Agriculture Census 2005-06, wholly owned and self-operated holdings had the highest share of 97.14 percent. In Karnataka, Chandigarh UT, Dadra & Nagar Haveli, Delhi and Lakshadweep all the holdings were owned and self-operated. In other States, where almost all the holdings (above 99.0 percent) belonged to owned and self-operated category were Andhra Pradesh, Arunachal Pradesh, Assam, Chhattisgarh, Daman & Diu, Gujarat, Haryana, Madhya Pradesh, Mizoram, Nagaland, Tamil Nadu, Uttar Pradesh, Uttarakhand and Pondicherry.

6.3.3 The proportions of wholly leased-in holdings with respect to total number of operational holdings in non-land record States like, Goa, Manipur, Meghalaya, Orissa, Sikkim and West Bengal were substantially higher as compared to land record States.

6.3.4 The wholly otherwise operated holdings which include encroachment, land forcibly occupied, unauthorised land or disputed land, etc., accounted for only 0.23 percent of the total number of operational holdings in the country. Among the States, Goa had the highest proportion of such holdings at 5.6 percent followed by Tripura (5.1 percent), Jammu and Kashmir (1.8 percent), Orissa (1.0 percent), Rajasthan (0.6 percent) and Kerala (0.5 percent).

6.3.5 The State-wise distribution of operated area of all social groups by tenancy status in 2005-06 is given in Table 6.4.

Table 6.4: State-wise distribution of operated area of All Social Groups by Tenancy Status, 2005-06*

Note: (1) * excluding Bihar, Jharkhand and Maharashtra. (2) Neg - Negligible. (3) Figures in brackets are percentages. (4) Total may not tally due to rounding off.

6.3.6 The distribution of operated area in States according to tenancy status followed similar pattern as the number of operational holdings. In the States like, Andhra Pradesh, Assam, Gujarat, Haryana, Madhya Pradesh, Mizoram, Nagaland, Tamil Nadu, Uttar Pradesh, Daman & Diu and Pondicherry, almost entire operated area (99.0 percent and above) was reported under owned and self-operated category.

6.3.7 The proportion of wholly leased-in area in relation to total operated area was higher in the States of Goa, Jammu & Kashmir, Manipur, Meghalaya, Orissa, Sikkim and West Bengal as compared to all India average of 0.34 percent.

6.3.8 The proportion of wholly otherwise operated area was estimated highest in Tripura (4.2 percent) followed by Goa (2.6 percent), Jammu & Kashmir (1.8 percent), Orissa (0.7 percent) which were also above the national average of 0.12 percent.

6.4 Terms of leasing

6.4.1 The State-wise distribution of leased-in area by terms of leasing of all social groups in 2005-06 may be seen in Table 6.5.

Table 6.5: State-wise distribution of leased-in area of All Social Groups by terms of leasing, 2005-06*

(Area in ha.)

Note: (1) * excluding Bihar, Jharkhand and Maharashtra. (2) Neg - Negligible. (3) Figures in brackets are percentages. Total may not tally due to rounding off.

6.4.2 Data was collected for four specific terms of leasing, namely, (i) fixed money (ii) fixed produce, (iii) share of produce and (iv) usufructuary mortgage. Leasing for share of produce was the major term of leasing in States of Arunachal Pradesh (93.6 percent), Assam (58.3 percent), Meghalaya (61.6 percent), Orissa (69.2 percent), Tamil Nadu (39.6 percent), Tripura (67.5 percent) and West Bengal (73.0 percent). In States where proportion of leasing of area to total leased-in area done mainly for fixed-money were Andhra Pradesh (83.7 percent), Haryana (84.1 percent), Kerala (77.6 percent), Madhya Pradesh (41.6 percent), Punjab (96.8 percent), Rajasthan (65.8 percent), Sikkim (83.7 percent), Uttar Pradesh (65.6 percent) and Uttarakhand (56.0 percent). The term fixed produce was most dominant in the States of Goa (32.4 percent), Manipur (83.7 percent), Nagaland (60.3 percent) and Pondicherry (87.5 percent). The proportion of leased-in area under 'other terms' was the highest among different terms of leasing in Chhattisgarh (46.2 percent), Gujarat (82.2 percent), Himachal Pradesh (54.6 percent), Jammu & Kashmir (74.7 percent), Jammu & Kashmir (74.7 percent) and Mizoram (92.0 percent).

(B) LAND USE

6.5 Land Utilisation

6.5.1 The State-wise area, in percentage, under main land use categories for all social groups in 2005-06 may be seen in Table 6.6.

Table 6.6: State-wise percentage distribution of area under main land use of All Social Groups, 2000-01[@] and 2005-06[#]

	All India	1.22	1.03	94.49	95.50	4.29	3.46	100.00	100.00

Note: (1) @ excluding Bihar, Jharkhand and Meghalaya. (2) # excluding Bihar, Jharkhand and Maharashtra. (3) Total may not tally due to rounding off. (4) NA - not applicable.

6.5.2 The percentage of net cultivated area to total operated area in 2005-06 in the States of Andhra Pradesh (97.9 percent), Assam (96.8 percent), Chhattisgarh (97.8 percent), Dadra & Nagar Haveli (98.6 percent), Goa (97.1 percent), Gujarat (99.7 percent), Haryana (99.9 percent), Karnataka (96.9 percent), Madhya Pradesh (96.4 percent), Manipur (99.9 percent), Mizoram (100.0 percent), Orissa (98.5 percent), Punjab (100.0 percent), Tamil Nadu (97.2 percent), Uttar Pradesh (98.9 percent), West Bengal (96.6 percent) and Delhi (99.3 percent) was higher than the national average of 95.5 percent while Nagaland had lowest proportion (39.9 percent) among all the States. Land not available for cultivation as a percentage of total operated area was as high as 10.3 percent in Arunachal Pradesh, 9.5 percent in Himachal Pradesh, 5.5 percent in Jammu & Kashmir, 11.3 percent in Kerala, 14.0 percent in Nagaland, 9.8 percent in Sikkim, 9.3 percent in Tripura, 6.7 percent in A & N Islands, 20.9 percent in Chandigarh, 12.6 percent in Lakshadweep and 5.9 percent in Pondicherry.

6.5.3 Land Unutilised stood at 3.5 percent of the total operated area at national level. In the States of Andaman & Nicobar Islands, Arunachal Pradesh, Daman & Diu, Himachal Pradesh, Jammu & Kashmir, Meghalaya, Nagaland, Pondicherry, Rajasthan, Sikkim and Uttarakhand, proportion was found above national average.

(C) IRRIGATION

6.6 Irrigation Status

6.6.1 The percentage distribution of area according to irrigation status in each State, as per Agriculture Census 2000-01 and Agriculture Census 2005-06 is shown in Table 6.7.

Table 6.7: Percentage of net irrigated area to net sown area of All Social Groups, 2000-01[@] and 2005-06[#]

(Area in '000 ha.)

Sl. No.	States/UTs	Net area sown		Net irrigated area		Percentage of NIA to NSA	
		2000-01	2005-06	2000-01	2005-06	2000-01	2005-06

Note: (1) @ excluding Bihar, Jharkhand and Meghalaya. (2) # excluding Bihar, Jharkhand and Maharashtra. (3) Total may not tally due to rounding off. (4) NA - not applicable. (5) Neg - negligible.

