Household **savings**

+41%

Durable assets

+11%

+28%

Value of **crop production** per year

-15%

Seed use per year
(mainly due to more efficient use of seeds)

Lessons learned

Maintenance

Easier mobilization of funds to repair damaged infrastructure would ensure its sustainability.

Post-harvest storage

Greater access to cold-storage facilities is crucial to reducing post-harvest losses.

Market access

Improved linkages to markets would increase marketing capacity of farmers and cooperatives.
