STUDY TYPE

Other Household Survey [hh/oth]

ABSTRACT

In order to make the progressive Uganda refugees policy successful in the medium- and long-term, the refugees' response needs to facilitate their inclusion in the country's development agenda. No longer focusing exclusively on short-term, life-saving interventions, the response should act as a vector for refugees' integration in the economy; improving the management of land, water, and natural resources; exploiting the socio-economic opportunities associated with the refugees' presence, skills, and development; and strengthening the hosting districts' capacity to absorb and manage these resources. The positive impact would affect refugees, host communities, and hosting districts alike, thus moving towards social and economic integration. In August 2017, FAO was asked by the Commissioner for Refugees (Office of the Prime Minister of Uganda, OPM) to support the implementation of a socio-economic analysis within the refugees' settlements and host communities, with the aim of providing a comprehensive assessment of the current state of the refugees' food security, well-being and resilience. Although refugees in Uganda are given land and mobility rights, their food security remains low, with a high dependency on food aid. The assumption was that by better understanding refugees' preferences and livelihoods strategies which determine their resilience, it would be possible to unlock the development potential of the land, increase productivity and help them achieve independence and self-reliance. The Uganda 2020 Resilience Index Measurement and Analysis (RIMA) measures the food security and resilience of refugees and host communities in Northern Uganda. The survey was administered between November and December, 2020.

KIND OF DATA

Sample survey data [ssd]

UNIT OF ANALYSIS

Households

Scope

NOTES

The description of scope for the survey includes: - Socio-demographic characteristics of households; - Food security, including a detailed food consumption module, and well-being; - Shocks, assistance, perceived resilience capacity, coping strategies, and aspirations; - Access to basic services; - Employment; - Agricultural and livestock production, - land ownership and rights - Covid 19

Coverage

GEOGRAPHIC COVERAGE

Regional coverage

UNIVERSE

Refugees and host community households (Households living near settlements)

Sampling

SAMPLING PROCEDURE

The sampling strategy of the third wave was to re-interview all the refugee and host households interviewed in the first wave (between 2017 and 2019) plus the households in the Koboko district visited for the first time during December 2019. The field teams targeted the households interviewed in the first wave, interviewed or not during the second one. The total number of received questionnaires is 4,180. The final panel sample excluding Koboko is composed of 4,047 households. With the first-wave target of 6,236 households, we have an attrition of 35 percent.

WEIGHTING

None

Data Collection

DATES OF DATA COLLECTION

Start	End
2020-11	2020-12

DATA COLLECTION MODE

Computer Assisted Personal Interview [capi]

Questionnaires

QUESTIONNAIRES

Section A: Household details Section B1: Household Demographics Section B2: Household Demographics at the time of the first arrival to Uganda Section C: Household Assets Assessment Section Da: Household access to services Section Db: Energy and cooking fuels Section E: Household expenditure and loans Section F(1): Household Crop production details Section F(2): Household vegetable production details Section F(3): Tree-based production for the last year (January 2019 – December 2019) Section N: Livestock and fishing Section G(1): Food consumption patterns Section G(2): Coping Strategies Section H(1): Household enterprise Section H(2): Participation in Social Networks, Trainings and Enterprises Section S: Social cohesion Section J: Shocks and hazards Section W: Household Member Employment Section X: Assistance and transfers Section K: COVID-19

Data Processing

DATA EDITING

The data were collected through computer-assisted personal interviewing (CAPI) with digital tablets. The use of electronic devices reduces the duration of interviews, limits errors during the interview and data entry phases, and enables the collection of geographic information system (GIS) information at the household level. The data were transmitted daily through Kobo Toolbox, a suite of software tools for data collection in challenging environments, allowing for the use of remote data control protocols.

CONFIDENTIALITY

The users shall not take any action with the purpose of identifying any individual entity (i.e. person, household, enterprise, etc.) in the micro dataset(s). If such a disclosure is made inadvertently, no use will be made of the information, and it will be reported immediately to FAO

ACCESS CONDITIONS

Micro datasets disseminated by FAO shall only be allowed for research and statistical purposes. Any user which requests access working for a commercial company will not be granted access to any micro dataset regardless of their specified purpose. Users requesting access to any datasets must agree to the following minimal conditions:

- The micro dataset will only be used for statistical and/or research purposes;
- Any results derived from the micro dataset will be used solely for reporting aggregated information, and not for any specific individual entities or data subjects;
- The users shall not take any action with the purpose of identifying any individual entity (i.e. person, household, enterprise, etc.) in the micro dataset(s). If such a disclosure is made inadvertently, no use will be made of the information, and it will be reported immediately to FAO;
- The micro dataset cannot be re-disseminated by users or shared with anyone other than the individuals that are granted access to the micro dataset by FAO.

Disclaimer and copyrights

DISCLAIMER

The user of the data acknowledges that the original collector of the data, the authorized distributor of the data, and the relevant funding agency bear no responsibility for use of the data or for interpretations or inferences based upon such uses