6.6.2 The net irrigated area as proportion of net sown area was 46.8 percent in the country in 2005-06 as compared to 38.9 percent in 2000-01. The net irrigated area in 2005-06 increased by 10.1 percent over 2000-01. Delhi had the highest proportion of net irrigated area to net sown area (99.5 percent) in 2005-06 followed by Haryana (98.9 percent), Punjab (98.8 percent), Chandigarh (98.0 percent), Pondicherry (89.9 percent), Uttar Pradesh (88.0 percent), West Bengal (61.9 percent) and Tamil Nadu (55.6 percent), the lowest being Assam (4.9 percent).

6.7 Source-wise Classification of Irrigated Area

6.7.1 The area irrigated, in percentage, for all social groups, in each State, by source of irrigation in 2005-06 may be seen in Table 6.8.

Table 6.8: Area irrigated, in percentage, of All Social Groups in each State by source of irrigation, 2000-01[@] and 2005-06[#]

Sl. No.	States/UTs	Source of irrigation					Total
		Canals	Tanks	Wells	Tubewells	Other

	All India	27.35 (28.24)	3.86 (4.37)	16.84 (17.88)	43.57 (40.12)	8.38 (9.39)	100.00 (100.00)

Note: (1) @ excluding Bihar, Jharkhand and Meghalaya. (2) * excluding Bihar, Jharkhand and Maharashtra. (3) Figures in brackets are for 2000-01. (4) Total may not tally due to rounding off. (5) NA - not applicable.

6.7.2 As per Agriculture Census 2005-06, tube-wells emerged as main source of irrigation (43.6 percent), followed by canals (27.4 percent), wells (16.8 percent) and tanks (3.9 percent). Other sources accounted for 8.4 percent at all India level. The State-wise data shows that canals were the main source of irrigation in the States of Andhra Pradesh, Assam, Chhattisgarh, Goa, Jammu & Kashmir, Karnataka, Manipur, Mizoram, Orissa and Dadra & Nagar Haveli; while tubewells were the dominant source of irrigation in Haryana, Himachal Pradesh, Punjab, Uttar Pradesh, Uttarakhand, West Bengal, Delhi and Pondicherry. The proportion of area irrigated by wells in Gujarat, Daman & Diu, Madhya Pradesh, Kerala, Rajasthan and Tamil Nadu was higher than other sources of irrigation, viz. canals, tanks and tubewells in these States. In Andhra Pradesh, Karnataka, Kerala and Tamil Nadu, proportion of area irrigated by tanks varied between 7.2 percent in Karnataka to 19.3 percent in Tamil Nadu.

6.8 Dispersal of operational Holdings

6.8.1 Dispersal by number and area of operational holdings for all social groups in each State in 2005-06 is given in Table 6.9.

Table 6.9: State-wise dispersal of number and area of operational holdings of All Social Groups, 2005-06*

Note: (1) * excluding Bihar, Jharkhand and Maharashtra. (2) Neg - Negligible. (3) Figures in brackets are percentages. (4) Total may not tally due to rounding off.

6.8.2 In the Union Territories of Andaman & Nicobar Islands, Chandigarh, Delhi, Dadra & Nagar Haveli, Lakshadweep and State of Meghalaya, operated area of all the holders were confined completely within village of residence. In Arunachal Pradesh, Assam, Chhattisgarh, Gujarat, Haryana, Jammu & Kashmir, Karnataka, Madhya Pradesh, Manipur, Mizoram,

Nagaland, Punjab, Tamil Nadu, Tripura, Uttar Pradesh, Uttarakhand, Daman & Diu and Pondicherry, more than 95.64 percent of number of holdings and 94.47 percent of operated area were located in the village of residence. The remaining proportion of number of holdings (4.36 percent) and area operated (5.53 percent) were located either partly in the village of residence and partly in other villages or completely outside village of residence but within the same Tehsil.

(D) CROPPING PATTERN

6.9 Gross Cropped Area

6.9.1 The State-wise gross cropped area and its distribution for all social groups in 2005-06 is given in Table 6.10 and Table 6.11 respectively.

Table 6.10: State-wise Gross Cropped Area of All Social Groups, 2005-06*

(Area in '000 ha.)

Sl. No.	States/UTs	Gross Irrigated Area	Gross Unirrigated Area	Gross Cropped Area

Note: (1) @ excluding Bihar, Jharkhand and Meghalaya. (2) * excluding Bihar, Jharkhand and Maharashtra. (3) Total may not tally due to rounding off. (4) NA - not applicable. (5) Neg – negligible.

6.9.2 As per Table 6.10, Uttar Pradesh had the highest gross cropped area among States/UTs in 2005-06 accounting for 26.70 million ha. (17.5 percent), followed by Rajasthan with 20.87 million ha. (13.7 percent), Madhya Pradesh with 19.0 million ha (12.5 percent), Andhra Pradesh (13.06 million ha. or 8.6 percent) and Karnataka (12.59 million ha. or 8.3 percent). These five States together accounted for more than 60.0 percent of the total gross cropped area in the country. Similar pattern was observed in relation to gross cropped area in the previous census 2000-01 also.

6.9.3 Uttar Pradesh had the highest proportion of area of 28.7 percent of gross irrigated area in the country followed by Punjab (10.5 percent), Rajasthan (9.9 percent), Haryana (8.8 percent), Madhya Pradesh (8.4 percent), Andhra Pradesh (7.7 percent), West Bengal (6.9 percent) and Tamil Nadu (4.6 percent).

6.9.4 The percentage distribution of gross cropped area between gross irrigated area and gross unirrigated area in each State may be seen in Table.6.12.

Table 6.12: Percentage distribution of Gross Cropped Area in each State for All Social Groups, 2005-06*

Sl. No.	States/UTs	Gross Irrigated Area	Gross Unirrigated Area	Gross Cropped Area
1	2	3	4	5
1	Andhra Pradesh	43.26	56.74	100.00
2	Arunachal Pradesh	21.84	78.16	100.00
3	Assam	4.86	95.14	100.00
4	Chhattisgarh	20.19	79.81	100.00
5	Goa	24.03	75.97	100.00
6	Gujarat	31.09	68.91	100.00
7	Haryana	96.15	3.85	100.00
8	Himachal Pradesh	16.96	83.04	100.00
9	Jammu & Kashmir	41.29	58.71	100.00

27	Chandigarh	98.53	1.47	100.00
28	D & N Haveli	11.86	88.14	100.00
29	Daman & Diu	5.33	94.67	100.00
30	Delhi	95.45	4.55	100.00
31	Lakshadweep	0.00	100.00	100.00
32	Pondicherry	82.33	17.67	100.00
	All India	48.08	51.92	100.00

Note: (1) * excluding Bihar, Jharkhand and Maharashtra. (2) Total may not tally due to rounding off.

6.9.5 The percentage of gross irrigated area to gross cropped area was the highest in 2005-06 in Punjab (98.76 percent) followed by other States, like, Chandigarh U.T. (98.53 percent), Haryana (96.15 percent), Delhi (95.45 percent), Pondicherry (82.33 percent), Uttar Pradesh (78.75 percent), Tamil Nadu (59.66 percent), West Bengal (55.54 percent), Uttarakhand (46.13 percent), Andhra Pradesh (43.26 percent), Jammu & Kashmir (41.29 percent), Rajasthan (34.86 percent), Madhya Pradesh (32.60 percent), Gujarat (31.10 percent) etc.

6.10 Intensity of Cropping

6.10.1 The State-wise intensity of cropping for all Social Groups in 2005-06, may be seen in Table 6.13. Its graphic presentation is given in Figure 6.3.

