ABSTRACT

The FAO has developed a monitoring system in 26 food crisis countries to better understand the impacts of various shocks on agricultural livelihoods, food security and local value chains. The Monitoring System consists of primary data collected from households on a periodic basis (more or less every four months, depending on seasonality). The FAO launched a Round 3 survey consisting of face-to-face interviews on 26 October 2021 to monitor agricultural livelihoods and food security in Togo. Data collection resumed on 6 December 2021, reaching 7 117 households. For more information, please go to <https://data-in-emergencies.fao.org/pages/monitoring>

Sampling

SAMPLING PROCEDURE

The FAO conducted a household survey in Togo from 26 October to 6 December 2021 and reached 7 117 households. Data was collected through face-to-face interviews in the 5 regions of Togo (Savanna region, Kara region, Plateaux region, Central region and Maritime region). This data collection took place during the harvest season and is representative at the country prefecture level (Admin 2).

WEIGHTING

Regional weights were used to correct disproportionate sampling at the adm 2 level.
