## Identification

### SURVEY ID NUMBER

CHN\_2017\_GIADP-IIAS\_v01\_EN\_M\_v01\_A\_OCS

### TITLE

Guangxi Integrated Agricultural Development Project, IFAD Impact Assessment Surveys, 2017.

### COUNTRY

Name	Country code
China	CHN

### STUDY TYPE

Agricultural Survey [ag/oth]

### ABSTRACT

Improving market access of smallholder farmers in the developing world is considered an important approach to moving them out of poverty and increasing their economic mobility. In China, rural poverty has declined at a phenomenal speed within just two decades, and much of this success story is attributable to rapid income growth in rural areas. Thus, having a good understanding of how development efforts in rural China may help alleviate poverty and improving economic mobility is of particular interest for policy, as they are instrumental in informing future project design and scaling-up of success stories to other regions in China as well as to other countries.

The Guangxi Integrated Agricultural Development Project (GIADP) is an example of a development effort aimed at increasing rural household income in China through three project components: community infrastructure development, agricultural production and marketing support, and rural environmental improvement. GIADP is a multi-component rural development project which took place in the Guangxi Zhuang Autonomous Region (GZAR) of the People's Republic of China. The project was approved by the Executive Board of IFAD in December 2011, and entered into effect in January 2012. The project completed its interventions and activities in March 2017. The main focus of the project is to foster rural development and poverty reduction. The project consists of three components: (1) community infrastructure (rural road and irrigation infrastructures), (2) agricultural production and marketing support, and (3) rural environmental improvement.

Through the activities implemented during the course of GIADP, project beneficiaries are expected to increase their revenue from agricultural production through innovative approaches. Thus, the focus of this impact assessment is to investigate the extent to which the project may help its beneficiaries increase their revenue from production and other related outcomes. Further, we are interested in impact heterogeneity, in other words, assessing the extent to which the different types of interventions implemented by GIADP generated an impact.

### KIND OF DATA

Sample survey data [ssd]

### UNIT OF ANALYSIS

Households

## Scope

### NOTES

The household survey collects information mainly on household-level indicators related to agricultural production and household consumption expenditure and income. The community survey focuses mainly on indicators related to access to community-level infrastructure, roads, agricultural markets, environmental conditions, and resilience. The qualitative interviews consist of key informant interviews administered to project staff and village leaders in the project areas.

## Coverage

### GEOGRAPHIC COVERAGE

Regional Coverage

## Producers and sponsors

### PRIMARY INVESTIGATORS

Name	Affiliation
IFAD	United Nations
Government of People's Republic of China	

### PRODUCERS

Name	Affiliation	Role
Provincial Project Management Office	Guangxi Department of Agriculture in Nanning	Technical and Field Support
County Project Management Office	Guangxi Department of Agriculture in Nanning	Technical and Field Support
Township Project Management Office	Guangxi Department of Agriculture in Nanning	Technical and Field Support

### FUNDING AGENCY/SPONSOR

Name	Abbreviation
International Fund for Agricultural Development	IFAD
Government of China	

## Sampling

### SAMPLING PROCEDURE

For details on the sampling strategy, you can consult the appendix of the Impact Assessment plan in the documentations tab.

### WEIGHTING

No weighting.

## Data Collection

### DATES OF DATA COLLECTION

Start	End
2017-02	2017-03

### DATA COLLECTION MODE

Computer Assisted Personal Interview [capi]

## Questionnaires

### QUESTIONNAIRES

The questionnaire collected information about socioeconomic characteristics, livelihood and income-generating activities, and access to information, social capital, and social support.

Note: some variables may have missing labels. Please, refer to the questionnaire for more details.

## Access policy

### CONFIDENTIALITY

The users shall not take any action with the purpose of identifying any individual entity (i.e. person, household, enterprise, etc.) in the micro dataset(s). If such a disclosure is made inadvertently, no use will be made of the information, and it will be reported immediately to FAO

### ACCESS CONDITIONS

Micro datasets disseminated by FAO shall only be allowed for research and statistical purposes. Any user which requests access working for a commercial company will not be granted access to any micro dataset regardless of their specified purpose. Users requesting access to any datasets must agree to the following minimal conditions:

- The micro dataset will only be used for statistical and/or research purposes;
- Any results derived from the micro dataset will be used solely for reporting aggregated information, and not for any specific individual entities or data subjects;
- The users shall not take any action with the purpose of identifying any individual entity (i.e. person, household, enterprise, etc.) in the micro dataset(s). If such a disclosure is made inadvertently, no use will be made of the information, and it will be reported immediately to FAO;
- The micro dataset cannot be re-disseminated by users or shared with anyone other than the individuals that are granted access to the micro dataset by FAO.

### CITATION REQUIREMENTS

The use of the dataset should be referenced in any publication, using the following citation:

International Fund for Agricultural Development. Guangxi Integrated Agricultural Development Project, IFAD Impact Assessment Surveys, China, 2017. Dataset downloaded from <https://microdata.fao.org>.

## Disclaimer and copyrights

### DISCLAIMER

The user of the data acknowledges that the original collector of the data, the authorized distributor of the data, and the relevant funding agency bear no responsibility for use of the data or for interpretations or inferences based upon such uses
