## UGANDA HOST REFUGEE DATASETS ON FOOD AND AGRICULTURE MICRODATA (FAM) CATALOGUE

## Overview

The panel is constructed by four data collection waves conducted in 2017, 2018, 2019, 2020 and 2021. The total sample over the four waves gives us 20,070 observations.

## Sample distribution by waves

	First	Second	Third	Fourth	Total
1 observation	758	16	0	1,293	2,067
2 observations	1,207	477	373	473	2,530
3 observations	1,989	1,252	1,525	1,588	6,354
4 observations	2,282	2,282	2,282	2,282	9,128
Total	6,236	4,027	4,180	5,636	20,079

The balanced sample comprises of 2,282 observations, which brings us to 9128 observations in total. Of the 9128 observations, 4740 are host households while 4388 are refugee households.

## Breakdown of sample distribution by year rounds

	Waves						
	First (baseline)			Second	Third	Fourth	Total
	2017	2018	2019acrei	2019	2020	2021	
1 observation	419	79	260	16	0	1,293	2,067
2 observations	622	91	494	477	373	473	2,530
3 observations	1,018	140	831	1,252	1,525	1,588	6,354
4 observations	975	395	912	2,282	2,282	2,282	9,128
Total	3,034	705	2,497	4,027	4,180	5,636	20,079
