PREFACE

During the period from 1 to 15 June 2007, the State Statistical Office of the Republic of Macedonia carried out the Census of Agriculture in the Republic of Macedonia, which as specific statistical operation, was carried out for the first time in about 40 years.

The reference date of this Census was the situation on 31 of May 2007, and for certain questions the data referred to the period of one year prior to the Census, i.e. from 1 June 2006 to 31 May 2007.

The Census was carried out according to the Law on Census of Agriculture in the Republic of Macedonia, 2007 ("Official Gazette of the Republic of Macedonia" No 39/06 and 113/06).

The methodology, the definitions and the standards for this Census are harmonized with the statistical practice in the Republic of Macedonia, as well as with the Recommendations of the Statistical Office of the European Union- EUROSTAT and the Food and Agriculture Organisation of the United Nations -FAO.

Book II, in which the final results of the Census of agriculture, 2007 are presented, contains 33 tables with data on agriculture and forestry in the Republic of Macedonia, according to more topics covered by the Census. The data are presented on national and on municipal level, in accordance to the existing territorial division of the Republic of Macedonia.

We hope that by publishing the edition "Census of Agriculture, 2007", the statistical data users will have a possibility to get the most of the necessary data. Certainly, for all additional data needs from the Census that are not included in this edition, the State Statistical Office will provide access through the many forms of dissemination, in accordance with the Policy on dissemination of the Census of Agriculture.

METHODOLOGICAL EXPLANATIONS

ENUMERATION PERIOD

The Census of Agriculture in the Republic of Macedonia was conducted in the period from 1 to 15 June 2007. The data in the Census forms have been recorded according to the situation on 31 May 2007, and for certain questions the data refer to the period of one year prior to the Census, namely from 1 June 2006 to 31 May 2007.

The state of specific phenomenon at determined temporal intersection in statistics is called “reference date/period of the Census”.

METHOD OF ENUMERATION

The Census was organised according to the concept of complete coverage (“door to door”), which means that during the Census all households on the territory of the Republic of Macedonia were visited and recorded. The Census was carried out by trained, authorised persons (enumerators) by interviewing (face to face interview) and the data were recorded in printed census forms (questionnaires).

Data on business entities and the local units that perform agricultural production are filled in by an authorised person, verified by the responsible person - manager/head of the business entity and delivered by post to the State Statistical Office.

Basic census forms used in the Census were:

- **Form ZEM.P.1 (Questionnaire for Individual Agricultural Holdings)** - for each individual agricultural holding, as well as for a household that owns forest or fish pond;
- **Form ZEM.P.2 (Questionnaire for Business Entities)** - for each business entity and local unit covered by the Census.

UNITS COVERED BY THE CENSUS

The following units were covered by the Census:

- Individual agricultural holdings
- Households that own forest
- Households that own fish pond
- Business entities and the local units which in accordance to the National Classification of Activities, by main activity are distributed in the sector of Agriculture, hunting and forestry and
- Business entities and the local units which in accordance to the National Classification of Activities, by main activity are not distributed in the sector of Agriculture, hunting and forestry, but which perform activities in this sector (agricultural schools, borstals, agricultural scientific institutes, religious communities and other).

INDIVIDUAL AGRICULTURAL HOLDINGS

Individual agricultural holdings are economic units of agricultural production which meet the following requirements:

- they use 1000 m² of agricultural area or more or,
- they use less than 1000 m² of agricultural land or do not use one at all, but which own certain minimum number of livestock, poultry or beehives:

- 1 cow and 1 calve, or
- 1 cow and 1 heifer, or
- 1 cow and two adult heads of small livestock, or
- 5 adult sheep or goats, or
- 3 adult pigs, or
- 4 adult sheep or goats and pigs together, or
- 50 numbers of adult poultry, or
- 20 beehives.

As exception, here are also included the households that have agricultural production, but do not meet the requirements for individual agricultural holding, if the agricultural production is the unique source of income for those households.

FOREST

A forest is every area over 500 m² overgrown with forest trees in the form of stands and is used for production of forest assortments or has a protective function or a special purpose.