Figure 6.3: Intensity of Cropping in States and Union Territories - 2005-06

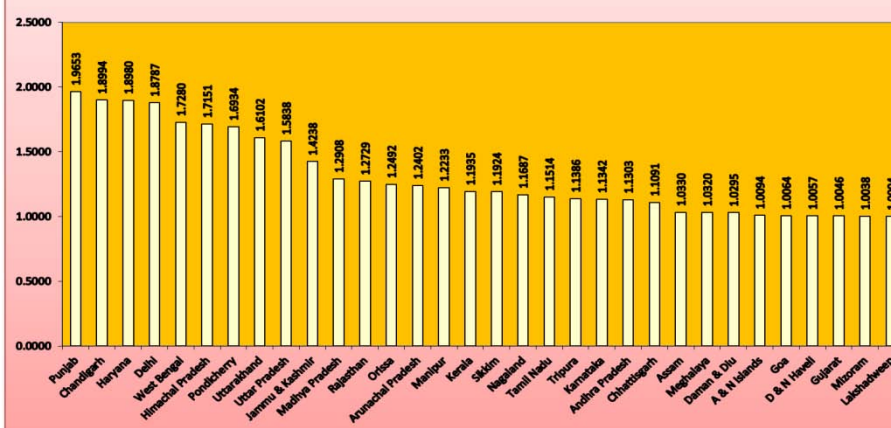

Table 6.13: State-wise Intensity of Cropping of All Social Groups, 2005-06*

(Area in '000 ha.)

32	Lakshadweep	2	2	1.0004	1.0030
33	Pondicherry	33	20	1.6934	1.7441
	All India	152609	115855	1.3172	1.2596

Note: (1) * excluding Bihar, Jharkhand and Maharashtra. (2) Total may not tally due to rounding off. (4) NA - not applicable.

6.10.2 The cropping intensity at All India level is estimated at 131.72 percent. Among States, Punjab recorded highest intensity of cropping in 2005-06 (1.9653) followed by Chandigarh (1.8994), Haryana (1.8980), Delhi (1.8787), West Bengal (1.7280), Himachal Pradesh (1.7151), Pondicherry (1.6934), Uttarakhand (1.6102), Uttar Pradesh (1.5838) and Jammu & Kashmir (1.4238).

State-wise Area under Principal Crops

6.10.3 The State-wise distribution of area (in percent) under principal crops of All Social Groups in 2005-06 is given in Table 6.14(a) and Table 6.14(b).

Table 6.14(a): State-wise Distribution of Percent of Area under Principal Crops (Food Crops) of All Social Groups, 2005-06*

6.10.4 Considering all crops together, among States, Uttar Pradesh had the highest share of 17.5 percent of cropped area in the country, followed by Rajasthan (13.7 percent), Madhya Pradesh (12.5 percent), Andhra Pradesh (8.6 percent), Karnataka (8.3 percent), Gujarat (6.6 percent), West Bengal (6.0 percent) and Punjab (5.1 percent). These eight States taken together accounted for more than 3/4th of the total cropped area (78.3 percent) in the country. In the category of food crops, Uttar Pradesh again topped the list with 22.1 percent of the total area under food crops in the country followed by Rajasthan (11.2 percent) and Madhya Pradesh (9.9 percent). The other important States were Karnataka (8.1 percent), Andhra Pradesh (7.5 percent), West Bengal (6.7 percent), Punjab (5.7 percent) and Orissa (5.0 percent). Here again the above mentioned eight States accounted for more than 3/4th (76.2 percent) of the total area under food crops in the country. In regard to the area under non-food crops, viz., oilseeds, Madhya Pradesh had the largest share of 28.0 percent of area under oilseeds followed by Rajasthan (21.5 percent), Andhra Pradesh (12.2 percent), Gujarat (11.5 percent) and Karnataka (10.3 percent), while Tamil Nadu and Uttar Pradesh about 4.0 percent each, West Bengal (2.4 percent) and Haryana and Kerala (1.8 percent each). These ten States, thus, covered about 98.0 percent of the total area under Oilseeds in the country. Gujarat had the highest proportion of 31.3 percent of the total area under fibre in the country followed by Andhra Pradesh (16.2 percent), Madhya Pradesh (11.6 percent) and West Bengal (10.0 percent). As regards fodder crops, Rajasthan had more than 1/2 of the total area under fodder crops in the country (57.0 percent) followed by Punjab (12.0 percent), Madhya Pradesh and Haryana (9.4 percent) each. In the case of floriculture, Tamil Nadu had the highest share of 26.0 percent of area under the crop in the country followed by Tripura (23.0 percent), Karnataka (12.0 percent), West Bengal (11.0 percent) and Andhra Pradesh (7.5 percent). In the category of medicinal plants, Rajasthan had 1/3rd of area in the country followed by Karnataka (22.7 percent), Uttar Pradesh (18.4 percent), Andhra Pradesh and Tamil Nadu (about 9.5 percent) each.

CHAPTER 7

State-wise results – Scheduled Castes and Scheduled Tribes

(A) OPERATIONAL HOLDINGS

7.1 State-wise Distribution of Operational Holdings of Scheduled Castes and Scheduled Tribes.

7.1.1 The State-wise distribution of number and area of operational holdings of Scheduled Castes in 2005-06 may be seen in Table 7.1 and Table 7.2 respectively. The State-wise distribution of number and area of operational holdings of Scheduled Tribes in 2005-06 is given in Table 7.3 and Table 7.4 respectively.

Table 7.1: State-wise distribution of number of operational holdings for Scheduled Castes during Agriculture Census 2000-01[@] and 2005-06[#]

Note: (1) @# excluding Jharkhand. (2) Figures in brackets are percentages. (3) Neg - negligible. (4) NA - not applicable.

7.1.2 The number of operational holdings of Scheduled Castes in the country was 16.07 million during 2005-06 as against 15.14 million in 2000-01, showing an increase of 6.2 percent. The largest share of holdings of Scheduled Castes was in Uttar Pradesh (23.9 percent) followed by West Bengal (10.8 percent), Bihar (10.7 percent), Andhra Pradesh (8.9 percent), Maharashtra and Madhya Pradesh (6.6 percent) each, Tamil Nadu, Karnataka and Rajasthan (5.5 percent) each. Out of a total of 14.33 million male operational holdings belonging to Scheduled Castes, Uttar Pradesh accounted for about 25 percent holdings followed by West Bengal (11.7 percent),

Bihar (10.3 percent), Andhra Pradesh (7.8 percent), Madhya Pradesh (6.8 percent), Maharashtra (6.3 percent), Rajasthan (5.7 percent) and Tamil Nadu and Karnataka (5.0 percent) each. These nine States together constituted about 84.0 percent of the total male operational holdings belonging to Scheduled Castes in the country. Similarly, Andhra Pradesh had highest proportion of female operational holdings (17.7 percent) in the country followed by Bihar (14.3 percent), Uttar Pradesh (13.8 percent), Maharashtra (9.6 percent), Tamil Nadu (9.3 percent), Karnataka (8.9 percent) and Kerala (7.7 percent). These seven States together constituted 81.0 percent of total female operational holdings belonging to Scheduled Castes in 2005-06 in the country.

