**CONCEPTS AND DEFINITION OF TERMS**

**Holding** is any piece or pieces of land used wholly or partly for any agricultural activity and operated as one technical unit by one person alone or with others regardless of title, legal form, size or location.

**Parcel** refers to one contiguous piece of land under one form of tenure without regard to land use. Both the contiguity and one form of tenure conditions should be met for a piece of land to be classified as one parcel. Contiguous means that the piece of land is not separated by natural or man-made boundaries such as river, dike, road and others that are not part of the holding.

**Physical Area** refers to the size or actual measurement of the parcel.

**Tenure Status** means the right under which a parcel is held or operated. A parcel must be of one tenure type. A holding may be operated under a single form of tenure or under more than one form in which case each form of tenure must be reported by parcel.

**Main use of the parcel** refers to the activities such as growing crops, raising livestock or cultivating/culturing fish, and other agricultural activities, carried out on the parcel making up the holding with the intention of obtaining products and/or benefits. For purposes of 2012 CAF, the **main use of the parcel** is based on the largest area devoted to a particular purpose such as under temporary crops, under permanent crops, temporary fallow, under temporary meadows and pasture, under permanent meadows and pasture, covered with wood and forest, under livestock and poultry raising, and under aquaculture.

**Raising of livestock and poultry** is the rearing or farming of animals mainly for agricultural purposes. The animals are usually kept or reared in captivity for meat or for harvest of animal products such as eggs, milk, and others.

**Livestock** are domesticated animals with four legs kept or reared in captivity mainly for agricultural purposes. This includes carabao, cattle, sheep, goats, and swine. Also included are breeder dogs and race horses for sale.

**Poultry** is a collective term for all domesticated avian kept or reared in captivity mainly for agricultural purposes. This includes chickens, ducks, quail, geese, turkey, pigeon, and ostrich.

**Growing Capacity** refers to the maximum number of livestock/poultry that can be raised in livestock/poultry houses or farms, either in conventional or under climate controlled system.

**Breeder** refers to an animal raised to improve or maintain the bloodline of the present stock.

**Broiler** refers to strains of foreign breeds of chicken, especially raised for meat production only. Usually disposed of at five to six weeks old.

**Layer** refers to foreign strain female chicken regardless of age, raised mainly for table egg production.

**Contract Grower** is one who raises the animals for the integrators or for other economic units under certain conditions. The grower provides the housing or the area where to raise the animals, feeds the animals, and provides the utilities and other miscellaneous expenses. Usually, the chicks or the piglets, feeds, and vaccines are supplied by the integrator or another party. The grower is then paid an agreed fee in exchange for his labor, management, and use of facilities.

**Integrator** is one who provides all the intermediate inputs required, such as chicks (in the case of poultry), feeds, vaccines, and technical services. Once the animals have grown, the integrator handles the marketing.

**Individual Grower** is one who operates a livestock/poultry farm on his/her own account.