FISH POND

A fish pond is limited, closed space for rearing fish and which can be filled with water and emptied. As integral part of the fish pond are considered the channels for bringing water into and discharging it from the fish pond.

Business entity - all legal and natural persons who perform an activity, with headquarter on the territory of the Republic of Macedonia, registered by a competent authority in accordance to the law i.e. established by the law, as well as the organisational units of foreign companies and foreign sole proprietors that perform activity on the territory of the Republic of Macedonia.

Local unit - means subsidiary, representative office or other organisational unit (store, warehouse, plant and other), organised with a decision of the business entity according to the regulations of the Republic of Macedonia. The local unit does not have a function of legal person, it works for the business entity that organised it and it can perform all activities from the area of working of the business entity.

DATA ON THE HOLDING/ THE FOREST/ THE FISH POND

Data on the holding are shown at the municipality where the headquarter of the holding is located i.e. the larger part of the holding-the property.

Data on forests and fish ponds are shown at the municipality where the household that owns forest, or fish pond is situated.

USED AGRICULTURAL LAND

Used agricultural land means land used for cultivation of agricultural crops. It represents the total of the areas of used arable land and gardens, orchards, vineyards, meadows, pastures and nurseries on the agricultural land.

SEPARATE PARTS OF USED LAND

Separate part is every area of the agricultural land used by the holding, surrounded by someone else's land. The separate part can contain one or more cadastre parcels and one or more agricultural crops can be found on it (garden crops, industrial crops, orchards, meadows and other).

USED ARABLE LAND AND GARDENS

Arable land and gardens are land areas regularly cultivated and the crops are sown by determined order (crop rotation). A crop rotation is regular and pre-determined change of crops in order to use the land more efficiently.

KITCHEN GARDENS

Kitchen gardens are areas (usually by the houses) used for production of agricultural products intended for nutrition of the persons at the holding. Kitchen gardens are not included in the crop rotation.

ORCHARDS

Orchards are agricultural areas where fruit trees are cultivated, regardless of the arrangement of the stands, the distance between the trees and whether agro-technical and mechanized operations for cultivation are applied.

The data refer to the total number and the number of fruit-bearing trees, as well as to the total surface area of the fruit stands.

All fruit trees are included in the total number of fruit trees, regardless of the age and the bearing.

Fruit-bearing trees refer to fruit trees able to bear fruit during the year, regardless if they bore fruit during the current year.

VINEYARDS

Vineyards refer to areas on which stocks of grape-vines are cultivated (table and vine sorts) with usual distance of cultivation for certain sort.

Table sorts are intended for nutrition of the population in fresh condition, and the vine sorts are intended for wine, brandy and other grape processing.

Data refer to the total number and the number of bearing stocks, as well as to the total area under vineyards.

All stocks of grape - vines are included in the total number of stocks of grape - vines, regardless of how old they are.

Bearing grape-vines are those which are able to bear during the year, regardless if they bore during the current year.

MEADOWS

Meadow is land used for cultivation of grass, i.e. fodder crops and it is regularly mown several times a year, i.e. mown at least once during the vegetation season. The meadow can be sown or natural (self-sown).

PASTURES

Pasture refers to agricultural land area used for grazing the livestock during the growing season, i.e. at least once during the year. Pastures can be lowland (intensive) and hilly-mountainous (extensive).

NURSERIES

Nursery means an area of agricultural land used for seedling production, regardless of what kinds of seedlings it is used for (forest, park, fruit or grape).

FOREST LAND

Forest land is an area overgrown with forest trees, forest bushes as well as an area under forest nurseries planted on forest land. Forest land also means an area planted with windbreaks, as well as the moorlands within the forest.

OTHER LAND

The category "other land" comprises agricultural unused land and unarable land.

- Agricultural unused land is agricultural area in disposal of the holding, but which is not cultivated on the reference date due to economic, social and other reasons, i.e. which is not used for agricultural production. This area is not included in the system of crop rotation.

- Unarable land means land under buildings, roads, yards, quarries, fish ponds, ponds, rocky areas, sandy terrains etc.

TOTAL AVAILABLE LAND

The total available area of land is a sum of the total utilised agricultural land, forest land and other land.