7.1.3 As per Table 7.2, Rajasthan accounted for 18.2 percent of total operated area of Scheduled Castes holdings in 2005-06 in the country followed by Uttar Pradesh (14.6 percent), Madhya Pradesh (10.6 percent), Maharashtra (9.3 percent) and Andhra Pradesh, West Bengal and Karnataka (about 8.5 percent each). In a total of 1.21 million hectares of operated area of female Scheduled Castes operational holdings in 2005-06 in the country, Andhra Pradesh had the highest share of 17.8 percent followed by Maharashtra (15.1 percent), Karnataka (14.2 percent), Rajasthan (10.0 percent), Uttar Pradesh (9.0 percent), Tamil Nadu and Madhya Pradesh (7.1 percent) each and Bihar (6.8 percent). Thus, these eight States together accounted for about 87.0 percent of operated area of female holdings in the country. However, Rajasthan had the maximum share of area operated by males (19.0 percent) followed by Uttar Pradesh (15.2 percent), Madhya Pradesh (11.0 percent), West Bengal (9.0 percent), Maharashtra (8.7 percent), Andhra Pradesh and Karnataka (7.7 percent) each. These seven States taken together accounted for more than $\frac{3}{4}$ th of the area operated by males belonging to Scheduled Castes in the country in 2005-06.

7.1.4 The total operated area held by Scheduled Castes increased at all India level by 1.7 percent as of 0.6 percent for males and 14.5 percent for holdings headed by females.

7.1.5 The total number of Scheduled Tribe holdings in the country (Table 7.3) in 2005-06 were 10.34 million as against 9.40 million in 2000-01, indicating an increase of about 10.0 percent. The Scheduled Tribes holdings were largely concentrated in States of Madhya Pradesh (15.7 percent) and Chhattisgarh (10.7 percent) accounting for more than one-fourth of total number of Scheduled Tribes holdings (26.4 percent). The other States having sizeable proportion of Scheduled Tribes holdings were Orissa (13.6 percent), Rajasthan (9.4 percent), Andhra Pradesh (9.0 percent), Maharashtra (8.5 percent) and West Bengal (5.3 percent). These seven States together accounted for 72.0 percent of total Scheduled Tribes holdings in the country in 2005-06. Out of a total of 1.0 million female operational holdings belonging to Scheduled Tribes, Andhra Pradesh had the highest proportion of 16.2 percent followed by

Maharashtra (13.6 percent), Madhya Pradesh (12.8 percent), Chhattisgarh (12.0 percent), Karnataka (7.7 percent), Gujarat (7.3 percent) and Orissa (5.5 percent), accounting for 75.0 percent of female Scheduled Tribes operational holdings in the country. The male operational holdings in Madhya Pradesh and Chhattisgarh taken together accounted for more than one-fourth of the total male operational holdings (26.6 percent). The other States, having substantial proportions, were Orissa (14.5 percent), Rajasthan (10.0 percent), Andhra Pradesh (8.2 percent), Maharashtra (8.0 percent) and West Bengal (5.6 percent). The above mentioned seven States, thus, accounted for 73.0 percent of total male operational holdings of Scheduled Tribes in the country in 2005-06.

7.1.6 While male holdings grew by 9.0 percent, female holdings rose by 19.3 percent resulting in an overall increase of 10.0 percent in Scheduled Tribes holdings in 2005-06 over 2000-01.

7.1.7 In terms of area operated (Table 7.4), Madhya Pradesh and Chhattisgarh taken together accounted for about one-third of total area operated by Scheduled Tribes in the country (32.2 percent) in 2005-06. The other States were Rajasthan and Orissa (10.4 percent) each, Maharashtra (9.0 percent), Andhra Pradesh (7.2 percent), Nagaland (6.9 percent) and Gujarat (5.7 percent). The above mentioned eight States accounted for 82.0 percent of total area operated by Scheduled Tribes in the country. Further, out of 15.49 million hectares of operated area of male operational holdings, Madhya Pradesh and Chhattisgarh had together about one-third of operated area (32.4 percent) followed by Rajasthan (11.1 percent), Orissa (10.9 percent), Maharashtra (8.5 percent), Nagaland (7.1 percent), Andhra Pradesh (6.7 percent) and Gujarat (5.3 percent). The substantial part of area operated by male Scheduled Tribes, i.e. 82.0 percent, lied only in these eight States. The area operated by Scheduled Tribes females in Madhya Pradesh and Chhattisgarh constituted together 30.0 percent of operated area of this category of holdings in the country. The other dominating States were Maharashtra (15.1 percent), Andhra Pradesh (12.4 percent), Gujarat (10.3 percent), Karnataka (7.8 percent) and Nagaland (5.0 percent). The above mentioned seven States taken together accounted for more than 80.0 percent of operated area of female operational holdings belonging to Scheduled Tribes in the country in 2005-06.

7.1.8 The area operated by Scheduled Tribes females and males increased by 12.8 percent and 1.6 percent respectively with an overall increase of 2.45 percent in 2005-06 as compared to the previous Agriculture Census 2000-01.

7.2 Tenancy

7.2.1 The State-wise distributions of number and area of operational holdings, according to tenancy, for Scheduled Castes in 2005-06 may be seen separately in Table 7.5 and Table 7.6 respectively.

Table 7.5: State-wise distribution of number of holdings of Scheduled Castes by Tenancy Status, 2005-06*

7.2.2 Among Scheduled Caste holdings, wholly-owned and self-operated holdings constituted 94.9 percent in terms of number and 95.3 percent in respect of operated area at all India level. In Dadra & Nagar Haveli, Daman & Diu, Delhi and Karnataka, all the holdings were wholly-owned and self-operated. In the States of Andhra Pradesh, Assam, Chhattisgarh, Gujarat, Haryana, Madhya Pradesh, Uttar Pradesh and Pondicherry, almost all holdings (above 99.0 percent) were recorded under wholly-owned and self-operated category with regard to both number and area of operational holdings. The wholly leased-in holdings were only 0.8 percent accounting for 0.7 percent of operated area at all India level under category of Scheduled Castes holdings. The States which had proportions of wholly leased-in holdings in terms of number and area of operational holdings above all India average of (0.8, 0.7) percent were Goa (3.5, 3.1) percent, Jammu & Kashmir (2.1, 2.2) percent, Manipur (5.2, 3.8) percent, Orissa (7.0, 5.8) percent, Sikkim (4.5, 1.5) percent, Tamil Nadu (1.2, 1.2) percent and West Bengal (2.6, 2.5) percent. The proportion of number of wholly otherwise operated holdings was higher than the national average of 0.35 percent in the States of Goa (1.7 percent), Jammu & Kashmir (4.4 percent), Kerala (1.4 percent), Orissa (0.9 percent), Rajasthan (0.5 percent), Tripura (4.6

percent) and West Bengal (0.8 percent). In these States, the corresponding proportion of 'otherwise' operated area was also higher than the all India average of 0.18 percent except Rajasthan where it was almost equal (0.17 percent). In the category of 'Others' which has been defined under Chapter-IV, the proportion of number of holdings to the total number of holdings in respective States was above all India average of 3.94 percent in Orissa (14.2 percent) and West Bengal (22.3 percent) only whereas the proportion of operated area to the total operated area was higher than the all India average of 3.83 percent in Goa (6.5 percent), Jammu & Kashmir (4.6 percent), Kerala (5.1 percent), Orissa (17.2 percent) and West Bengal (25.0 percent).

7.2.3 The distribution of number of operational holdings as well as operated area of Scheduled Tribes in each State according to Tenancy in 2005-06 may be seen in Table 7.7 and Table 7.8 respectively.

