Overview

ABSTRACT

The FAO has developed a monitoring system in 26 food crisis countries to better understand the impacts of various shocks on agricultural livelihoods, food security and local value chains. The Monitoring System consists of primary data collected from households on a periodic basis (more or less every four months, depending on seasonality). The FAO launched a household survey in Iraq in October 2021 where a total of 1354 agricultural households were interviewed across four governorates, representing Iraq's distinct agro-ecological regions. This sixth-round survey was administered through computer-assisted telephone interviews in October and November – just after the harvest season.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Households

Scope

NOTES

HOUSEHOLD : household information

INCOME SOURCES,

SHOCKS : income changes, shocks experienced by households

CROP PRODUCTION : crops planted, area planted, area harvested, crop production difficulties

CROP MARKETING : crop sale difficulties, crop sale price

LIVESTOCK PRODUCTION : types of livestock present on holding, number of livestock, livestock production difficulties

LIVESTOCK MARKETING : livestock sale, livestock sale difficulties, livestock sale price

FISHERIES PRODUCTION : fish activity, comparison of fish production,

FISHERIES MARKETING : fish sale, fish sale difficulties, fish sale price

FOOD SECURITY AND CONSUMPTION : food consumption, food utilization, coping strategies

NEEDS ASSISTANCE : open questions on the needs for assistance

Sampling

Sampling Procedure

A total of 1354 agricultural households were interviewed across four governorates, representing Iraq's distinct agro-ecological regions. The sampling frame was derived from a list of farmers from the Ministry of Agriculture, with additional snowball sampling. It therefore cannot be considered representative of either the entire population or agricultural population of Iraq. The target of 385 households per governorate was met in all sampled governorates except Dohuk, where the data-collection team did not have contact information for enough farmers. In this governorate, 51 percent of the target was reached.

Weighting

No weights were considered.

Questionnaires

Overview

A link to the questionnaire has been provided in the documentations tab.

Data Collection

Data Collection Dates

Start	End	Cycle
2021-07-10	2021-11-18	N/A

Time Periods

Start	End	Cycle

Data Processing

Data Editing

The datasets have been edited and processed for analysis by the Needs Assessment team at the Office of Emergency and Resilience, FAO, with some dashboards and visualizations produced. For more information, see <https://data-in-emergencies.fao.org/pages/countries>

Other Processing

The dataset was anonymized using Statistical Disclosure methods by the Office of Chief Statistician at FAO. All direct identifiers have been removed prior to data submission.
