ABSTRACT

The Project for Rural Income Through Exports (PRICE) in Rwanda is a rural agricultural commercialization project that aimed to achieve sustainable increased returns to farmers from increased participation in export-driven value chains. This goal was to be accomplished by increasing production volumes and quality of cash crops, including coffee and horticulture, through a variety of interventions. The PRICE interventions included providing technical training on coffee processing, and providing support to horticulture farmers to develop business plans and access financial capital, both loans and matching grants, for their respective enterprises.

PRICE consisted of five components, namely coffee development, tea development, silk development (sericulture), horticulture, and financial services. The information provided here, refers to the Impact Assessment of Horticulture cash crop.