7.2.4 Among Scheduled Tribes, wholly-owned and self-operated holdings constituted 94.8 percent in number and 96.0 percent in term of area at all India level. In States of Gujarat, Dadra & Nagar Haveli, Karnataka and Lakshadweep all Scheduled Tribes holdings were wholly-owned and self-operated whereas in States like Andhra Pradesh, Arunachal Pradesh, Assam, Manipur, Mizoram, Nagaland, Tamil Nadu and Daman & Diu over 99.0 percent of the holdings fell under this category. In States like Andhra Pradesh, Assam, Manipur, Mizoram, Nagaland, Tamil Nadu and Daman & Diu, over 99.0 percent of area of operational holdings also belonged to the category of owned & self-operated. The wholly leased-in holdings accounted for 0.4 percent of

total number of holdings and 0.2 percent of corresponding operated area at all-India level. The States which had higher proportion of leased-in number of holdings than all India average of 0.4 percent were Goa (13.6 percent), Jammu & Kashmir (1.0 percent), Meghalaya and Orissa (1.2 percent) each, Sikkim (1.8 percent) and West Bengal (2.3 percent). In term of area under leased-in holdings, the States having higher proportion than national average of 0.2 percent were Goa (7.5 percent), Jammu & Kashmir (1.2 percent), Kerala (0.4 percent), Meghalaya (1.3 percent), Orissa (0.7 percent), Sikkim (0.9 percent), Uttar Pradesh (0.3 percent) and West Bengal (2.3 percent). The States of Goa, Jammu and Kashmir, Kerala, Orissa, Tripura and West Bengal, had significant proportion of number of holdings as well as operated area under 'wholly otherwise operated' and 'Others' categories of Scheduled Tribe holdings.

7.3 Terms of leasing

7.3.1 State-wise distributions of area leased-in under different terms of leasing in respect of holdings of Scheduled Castes and Scheduled Tribes in 2005-06 are given in Table 7.9 and Table 7.10 respectively.

Table 7.9: State-wise distribution of leased-in area of Scheduled Castes by terms of leasing, 2005-06*

7.3.2 Distribution of area leased-in according to different terms of leasing for holdings of Scheduled Castes showed that share of produce was the most dominated term of leasing as more than 3/4th of the leased-in area fell under this category at all India level. The States having higher proportion than all India average of 75.2 percent were only Orissa (76.1 percent) and West Bengal (91.7 percent). The States of Assam (37.5 percent), Himachal Pradesh (34.4 percent), Tamil Nadu (45.0 percent) and Tripura (67.1 percent) had as high as 1/3rd of leased-in area in respective States under share of produce. The other States which had substantial part of leased-in area under this category were Goa (12.1 percent), Kerala (22.7 percent), Madhya Pradesh (22.2

percent), Rajasthan (26.8 percent) and Sikkim (18.8 percent). The fixed money was the second important term of leasing having share of 12.3 percent at all India level. In Haryana entire leased-in area (100.0 percent) fell under this category followed by Punjab (90.4 percent), Andhra Pradesh (87.0 percent), Uttarakhand (81.7 percent), Uttar Pradesh (66.5 percent), Rajasthan (64 percent), Kerala (62.1 percent), Goa (45.5 percent), Sikkim (22.8 percent), Jammu & Kashmir (21.2 percent), Himachal Pradesh (20.4 percent), Madhya Pradesh (19.2 percent) and Tamil Nadu (11.0 percent). In terms of fixed produce, the proportion of leased-in area above national average of 9.0 percent was found in the States of Assam (31.7 percent), Goa (30.3 percent), Kerala (12.3 percent), Orissa (18.0 percent), Sikkim (58.4 percent), Tamil Nadu (28.3 percent) and Uttar Pradesh (28.7 percent). The operated area under remaining categories was negligible at all India level.

7.3.3 Like holdings of all Social Groups and Scheduled Castes, 'share of produce' was the most dominating term of leasing of area for Scheduled Tribes as well which is evident from the fact that 62.0 percent of the leased-in area belonged to this category at all India level. The State-wise percentage of leased-in area under this category was the highest in Arunachal Pradesh (93.5 percent) followed by Chhattisgarh (89.7 percent), West Bengal (86.3 percent), Assam (79.0 percent), Tripura (70.1 percent), Meghalaya (61.6 percent), Orissa (53.8 percent), Kerala (43.6 percent), Himachal Pradesh (38.0 percent) etc. The next important term of leasing of area was under 'fixed produce' having a share of 15.0 percent at all India level. The highest proportion of leased-in area under the category was in Manipur (100.0 percent) followed by Nagaland (60.3 percent), Goa (40.8 percent), Meghalaya (35.8 percent), Sikkim (31.3 percent), Orissa (19.9 percent), Rajasthan (19.0 percent), Uttar Pradesh (18.1 percent), Himachal Pradesh (12.7 percent) etc. The proportion of leased-in area under 'fixed money' was 13.7 percent at all India level. This proportion was the highest in Andhra Pradesh (91.1 percent), followed by Uttar Pradesh (81.9 percent), Rajasthan (46.1 percent), Sikkim (41.7 percent), Kerala (40.5 percent), Himachal Pradesh (38.0 percent), Uttarakhand (31.6 percent), Madhya Pradesh (31.1 percent), Nagaland (30.3 percent), Goa (22.6 percent) and Orissa (15.3 percent). The proportions of leased-in area under 'usufructuary mortgaged' and 'others' were 3.8 percent and 6.0 percent respectively at all India level.

(B) LAND USE

7.4 Land Utilization

7.4.1 The State-wise area, in percentage, under main land use/categories for holdings of Scheduled Castes and Scheduled Tribes in 2005-06 may be seen in Table 7.11 and Table 7.12 respectively.

Table 7.11: State-wise percentage distribution of area under main land use of Scheduled Castes, 2000-01[@] and 2005-06[#]

Sl. No.	States/UTs	Land not available for cultivation		Net cultivated area		Land unutilized		Total

Note: (1) @ excluding Bihar, Jharkhand and Meghalaya. (2) # excluding Bihar, Jharkhand and Maharashtra. (3) Total may not tally due to rounding off. (4) NA - not applicable.

7.4.2 The net cultivated area formed 96.0 percent of total operated area of Scheduled Castes and 90.3 percent of Scheduled Tribes at all-India level. Similarly, land uncultivated area constituted 3.2 percent and 7.7 percent of operated area for Scheduled Castes and Scheduled Tribes respectively. Land not available for cultivation, formed small fraction of 0.9 percent and 2.1 percent respectively for these two social groups.

7.4.3 For Scheduled Castes holdings, Delhi was the only State where the entire operated area was under cultivation during 2005-06. The percentage of net cultivated area to the total operated area was higher than the national average of 96.0 percent in the States of Andhra Pradesh, Assam, Chhattisgarh, Dadra & Nagar Haveli, Goa, Gujarat, Haryana, Karnataka, Madhya Pradesh, Manipur, Orissa, Punjab, Tamil Nadu, Uttar Pradesh and West Bengal, while Himachal Pradesh had the lowest proportion of 69.6 percent under cultivation among all the States/UTs. Himachal Pradesh also had the highest figure of 21.7 percent of operated area under land unutilized. The land not available for cultivation was the highest in Kerala (20.0 percent) among all the States followed by Tripura (11.5 percent), Himachal Pradesh (8.7 percent), Sikkim (6.9 percent), Daman & Diu (5.7 percent), Jammu & Kashmir (5.0 percent) and Pondicherry (3.3 percent).

7.4.4 In case of Scheduled Tribes, entire operated area in Manipur, Goa, Gujarat and Mizoram was under cultivation during 2005-06, while in Nagaland, it was at the lowest (40.0 percent). Proportion of land unutilised was highest in Nagaland at 46.2 percent of total operated area followed by Arunachal Pradesh (32.4 percent), Himachal Pradesh (20.6 percent), Jammu & Kashmir (17.8 percent) and Sikkim (16.8 percent) which are all hilly States. Land not available for cultivation accounted for 2.1 percent of total operated area in 2005-06 which was almost equal to the figure of 2000-01 (2.16 percent). However, in States like Nagaland it was as much as 14.0 percent followed by Sikkim (10.3 percent), Arunachal Pradesh (10.0 percent), Kerala

(9.0 percent), Jammu & Kashmir (8.4 percent), Himachal Pradesh, Tripura and Lakshadweep (7 percent) each.

