Other Household Survey [hh/oth]

ABSTRACT

The Joint Post Distribution Monitoring 2023 dataset documents a collaborative effort between the UN Refugee Agency (UNHCR) and the World Food Programme (WFP) in South Sudan. Conducted from 13 to 17 January 2023, the Joint Post Distribution Monitoring exercise assessed the needs of refugees across eight settlements to improve the targeting and prioritization of both food and non-food assistance. Data was collected through face-to-face interviews from 1295 refugee households, utilizing a stratified random sampling method. The dataset includes various data files such as anonymized household survey results and terms of reference, ensuring the data is cleaned and anonymized to protect privacy. Geographically, the data covers multiple locations, including Gorom, Jam Jang, Maban, and Yambio, encompassing both refugee and internally displaced person populations. This dataset is crucial for developing a needs-based approach to humanitarian aid in the region and is publicly accessible for further analysis and research.

KIND OF DATA

Sample survey data [ssd]

UNIT OF ANALYSIS

Households

Scope

NOTES

The scope includes:

- demographics
- cash and livelihoods
- food consumption and food security
- protection
- health
- education
- accommodation
- accountability
- feedback on humanitarian assistance

TOPICS

Topic
Health
Protection
Food security
Education
Livelihood and Social cohesion
Gender Based Violence

Child Protection
Mental Health and Psychosocial Support
Cash Assistance

KEYWORDS

Keyword

Distribution

Monitoring

Coverage

UNIVERSE

The population group covered in the study was refugee households and internally displaced persons across eight settlements in South Sudan.

Sampling

SAMPLING PROCEDURE

The Joint Post Distribution Monitoring 2023 in South Sudan used a stratified random sampling method within a cluster design, targeting 1295 households across eight refugee settlements to ensure a representative sample of the population.

Data collection

DATES OF DATA COLLECTION

Start	End
2024-01-13	2024-01-17

DATA COLLECTION MODE

Face-to-face [f2f]

DATA COLLECTION NOTES

The Joint Post Distribution Monitoring 2023 in South Sudan collected data through face-to-face interviews with 1295 households in eight refugee settlements. Enumerators received specific training and conducted interviews in local languages to ensure clarity and accuracy. Regular validation and coordination with local authorities helped navigate logistical challenges effectively.