USED ARABLE LAND, GARDENS AND KITCHEN GARDENS

Arable land, gardens and kitchen gardens refer to land area under cultivation, with cereals, industrial, vegetable and fodder crops, flowers, medical and aromatic plants, decorative plants, seed and seedling material.

If on the same area more cultures are sown or planted (simultaneously or consecutively) during the year, the area is calculated only once and the data are collected for the main crop.

Main crop is a crop with highest production value. If it is not possible to determine a main crop according to the height of the production value, then the crop present on the area for a longer period of time is considered as a main crop.

Fallow and other unsown arable land and gardens are areas included in the crop rotation, but which do not give annual yields (**fallow**) or which due to some reasons (floods, lack of water etc.) are not sown.

If these areas do not give yields more than 5 years, they are enumerated in "Other land".

VEGETABLE, FLOWERS AND DECORATIVE PLANTS

Here are enumerated areas under vegetable, flowers and decorative plants (except nurseries) in open space, under protected space and in the kitchen gardens.

Data on areas in open space refer to the areas sown with crops cultivated in open space, in crop rotation with other crops.

Areas under protected space refer to the areas under the crops which during the whole or the longer period of cultivation are covered with hard or soft plastic (plastichouses) or with glasshouses.

MIXED, COMBINED AND SUCCESSIVE SECONDARY CROPS ON ARABLE LAND

Areas of crops sown together with the main crop (mixed, combined crops), as well as areas with crops sown after the main crop is harvested (successive secondary crops) are mixed, combined and successive secondary crops on arable land and gardens.

Areas of mixed, combined and successive secondary crops are already shown within the areas of the main crop and they are not included in the area of the total used agricultural land.

LIVESTOCK BY TYPES AND CATEGORIES

The livestock is covered by types and categories, regardless if at the time of the Census it is situated at the individual agricultural holding/business entity, or in other place.

The Census covered horses, cattle, sheep, goats, pigs, poultry, hares and beehives.

Horses

Refers to the number of all horses together (colts, mares and fillies in foal, stallions and geldings), regardless of their gender, age and purpose of rearing.

Cattle up to 1 year old

Cattle **up to 1 year old** are enumerated by gender (male and female cattle heads).

Cattle from 1 to 2 years old

Cattle **from 1 to 2 years old** are enumerated by gender and purpose of rearing (male and female heads for fattening and breeding).

Cattle over 2 years old

Cattle aged **2 years and over** are also enumerated by gender and purpose of rearing (male heads-bulls and oxen and female heads - heifers, heifers in calf, dairy cows and other cows).

Male heads (bulls and oxen)

Bulls are male breeding heads.

Oxen are male castrated heads, 2 or more years old, used for work.

Heifers are female cattle, 2 or more years old, which have not calved yet.

Heifers in calf are female cattle, 2 or more years old, from which the first offspring is expected.

Dairy cows are kept mainly for milk production. Cows that are dry at the moment are included here. Dairy cows fattened after the first lactation and intended for slaughter, till the moment of the Census, are included in this category.

Other cows are female heads reared primarily for breeding and they are not milked. Cows used for work after calving, as well as other cows intended for slaughter, are also included here.

Sheep

Data on sheep refer to the number of sheep by age and purpose (lambs and tags, sheep - female breeding heads and rams and adult sheep).

Lambs and tags are young sheep of both genders, under one year old.

Female breeding sheep include female heads over one year old which have already lambed and those from which the first offspring is expected.

Rams and other sheep - refers to data on the number of all male and other heads (barren sheep, etc). Sheep for slaughter which have already lambed are also included.

Goats

Data on goats refer to the number of goats by age and purpose (nanny goats, goats-breeding dairy female heads, as well as billy goats and other adult goats).

Nanny goats are young goats of both genders, under one year old.

Goats are female breeding heads over one year old which have already kidded and those expected to have the first offspring.

Billy goats and other goats - refers to data on the number of all male and other heads (barren goats, etc). Goats for slaughter which have already kidded are also included.

Pigs

Data on pigs refer to the number of pigs by weight and purpose (porkers under 20 kg, 21-50 kg, 51-80 kg, 81-110 kg and over 110 kg, gilts, farrow gilts, sows and boars).