(C) IRRIGATION

7.5 Irrigation Status

7.5.1 The percentage distributions of net irrigated area to net area sown in each State for holdings of Scheduled Castes and Scheduled Tribes in 2005-06 are given in Table 7.13 and Table 7.14 respectively.

Table 7.13: Percentage of net irrigated area to net sown area of Scheduled Castes, 2000-01[@] and 2005-06[#]

7.5.2 The irrigated proportion of net area sown including wholly/partly irrigated holdings, of Scheduled Castes holdings in the country was 45.2 percent in 2005-06 against 37.0 percent in 2000-01. In Delhi, net sown area was completely irrigated while percentage of net irrigated area to net sown area was higher than the all India average of 45.2 percent in States of Haryana (98.5 percent), Punjab and Pondicherry (94.5 percent) each, Uttar Pradesh (87.0 percent), Tamil Nadu (61.6 percent) and West Bengal (55.4 percent). Percentage of net irrigated area fell below national average of 45.2 percent in remaining States.

7.5.3 The Scheduled Tribes holdings had much lower proportion of net area irrigated (20.2 percent) as compared to respective percentages of Scheduled Castes (45.2 percent) and All

Social Groups (46.8 percent). The percentage of net irrigated area to net sown area was above the all India average of 20.2 percent in the States of Uttarakhand (67.4 percent), Rajasthan (49.9 percent), West Bengal (39.2 percent), Himachal Pradesh (38.7 percent), Uttar Pradesh (33.9 percent), Jammu & Kashmir (31.9 percent), Tamil Nadu (29.1 percent), Goa (28.8 percent), Arunachal Pradesh (27.9 percent), Andhra Pradesh (26.7 percent), Nagaland (23.9 percent), Meghalaya (21.8 percent) and Karnataka (20.5 percent).

7.6 Source-wise irrigated area

7.6.1 The distribution of irrigated area, in percentage, by source in each State for Scheduled Castes holdings in 2005-06 may be seen in Table 7.15.

Table 7.15: Area irrigated, in percentage, of Scheduled Castes in each State by source of irrigation, 2000-01[@] and 2005-06[#]

Sl. No.	States/UTs	Source of irrigation					Total
		Canals	Tanks	Wells	Tubewells	Other

Note: (1) @ excluding Bihar, Jharkhand and Meghalaya. (2) # excluding Bihar, Jharkhand and Maharashtra. (3) Figures in brackets are for 2000-01. (4) Total may not tally due to rounding off. (5) NA - not applicable. (6) Neg - negligible.

7.6.2 Irrigation by tubewell was the most important source for Scheduled Castes holdings like All Social Groups, accounting for as much as 41.8 percent at all India level in 2005-06. Canals formed the next important source of irrigation having a proportion of 28.9 percent followed by wells (14.8 percent) and tanks (5.0 percent). Remaining 9.5 percent area was accounted for by 'other' sources.

7.6.3 The States which in proportion of area irrigated by tubewell were higher than all India average of 41.8 percent were Punjab (83.9 percent), Uttar Pradesh (64.0 percent), West Bengal (58.0 percent), Uttarakhand (57.0 percent), Haryana (53.8 percent) and Daman & Diu (50.0 percent). In respect of canal irrigation, after Dadra & Nagar Haveli (100.0 percent) Chhattisgarh had the highest proportion of 90.2 percent followed by Jammu & Kashmir (87.0 percent), Orissa (75.0 percent), Pondicherry (65.0 percent), Haryana (42.2 percent), Karnataka (39.6 percent), Rajasthan (34.8 percent), Tamil Nadu (32.1 percent) and Goa (31.5 percent). Tamil Nadu had the highest proportion of about 26.0 percent of area irrigated by tank followed by Andhra Pradesh (17.0 percent), West Bengal (10.9 percent) and Karnataka (9.3 percent). In irrigation by Well, as against all India average of 14.8 percent, the States having higher proportions were Daman & Diu (100.0 percent), Madhya Pradesh (46.3 percent), Rajasthan and Gujarat (about 34.0 percent) each, Tamil Nadu (32.7 percent), Kerala (29.0 percent) and Karnataka (15.6

percent). The State of Andhra Pradesh (14.5 percent) was almost at par with all India average of 14.8 percent.

7.6.4 The distribution, in percentage, of irrigated area by source in each State for Scheduled Tribes holdings in 2005-06 is given in Table 7.16.

Table 7.16: Area irrigated, in percentage, of Scheduled Tribes in each State by source of irrigation, 2000-01[@] and 2005-06[#]

Note: (1) @ excluding Bihar, Jharkhand and Meghalaya. (2) # excluding Bihar, Jharkhand and Maharashtra. (3) Figures in brackets are for 2000-01. (4) Total may not tally due to rounding off. (5) NA - not applicable. (6) Neg - negligible.

7.6.5 Unlike All Social Groups and Scheduled Castes, Canals were the most important source of irrigation, accounting for as much as 28.8 percent of irrigated area in the country in 2005-06 in case of Scheduled Tribes holdings followed by wells (26.0 percent) and tubewells (19.5 percent). 'Other' sources accounted for 20.3 percent of irrigated area. Irrigation by tanks was at the lowest of 5.4 percent of total irrigated area in the country in 2005-06.

7.6.6 The maximum proportion of area irrigated by canals in 2005-06 was in the State of Mizoram (89.6 percent) followed by Chhattisgarh (75.9 percent), Dadra & Nagar Haveli (68.4 percent), Orissa (56.2 percent), Jammu & Kashmir (47.3 percent), Karnataka (45.5 percent), Gujarat (36.0 percent) and Goa (31.7 percent) which were above all India average of 28.8 percent).

7.6.7 Irrigation by tanks was the highest in Andhra Pradesh (21.5 percent) followed by West Bengal (15.9 percent), Tamil Nadu (7.2 percent), Kerala (6.8 percent), Orissa (6.1 percent), Karnataka (5.7 percent) etc. Irrigation by wells was much popular among Scheduled Tribes holdings after canals as about 75.0 percent of net area was irrigated by wells in Tamil Nadu followed by Daman & Diu (66.7 percent), Rajasthan (43.5 percent), Madhya Pradesh (41.5 percent), Gujarat (40.4 percent), Andhra Pradesh (15.9 percent), Goa (14.6 percent), Karnataka and Kerala (12.5 percent) each. Proportion of area irrigated by tubewells was the highest in Uttarakhand (66.2 percent) followed by West Bengal (45.3 percent), Uttar Pradesh (42.3 percent), Daman & Diu (33.3 percent), Andhra Pradesh (30.9 percent) and Rajasthan (26.6 percent). In hilly regions, like Arunachal Pradesh, Assam, Manipur, Meghalaya, Nagaland, Sikkim, Tripura, Himachal Pradesh and Jammu & Kashmir, 'other sources' like lift irrigation etc. were used for irrigation by Scheduled Tribes holdings during 2005-06.

7.7 Dispersal of operational Holdings

7.7.1 Dispersal of number and area of operational holdings, of Scheduled Castes holdings, State-wise, during 2005-06 may be seen in Table 7.17.

Table 7.17: State-wise dispersal of number and area of operational holdings for Scheduled Castes, 2005-06*

(Number in '00)
(Area in '00 ha.)

