TITLE

Standardised Expanded Nutrition Survey (SENS), Holl-Holl Camp - 2023

COUNTRY

Name	Country code
Djibouti	DJI

STUDY TYPE

Other Household Survey [hh/oth]

SERIES INFORMATION

The Standardised Expanded Nutrition Survey (SENS) is a series of survey methodologies developed by the United Nations High Commissioner for Refugees (UNHCR) and specifically designed to consider the factors that are most relevant to refugees. SENS measures not only nutritional status data but also measures relevant other data related to household composition, anaemia, measles vaccination, vitamin A supplementation, diarrhoea and other health-related indicators, infant and young child feeding (IYCF), food availability, water, sanitation and hygiene (WASH), latrine usage and mosquito nets at the household-level. By collecting all this data, SENS studies provide a detailed snapshot of the nutritional health of a refugee population at a given point in time.

ABSTRACT

This dataset contains results from the Standardized Expanded Nutrition Survey (SENS) 2023 conducted in the Holl-Holl refugee settlement in Djibouti. Data was collected from 9 July to 11 August 2023 using simple random sampling and following version 3 of the SENS methodology. Modules include demography, anthropometry, anaemia, health, infant and young child feeding (IYCF), food security, water, sanitation and hygiene (WASH), mosquito net coverage, and COVID-19 vaccination. The dataset covers children aged 6-59 months, women of reproductive age (15-49), and sampled households.

KIND OF DATA

Sample survey data [ssd]

UNIT OF ANALYSIS

Household

Scope

NOTES

The scope includes:

- Demographic profile
- Mortality
- Anthropometric and child health indicators
- Anaemia among children and women
- Infant and Young Child Feeding (IYCF) practices
- Food consumption and coping strategies
- In-kind food assistance
- Ownership and use of mosquito nets
- Access to Water, Sanitation and Hygiene (WASH) services and hygiene products

United Nations High Commissioner for Refugees (UNHCR)
World Food Programme (WFP)
Ministry of Health Djibouti
Ministry of Interior of Djibouti, National Office for Assistance to Refugees and Disasters (ONARS, Office National pour les Réfugiés et les Sinistrés)
United Nations Children's Fund (UNICEF)

PRODUCERS

Name
United Nations High Commissioner for Refugees (UNHCR)

Sampling

SAMPLING PROCEDURE

Simple random sampling was used to select households in Holl-Holl. All eligible children aged 6-59 months were included for anthropometry, anaemia, and health modules. A subset of households selected for enumeration of the food security, water, sanitation and hygiene (WASH), and maternal health modules.

WEIGHTING

Weights were computed based on the total population in Holl-Holl (as per ProGres figures) and the achieved sample size.

Data collection

DATES OF DATA COLLECTION

Start	End
2023-07-16	2023-08-11

DATA COLLECTION MODE

Face-to-face [f2f]

DATA COLLECTION NOTES

Data were collected using Android tablets with the ODK software. Enumerators followed standardized SENS protocols, including repeat visits for absent households and special handling of admitted children. Daily syncs and plausibility checks

using ENA software for SMART were performed.