Gilts are selected young female heads for breeding, which have not yet farrowed.

Farrow gilts are young female heads for breeding expecting their first offspring.

Sows are female breeding heads which have farrowed at least once. Sows fattened before slaughter are not included here.

Boars are male breeding heads. Boars fattened before slaughter are not included.

Hares

The total number of hares at the holding is included, regardless of type, age, gender and purpose.

Poultry

Data refer to the number of poultry by type, purpose, gender and age.

Broilers are fattened chicken.

Egg-laying hens are hens which have already started to lay eggs, regardless if the eggs are for consumption or for hatch. Young hens before laying eggs and old egg-laying hens (intended for slaughter), are included here.

Other poultry refers to roosters, ducks, Guinea fowls, quails, pheasants and other, regardless of age, gender and purpose.

Beehives, total

Data refer to the number of beehives at the holding, regardless of the way of keeping (bee-hive, box, etc).

FACILITIES OF THE HOLDING

Every independent construction with four permanent walls covered with a roof and has one or more entrances is considered as facility of the agricultural holding.

Constructions built of poor material, brick, reeds, boards and others, basement or garret, regardless of their potential use for storing of agricultural or other products, are not considered as facilities of the holding.

The number, the surface and the volume of facilities used for the same purpose are shown as total. If facilities are older than 20 years, but have undergone complete reconstructions and/or some additions are made on them, then they are considered as 20 year-old facilities.

Surface (m²) – is information on the usable surface of the facilities with the same purpose, calculated as a sum of the usable surfaces of all parts of the constructions, measured from the interior side of the walls. Information for surface is expressed in square meters (m²).

For agricultural facilities such as swineherds, poultry houses, horse stables, livestock stables and others, only the surface under a roof is taken into consideration, while the fenced pales (outlets) which are not covered are not considered.

Capacity - volume (m³)- volume of facilities is calculated as a sum of the volumes of the separate parts of the facilities, whereupon the surface of each part is multiplied with the average height of that part.

For facilities, such as tanks and silos, the hollow is expressed in m³, without the thickness of the exterior walls and panelling, not calculating the excavations above the prescribed profile.

Facilities with more premises or more levels with different purpose are enumerated according to their predominant purpose.

The facilities of the agricultural holding, according to their purpose, are classified as facilities for livestock and poultry, facilities for organic fertilizers and other facilities of the holding.

MECHANIZATION AND EQUIPMENT

Mechanization and equipment are enumerated according to ownership and age, regardless of the type and the producer they are purchased from.

As mechanization and equipment of the holding are considered the mechanization and the equipment that are in a good order or that with some small repair could be brought in good order.

Data are collected on:

- Cultivators- tractors with one axle (with 2 wheels) such as motor-cultivator, motor-milling machine and similar;
- Four-wheel - tractors with two axles (with 4 wheels) as well as caterpillar tractors belong to this group and are divided according to the driving power expressed in kilowatts (kW), more exactly in horse power (HP).
- Combine for cereals;
- Machines for collecting agricultural products;
- Machines for sowing, planting and transplanting;
- Other machines- fertilizer spreaders, sprinklers and other;
- Equipment for irrigation- motor- pumps and pipes;
- Milking equipment;
- Grape presses;
- Other equipment- dams, ploughs, rollers, dryers and other;
- Vehicles - trucks, vans and other completely mechanized vehicles for transportation of products and materials of the individual agricultural holding;
- Tractor trailers- sum of the tractor trailers of all kinds, regardless of the capacity and the way of unloading.

AREAS TREATED WITH FERTILISERS AND PESTICIDES

Area treated with mineral fertilisers is an area treated with nitrogenous, phosphorous, potassic and mixed fertilisers.

Area treated with organic fertilisers is an area treated with fertilisers from organic origin, produced at the holding or purchased from others.

Pesticides are:

- Herbicides - pesticides used for destroying harmful grasses - weeds.
- Insecticides - pesticides used for destroying harmful insects.
- Fungicides - pesticides used for destroying fungi which cause diseases.
- Rodenticides - pesticides used for destroying harmful rodents.