Sl. No.	States/UTs	Total Holdings		Operational Holdings Whose Operated Area is Located						Operational Holdings Whose Operators Reside Outside the Tehsil	
				Entirely in the Village of Residence		Partly in the Village of Residence and Partly in Other Villages(s) Within the Same Tehsil		Entirely outside the Village of Residence but Within the Same Tehsil

Note: (1) * excluding Bihar, Jharkhand and Maharashtra. (2) Neg - Negligible. (3) Figures in brackets are percentages. (4) Total may not tally due to rounding off.

7.7.2 At All India level, 95.8 percent of holdings had their entire operated area within the village of residence. All the holdings in the States of Dadra and Nagar Haveli, Daman & Diu, Delhi and Manipur were located entirely within the village of residence of the holders. Also, in States like Assam, Chhattisgarh, Gujarat, Haryana, Jammu & Kashmir, Karnataka, Madhya Pradesh, Kerala, Punjab, Sikkim, Tamil Nadu, Tripura, Uttar Pradesh and Uttarakhand, the concentration of operational holdings within village of residence was above the all India average of 95.8 percent and in remaining States, it was below the all India average. Likewise, against all India average of 94.2 percent of operated area lying entirely within the village of residence, the States of Assam, Chhattisgarh, Gujarat, Haryana, Jammu & Kashmir, Karnataka, Punjab, Sikkim, Tamil Nadu, Tripura, Uttar Pradesh and Uttarakhand had higher proportions of area ranging between 94.9 percent to 99.9 percent. Only a small proportion of 4.2 percent of number of holdings and 5.8 percent of operated area were scattered either partly in the village of residence and partly in other villages within the same Tehsil or entirely outside the village of residence but within the same Tehsil or holdings of deemed cultivators. As against all India average of 2.3 percent in number of holdings and 3.4 percent in operated area i.e. (2.3 percent, 3.4 percent), under category of holdings lying partly in the village of residence and partly in other villages within the same Tehsil/Block, West Bengal had highest proportion (9.7 percent, 14.9 percent) followed by Orissa (7.5 percent, 10.6 percent), Himachal Pradesh (5.1 percent, 7.0 percent), Uttarakhand (2.4 percent, 4.9 percent) and Kerala (1.7 percent, 6.8 percent). Against all India average of 1.8 percent in number of holdings and 2.2 percent in operated area, in the category of operated area lying entirely outside the village of residence but within the same Tehsil Andhra Pradesh, Goa, Karnataka, Orissa and Rajasthan had higher proportions than it.

7.7.3 The dispersal of number and area of operational holdings, State-wise, for Scheduled Tribes holdings during 2005-06 is given in Table 7.18.

Table 7.18: State-wise dispersal of number and area of operational holdings of Scheduled Tribes, 2005-06*

(Number in '00)

(Area in '00 ha.)

Note: (1) * excluding Bihar, Jharkhand and Maharashtra. (2) Neg - Negligible. (3) Figures in brackets are percentages. (4) Total may not tally due to rounding off.

7.7.4 Only small proportion of about 2.5 per cent of operated area and 2.1 percent of number of holdings was scattered partly in the village of residence and partly in other villages located within the same Tehsil. About 1.4 percent of number of holdings and 1.0 percent of corresponding operated was lying either entirely outside the village of residence but within the same Tehsil or of holdings belonging to deemed cultivators. The entire operated area of Scheduled Tribes operational holders in the States of Meghalaya, Dadra & Nagar Haveli and Lakshadweep was located within the village of residence. In other States, viz. Arunachal Pradesh, Assam, Chhattisgarh, Gujarat, Jammu and Kashmir, Madhya Pradesh, Manipur, Mizoram, Nagaland, Tamil Nadu, Tripura and Uttar Pradesh, almost entire operated area (99.0 percent and above) was located within the village of residence. Among States, Himachal Pradesh had the highest proportion of 19.8 percent holdings and 34.7 percent area (19.8 percent, 34.7 percent) under the category of holdings lying partly in the village of residence and partly in other villages located within the same Tehsil followed by West Bengal (11.9 percent, 18.5 percent), Uttarakhand (8.8 percent, 18.0 percent), Orissa (5.0 percent, 6.7 percent), Kerala (4.1 percent, 8.5 percent), Sikkim (3.7 percent, 11.3 percent), Rajasthan and Goa (1.8 percent, 4.0 percent) each. For all India average of 1.3 percent in number of holdings and 1.0 percent of operated area i.e. (1.3 percent, 1.0 percent) in the category of holdings lying entirely outside the village of residence but within the same Tehsil, Andhra Pradesh (5.0 percent, 4.0 percent), Goa (2.5 percent, 1.2 percent), Karnataka (2.3 percent, 2.2 percent), Rajasthan (2.7 percent, 2.7 percent) and West Bengal (1.9 percent, 1.7 percent) had higher proportions in number of holdings and corresponding area operated.

(D) CROPPING PATTERN

7.8 Gross Cropped Area

7.8.1 The State-wise distribution of gross cropped area of holdings of Scheduled Castes in 2005-06 may be seen in Table 7.19 and Table 7.20.

Table 7.19: State-wise Gross Cropped Area of Scheduled Castes, 2005-06*

(Area in '00 ha.)

Note: (1) @ excluding Bihar, Jharkhand and Meghalaya. (2) * excluding Bihar, Jharkhand and Maharashtra. (3) Total may not tally due to rounding off. (4) NA - not applicable.

7.8.4 Out of gross cropped area operated by Scheduled Tribes holdings, Madhya Pradesh alone accounted for 23.6 percent followed by Chhattisgarh (14.9 percent), Rajasthan (13.0 percent), Orissa (12.5 percent), Andhra Pradesh (6.9 percent), Gujarat (6.5 percent), Karnataka (4.9 percent) and West Bengal (3.7 percent). These eight States together accounted for 86.0 percent of total gross cropped area of Scheduled Tribe holdings. In case of irrigated area, Rajasthan had the highest proportion of 26.0 percent of total irrigated area of Scheduled Tribes holdings followed by Madhya Pradesh (18.9 percent), Andhra Pradesh (9.8 percent), Orissa (8.9 percent), West Bengal (7.2 percent), Karnataka (5.4 percent), Gujarat (5.3 percent) and Chhattisgarh (4.7 percent).

