### ABSTRACT

Since 1960, a national agricultural census was not carried out in Colombia, and during this time there has been a lack of agricultural statistical information of a technical and representative nature that agricultural surveys have not provided. With this context and the urgent need that the country had to have information on the agricultural sector that guaranteed its representativeness and reliability at a technical level, as well as in terms of comprehensive and updated information, the realization of the 3rd National Agricultural Census (CNA) was determined.

This census aims to provide georeferenced and updated statistical information on the agricultural, forestry, aquaculture, fisheries and environmental aspects; as well as agricultural producers and the population residing in the dispersed rural area for public policy decision making, and the structuring of the Agricultural Statistical System (SEA), a component of the National Statistical System (SEN).

The 3rd CNA considers, as part of its requirements, to be a thematic complement in the rural space for the next Population and Housing Census. For this reason, one of its objectives is to quantify housing, homes and the resident population and establish its basic socio-demographic characteristics, as well as, to recount non-agricultural economic activities.

### KIND OF DATA

Census/enumeration data [cen]

### UNITS OF ANALYSIS

Agricultural holdings

## Scope

---

### NOTES

The topics covered include:

- Use of the land or farms that make up the Agricultural Production Unit (UPA).
- Characterization of agricultural producers.
- Formation of the UPA
- Inventory and agricultural practices in the UPA.
- Livestock inventory.
- Fishing activity
- Inventory of machinery and constructions for agricultural use
- Sustainability of agricultural activity
- Total area in land use and cover within the UPA
- Identification of the UPA in indigenous protection and lands of the black communities

- Non-agricultural activity in the UPA
- Quantification of homes and homes in the UPA
- Sociodemographic characterization of the habitual Residents in the UPA.

## TOPICS

Topic	Vocabulary	URI
Rural, agricultural and forestry production		
Housing		
Censuses		
Natural resource and energy		
Distribution of animal and plant species		

## KEYWORDS

Agricultural activities, Non-agricultural activities, Self consumption, Planted and sown area, Scattered fruit and forestry trees, Fallow, Natural forests, Agricultural cultivation, Permanent and transient crops, Agricultural producer, Agricultural Production Unit (UPA), Housing and habitual resident

## Coverage

## GEOGRAPHIC COVERAGE

National Coverage

## UNIVERSE

The study universe of the 3rd CNA, 2014 is the entire rural area of the country.

In addition, the 3rd CNA will allow to gather complete information of the natural or legal persons (agricultural producers) on whom the responsibility falls to adopt the main decisions on the use of the available resources, the use of the factors of production (work, capital, machinery, etc.) and administrative control on the property, parts of land or set of land with agricultural activity.

## Producers and Sponsors

## PRIMARY INVESTIGATOR(S)

Name	Affiliation