IRRIGATED AREAS

Irrigated areas represent areas actually irrigated at least once in the period from 01.06.2006 to 31.05.2007. Data refer to the total irrigated area and to the irrigated area by group of crops (cereals, industrial crops, vegetable crops, fodder crops, orchards, vineyards, meadows, etc).

AREA UNDER FOREST

Area under forest represents the total area under deciduous, coniferous and mixed stands.

Pure stands of deciduous species.

Deciduous trees include all species of trees that belong to the class of Angiospermae (hidden-seeded), which refer to the broadleaved types of trees (Quercus spp. - oak, Fagus spp. - beech, Populus spp. - poplar, Robinia spp. - acacia, Acer spp.- maple-tree , etc).

Pure stands of deciduous species are considered to be those deciduous stands which are 90-100% composed of one species, according to the timber participation.

Data refer to the total area of pure stands of deciduous trees, i.e. pure stands of all species of oak, beech and other deciduous species (poplar, acacia, maple-tree, , etc.)

Pure stands of coniferous species

Coniferous trees include all types of trees that belong to the class of Gymnospermae (bare-seeded), which refer to coniferous (evergreen) types of trees (Pinus spp.- pine, Abies spp.- fir, Picea spp. - spruce, Larix spp. - larch Cedrus spp.- cedar, etc.).

Pure stands of coniferous species are considered to be those coniferous stands which are 90-100% composed of one species, according to the timber participation.

Data refer to the total area of pure stands of coniferous trees, i.e. pure stands of pine, fir and other coniferous species.

Mixed (deciduous and coniferous)

Mixed stand is a stand of different species of trees in which beside the basic species, other species participate with more than 10%, according to the timber participation.

TIMBER HARVESTED IN AND OUTSIDE FORESTS

Total timber harvested covers harvested logs (deciduous and coniferous), fuel wood, all produced forest assortments (panelled wood, commercial timber, etc) and total scraps.

Data refer to the timber harvested in forest, i.e. timber harvested on cutting place and other forest areas, regardless of the type of harvest, as well as data on timber harvested outside forest, i.e. timber harvested from milestones stems, alleys, windbreaks, park species, etc.

AFFORESTATION

The term afforestation represents a measure of regenerating and extending forests. It is carried out by planting seedling forest species of trees or by sowing seed material of forest species of trees in or outside forest (on forest or other land).

NURSERIES (refers to forestry)

The term nursery means area where production of seedlings of forest and decorative species of trees is organised, by different technologies (by classical way, by containers, etc), regardless if they are on agricultural or forest land.

SURFACE AND CAPACITY OF THE FISHPOND

Data on fishpond area refer to area used for spawning and keeping the offspring and the consumption fish (trout, carp and other fish).

Data on the capacity refer to the total fishpond capacity regardless if temporarily it is or it is not used for spawning and keeping the offspring and the consumption fish.

HOUSEHOLD MEMBERS WORKING AT THE INDIVIDUAL AGRICULTURAL HOLDINGS

Members of the household/households that work at the individual agricultural holdings were covered by the Census.

Persons aged 15 years and over that work at the individual agricultural holdings, are classified according to the educational attainment, the age and the sex.

Educational attainment means the type of school where the person has acquired the highest level of education.

Principal activity means an activity performed at the individual agricultural holding during most of the year, i.e. an activity which most of the time is spent on.

The type of activity is descriptive determination of the holder, i.e. the member of the household, whether the work is:

- only activity - if the agricultural activities are his/her only activities, i.e if the person is not engaged with no other activity out of the agricultural activities;
- principal activity - if persons spend most of their working time (working hours) on agricultural activities;
- additional activity - if the person spends most of the working time on non-agricultural activities;
- occasional activity - if the person performs the agricultural activities only as a temporary job.

SEASONALLY ENGAGED PERSONS BY THE HOLDING WHO ARE NOT MEMBERS OF THE HOUSEHOLD/ HOUSEHOLDS

Seasonally engaged persons are the persons who performed some agricultural activities at the holding periodically, during the reference period. The period of one year is taken as a reference period because the work at the holding is temporary, in specific periods of the year (seasonal work).

Seasonally engaged persons by the individual agricultural holding are distributed according to the number of performed working hours. These persons are not members of the household/ households.
