ABSTRACT

The Food and Agriculture Organization of the United Nations (FAO) has developed a monitoring system in 26 food crisis countries to better understand the impacts of various shocks on agricultural livelihoods, food security and local value chains. The Monitoring System consists of primary data collected from households on a periodic basis (more or less every four months, depending on seasonality). FAO has undertaken six rounds of surveys in Iraq at a much smaller scale. This seventh-round survey expanded the survey instrument and increased the random sample of households surveyed to 2 233 in 18 governorates (Anbar, Babylon, Baghdad, Basra, Diyala, Duhok, Erbil, Kerbela, Kirkuk, Maysan, Muthanna, Nainawa, Najaf, Qadisiya, Salah Al-Deen, Sulaimaniyah, Thi-Qar and Wasit). Data collection was carried out using computer-assisted telephone interviews (CATI) in the 18 governorates of Iraq from 29 March to 1 May 2022.

Sampling

SAMPLING PROCEDURE

Data collection was carried out using computer-assisted telephone interviews (CATI) in the 18 governorates of Iraq from 29 March to 1 May 2022. A total of 2 233 households were interviewed – 1634 non-agricultural households and 599 agricultural households – using random digital dialing (RDD). The sample target of 136 households per governorate was achieved in six governorates (Anbar, Babylon, Baghdad, Kirkuk, Najaf and Thi-Qar). This seventh-round survey is the first round to be representative of the population at the Admin 1 level.

WEIGHTING

Data were weighted at the analytical stage to ensure that the regional population distribution was adequately represented.