7.9 Intensity of Cropping

7.9.1 The State-wise intensity of cropping of Scheduled Castes holdings, in 2005-06, may be seen in Table 7.23.

Table 7.23: State-wise Intensity of Cropping of Scheduled Castes, 2005-06*

7.10.2 In case of Scheduled Castes holdings, for all crops taken together, among all the States, Uttar Pradesh had the highest proportion of 21.3 percent of total gross cropped area in the country followed by Rajasthan (17.3 percent), West Bengal (13.9 percent), Madhya Pradesh (12.3 percent), Karnataka (8.2 percent), Andhra Pradesh (7.1 percent) and Orissa (4.9 percent). These seven States together accounted for 85.0 percent of total cropped area in the country. Under food crops category also, Uttar Pradesh had highest proportion of 25.9 percent of total area under food crops in the country followed by West Bengal (14.8 percent), Rajasthan (13.6 percent), Madhya Pradesh (9.4 percent), Karnataka (7.9 percent), Andhra Pradesh and Orissa (6.0 percent) each accounted for about 84.0 percent of total area under food crops in the country. The sequence observed in case of cereals was Uttar Pradesh (27.0 percent), West Bengal (16.1 percent), Rajasthan (12.3 percent), Karnataka and Madhya Pradesh (7.4 percent) each, Orissa (6.3 percent), Andhra Pradesh (5.2 percent), Chhattisgarh (4.9 percent) and Tamil Nadu (3.9 percent). In pulses, Rajasthan had largest proportion of area of 24.5 percent of total area under pulses in the country followed by Madhya Pradesh (22.0 percent), Uttar Pradesh (17.7 percent), Karnataka (11.3 percent), Andhra Pradesh (8.5 percent), Orissa (6.3 percent) and Chhattisgarh (4.1 percent) accounted for about 95.0 percent of total area under pulses in the country. In regard to area under oilseeds, Madhya Pradesh had the largest proportion of 30.8 percent of total area under the crop in the country followed by Rajasthan (27.1 percent), Andhra Pradesh and Karnataka (about 11.0 percent) each, Uttar Pradesh (6.1 percent) and West Bengal (5.5 percent) covered together about 92.0 percent of total area under Oilseeds in the country. West Bengal had more than 1/3rd of total area under fibre in the country (36.2 percent) followed by Andhra Pradesh (17.6 percent), Gujarat (15.3 percent), Rajasthan (12.0 percent), Madhya Pradesh (7.4 percent) and Karnataka (5.6 percent). In case of area under fodder crops, Rajasthan had covered more than 3/4th of total area under this crop in the country (78.4 percent) followed by Madhya Pradesh (10.8 percent), Uttar Pradesh (3.1 percent) and Punjab (2.2 percent). In floriculture crops, West Bengal had the highest share of 31.0 percent of total area under floriculture crops in the country followed by Tripura (28.0 percent), Tamil Nadu (18.8 percent), Karnataka (10.1 percent), Andhra Pradesh (7.3 percent) and Rajasthan (1.3 percent). Further, proportion of area

under non-food crops was the highest in Rajasthan (30.6 percent) followed by other States like Madhya Pradesh (22.7 percent), West Bengal and Andhra Pradesh (10.8 percent each), Karnataka (8.9 percent), Gujarat and Uttar Pradesh (5.0 percent) each.

7.11 Intensity of Cropping

7.11.1 The State-wise intensity of cropping of holdings of Scheduled Tribes during 2005-06 is given in Table 7.25.

Table 7.25: State-wise Intensity of Cropping of Scheduled Tribes, 2005-06*

(Area in '00 ha.)

Sl. No.	States/UTs	Gross Cropped Area	Net Sown Area	Intensity of Cropping (3/4)	
1	2	3	4	5	
1	Andhra Pradesh	10165	9684	1.0496	(1.0419)
2	Arunachal Pradesh	2080	1664	1.2501	(1.0765)
3	Assam	4784	4668	1.0248	(1.0358)

25	Uttarakhand	783	446	1.7555	(1.7339)
26	West Bengal	5514	3808	1.4478	(1.3706)
27	A & N Islands	0	0	0.0000	(0.0000)
28	Chandigarh	0	0	0.0000	(0.0000)
29	D & N Haveli	169	168	1.0060	(1.0085)
30	Daman & Diu	2	2	1.0000	(1.2392)
31	Delhi	0	0	0.0000	(0.0000)
32	Lakshadweep	22	22	1.0005	(1.0029)
33	Pondicherry	0	0	0.0000	(0.0000)
	All India	147631	128532	1.1486	(1.0970)

Note: (1) * excluding Bihar, Jharkhand and Maharashtra. (2) Total may not tally due to rounding off. (4) NA - not applicable. (5) Figures within brackets are for 2000-01.

7.11.2 Against all India average of 1.1486, Uttarakhand recorded highest intensity of cropping at 1.7555 among all States/UTs followed by Himachal Pradesh (1.522), West Bengal (1.4478), Jammu & Kashmir (1.4268), Uttar Pradesh (1.3954), Rajasthan (1.3484), Arunachal Pradesh (1.2501), Kerala (1.207), Madhya Pradesh (1.1937) and Nagaland (1.1704) which were higher than national level of 1.1486. It appears from the statement that there was almost single cropping system prevailed among Scheduled Tribes holdings during 2005-06 in Goa, Gujarat, Mizoram, Dadra & Nagar Haveli, Daman & Diu and Lakshadweep.

7.12 State-wise Area under Principal Crops

7.12.1 The State-wise distribution, in percent, of area under principal crops of Scheduled Tribes holdings in 2005-06 may be seen in Table 7.26(a) and 7.26(b).

Table 7.26(a): State-wise Distribution of Percent of Area under Principal Crops (Food Crops) of Scheduled Tribes, 2005-06*

Note: (1) * excluding Bihar, Jharkhand and Maharashtra. (2) Total may not tally due to rounding off. (3) Neg - negligible.

7.12.2 Considering all crops together, among all the States, Madhya Pradesh had the highest share, accounting for 23.6 percent of total cropped area in the country followed by Chhattisgarh (14.9 percent), Rajasthan (13.0 percent), Orissa (12.5 percent), Andhra Pradesh (6.9 percent), Gujarat (6.5 percent), Karnataka (4.9 percent), West Bengal (3.7 percent) and Assam (3.2 percent) accounted together for 89.0 percent of total cropped area in the country. Also, Madhya Pradesh had the maximum proportion of 19.8 percent of total area under food crops in the country followed by Chhattisgarh (18.0 percent), Orissa (14.8 percent), Rajasthan (10.2 percent), Gujarat (6.9 percent), Andhra Pradesh (5.9 percent), Karnataka and West Bengal (4.2 percent) each covering an area of 84.0 percent of total food crops in the country. The sequence of area observed under cereal crops was Chhattisgarh (20.4 percent), Madhya Pradesh (18.6 percent), Orissa (15.5 percent), Rajasthan (10.7 percent), Gujarat (6.6 percent), Andhra Pradesh (4.8 percent), West Bengal (4.5 percent), Assam and Karnataka (4.0 percent) each. Madhya Pradesh had the largest proportion of area, accounting for, nearly 38.0 percent of total area under pulses followed by Orissa (13.4 percent), Chhattisgarh (10.6 percent), Rajasthan (9.8 percent), Andhra

Pradesh (8.8 percent), Gujarat (7.8 percent), Karnataka (5.3 percent) indicated together about 94.0 percent of total area under pulses in the country. Madhya Pradesh had also the largest proportion of 42.0 percent of total area under oilseeds in the country followed by Rajasthan (31.0 percent), Karnataka (9.5 percent), Andhra Pradesh (6.5 percent), Orissa (3.1 percent) and Chhattisgarh (2.5 percent). These six States together covered about 95.0 percent of total area under Oilseeds in the country. Madhya Pradesh had again the highest proportion of 39.2 percent of total area under fibre in the country followed by Andhra Pradesh (30.1 percent), Gujarat (14.1 percent), Karnataka (4.7 percent), West Bengal (4.6 percent), Orissa (2.8 percent) and Rajasthan (2.6 percent). Rajasthan had the highest proportion of 41.4 percent of total area under fodder crops in the country followed by Madhya Pradesh (33.3 percent) and Gujarat (18.4 percent). In case of floriculture crops, Tripura had the highest share of about 80.0 percent of total area under floriculture crops in the country followed by Karnataka (6.3 percent), Gujarat (3.6 percent) and Tamil Nadu (2.8 percent). The proportion of area under non-food crops was at the maximum of 39.4 percent in Madhya Pradesh while Rajasthan was at the next (24.7 percent) followed by Andhra Pradesh (11.2 percent), Karnataka (8.0 percent), Gujarat (4.8 percent) and Orissa (3.1 percent).
